Dear [REDACTED]

## PROVISION OF REQUESTED INFORMATION

Thank you for your request for information about the welfare of ponies on Bodmin Moor which we received on 22 August 2016. Your request has been handled under the Freedom of Information Act (FOIA) 2000.

The information you requested and our response is detailed below:

"I would like to request information under the Freedom of Information Act.

- Since 2010 how many incidents of pony welfare on Bodmin Moor have been attended per Common, per month up to the present?

The number of pony welfare incidents attended per year, per month by APHA is attached at Appendices 1 to 44.

The number of incidents per common has been withheld under Section 38 of the Freedom of Information Act, please see below for further details.

- How many routine visits have been made to check the welfare of Bodmin ponies on Bodmin Moor per Common, per month since 2010?

All welfare visits regarding the Bodmin ponies are initiated by welfare intelligence and are not routine.

- Please could you provide documents/reports/seizure papers related to these incidents.

Please see attached at Appendices 1 to 44 the Welfare reports from 2010 to 22 August 2016 (date of your request).

Information has been redacted under Section 38, Section 40(2) and 40(3)(a)(i) of the Freedom of Information Act (2000).

Section 38 refers to the exemption from the duty to provide information if it would, or would be likely to affect anyone's health or safety.

#### Public Interest Test for Section 38

We recognise that there is a general presumption in favour of transparency and openness concerning our work, and providing the general public with the right to request access to information held by public authorities.

We also recognise that there is a public interest in disclosure of this specific information in order to increase this transparency and aid well-informed debates concerning the welfare of the Bodmin Moor ponies, and the individuals associated with them.

However, we feel that there is a stronger public interest in withholding the information as addresses, including the specific Moor would identify further information and would, or would be likely to, endanger the health and safety of staff or the public. This poses a substantial risk to the health and safety of individuals associated with the ponies that would be of significant severity and is likely to occur in some cases. We consider this to be a significant factor in favour of maintaining the exemption.

APHA has balanced the real threat to the health and safety of individuals which disclosure of the requested information would be likely to cause, against the public interest arguments in favour of disclosure. In this instance the APHA does not consider that disclosing the information requested in order to inform public debate and to promote accountability and transparency would justify the risk to individuals' health and safety.

Section 40(2) and 40(3)(a)(i) refers to other people's personal information. Some of the information contained within the requested documents has been withheld under section 40(2) and 40(3)(a)(i) (third party personal data) of the FOIA as the information constitutes personal data relating to a third party. Section 40(2) and 40(3)(a)(i) of the FOIA provides that personal data relating to third parties is exempt information if disclosure would breach the Data Protection Act 1998 (DPA). This is an absolute exemption and does not require a Public Interest Test.

APHA consider that disclosure of this information is likely to breach the first data protection principle in Schedule 1 of the DPA, which relates to the fair and lawful processing of personal data, in two ways. First, disclosure would not constitute 'fair' processing of the personal data, second, disclosure would not satisfy any of the conditions for data processing set out in Schedule 2 to the DPA. Therefore, we have concluded that this information is exempt from disclosure under section 40(2) of the FOIA.

The papers which relate to seizures are not held by APHA as we serve no such documents.

- Is similar information available prior to 2010?

Yes.

- Does APHA have an allocated budget to cover welfare of ponies on Bodmin Moor? How much do APHA estimate it costs to cover Bodmin pony welfare, per year since 2010?"

APHA does not have an allocated budget to cover the welfare of the ponies on Bodmin Moor.

Information disclosed in response to this FOI request is releasable to the public. In keeping with the spirit and effect of the FOI Act and the government's Transparency Agenda, this letter and the information disclosed to you may be placed on GOV.UK, together with any related information that will provide a key to its wider context. No information identifying you will be placed on the GOV.UK website.

I attach an Annex which explains the copyright that applies to the information being released to you and contact details should you be unhappy with the service you have received.

If you have any queries about this letter, please contact the Access to Information Team at the email address below or postal address at the top of this letter.

