**Digital Remittance Project**

*"Would you please send me relevant