Yours sincerely

Information you receive which is **not** subject to Crown Copyright continues to be protected by the copyright of the person, or organisation, from which the information originated. You must ensure that you gain their permission before reproducing any third party (non Crown Copyright) information.

### **Complaints**

If you are unhappy with the result of your request for information you may request an internal review within 40 working days of the date of this letter.

If you wish to request an internal review, please contact: The Access to Information Team at [enquiries@apha.gsi.gov.uk](mailto:enquiries@apha.gsi.gov.uk) or at the postal address at the top of this letter, who will arrange for an internal review of your case.

If you are not content with the outcome of the internal review, you have the right to apply directly to the Information Commissioner for a decision. Please note that generally the Information Commissioner cannot make a decision unless you have first exhausted APHA's own complaints procedure. The Information Commissioner can be contacted at:

██████████ 9 mares & 1 yearling. All fine. Yearling previously seen borderline ██████████ gone. Carrots on side of road. ██████████ feeding?

██████████ 51 mares & foals. All good condition. Fodder beet available.

██████████ 20 mares & foals including a group of 8 Shetlands. All good

██████████ 15 all good

██████████ 27 mares & foals. OK

██████████ 22 including mares & a few yearlings. OK. Not as good as first 4 areas. Marked rain tracks on coats (predisposition to rainscald?). Revisit these 2 areas at future surveys.

██████████ 41 of which 8 near ██████████ track, 2 near ██████████ & 31 near ██████████ All fine. Limited for time so did not do rest of ██████████

In general all ponies appear in good condition ██████████ and some were very good.

Ponies on ██████████ OK for going into Winter but noticeably not as good as the others. A difficult area to access & not visible to public. Needs to be surveyed again this Winter

Visit with [REDACTED] AHO & landrover, [REDACTED]

3 thin bay mares seen in [REDACTED]: one by [REDACTED] one on [REDACTED], one by [REDACTED]. All appeared to be in foal and 2 had last year's foals at foot.

First 2 were seen at last survey and had been BMCC told to arrange removal

All ponies brought in to field owned by [REDACTED] who is BMCC contact for this Section. [REDACTED] claimed that they were not his (although [REDACTED] seemed to know one was 30 y.o.!). I instructed [REDACTED] to arrange humane killing or keep in to feed & treat as they were not fit to be on the moor. [REDACTED] said [REDACTED] would arrange to have them shot.

Dung sample taken from [REDACTED] mare did not indicate high worm burden so suspect lack of feed/poor teeth causing poor condition.

BMCC informed of actions and of failure to remove 2 thin mares when reported last month. [REDACTED] BMCC [REDACTED] will discuss with [REDACTED] & will reconsider [REDACTED] as welfare contact for the future.

Small amounts carrots & grass cuttings seen at [REDACTED] at start of survey. Whole pile of carrots seen at end so irresponsible feeding by [REDACTED] continues. [REDACTED] informed.

Visit with [REDACTED] AHO & landrover,

Nearly whole area covered thanks to cold weather & snow

Letter sent 04.01.13 to all pony keepers urging reduction in numbers.

154 ponies seen compared with 222 seen on 11.12.12 so some reduction but still over the 120 seen in Feb 2011 when major welfare problems occurred. [REDACTED]

Grazing very poor. Ponies eating gorse. Only 2 groups of stock being fed: [REDACTED] with 15 ponies at [REDACTED] [REDACTED] and 8 ponies which came across to feed provided by [REDACTED] for [REDACTED] outside [REDACTED]. Many yearlings on dams. 5 of these thin/borderline.

[REDACTED] BMCC informed & will try to get further reduction & investigate possible disposal routes.

Visit with [redacted] AHO & RSPCA Insp [redacted] & landrover, Unable to drive over moor due to very wet muddy ground so did most on foot. Unable to cover [redacted] at all due to distance.

117 ponies seen in area we could access or see. Generally looked OK although very poor grazing & no supplementary feed. One grey mare on [redacted] of [redacted] although bright. We will keep an eye on this one. Could be more in [redacted] but with wind & cold we were of the opinion most would be in the more sheltered areas which we could access.

Grazing very poor. Ponies eating gorse. Only 2 groups of stock being fed: [redacted] ponies at [redacted] of [redacted]

Overall cautiously relieved that stock is holding up. Reports of a few pony deaths but no carcasses seen.

Visit in response to report of dead pony and starving ponies on [REDACTED]  
Found one dead and emaciated. One emaciated and very weak chestnut Shetland stallion - destroyed with barbiturate and collected by [REDACTED]. Cut off top of left ear and semi circle notch in rt ear - photographed. About 20+ other ponies seen, many very thin, Nothing to eat. One pony skeleton. rang [REDACTED] who agree to take remaining ponies off moor. I rang [REDACTED] next day. [REDACTED]  
[REDACTED] said [REDACTED] had wormed the "fat" ponies and put them back on [REDACTED]. I told [REDACTED] they must be fed. [REDACTED]. They had already gone to Exeter so I could not examine the carcasses.  
I suggest that this should prompt XC visits to [REDACTED] and other graziers who use [REDACTED]

Visit with [redacted] AHO & RSPCA Insp [redacted] & AHVLA landrover,  
Grazing extremely on all areas.

At start of visit report received of mare down on [redacted] Due to time pressure Insp [redacted] went alone to investigate. Mare that was down now dead. [redacted] to arrange removal. Another grey mare alone in same area very poor. Needs to come off. [redacted] & [redacted] to arrange. As usual owners unknown.

[redacted] 20 ponies with a group of [redacted] receiving feed. [redacted]  
[redacted]. All look OK.

[redacted]: only 4 of the 7 shetlands that were there could be found. No supplementary feed but ponies in good condition & could be approached. No chips detected with reader.

[redacted] 8 ponies OK

[redacted] the continued alone:

"Just to let you know that I saw a group of 3 and another of 7 at [redacted], another group of 3 and a 16 at [redacted] and a group of 6 and a 4 at [redacted] all appeared well fleshed. The grazing, although poor is much better than at [redacted] and the stocking density is far less than at [redacted]"

[redacted] BMCC informed

Subsequent report of 7 ponies in poor condition on [redacted] of [redacted] passed to [redacted] BMCC

Visit with [redacted] AHO [redacted] FTL & landrover

Some grass starting to grow but grazing still very poor.

[redacted]  
Disappointingly high number of ponies: 136 of which 12 newborn foals and at least 7 stallions.

A number of mares with young foals in [redacted]

2 pony carcasses

[redacted] informed. [redacted] will deal with carcasses & lame one. Will probably have to shoot as in a very wild group, could not get near them.

[redacted] informed. [redacted] will try to find homes for some of the mares & foals

Visit with [REDACTED] AHO & landrover to count approx numbers before multi-agency pony welfare meeting  
25.10.13

Scattered small groups of ponies around moor. All in good condition and plenty of grass but too many stallions, stallions with mares that are too small or have foaled in the last few months.

Also scattered cattle but fewer of these than in Jan-Mar 13.

Visit with [REDACTED] AHO & [REDACTED] BMICC & AHVLA landrover

Previously about 60 reported but only 39 seen on this survey over extensive area. The majority were on [REDACTED].

4 far too thin [REDACTED] to arrange removal.

None good. Many borderline. Some acceptable. Stallions present and majority of mares appear to be in foal. A number of yearlings.

Our presence noted within very short time!

Look into cost of worming all ponies. [REDACTED] to fund.

**Comments / General Information:** Owners not known. No care or management. As usual most of the mares look to be in foal & many have last year's foals with them. Many mares sucking last year's foals are borderline body condition only just 0 or below. Concerns that they will inevitably worsen. Some groups appear settled and are of similar breed/size. Others dispersed groups, mixed sizes which is of concern and many stallions present & many large stallions are with small shetland type mares.
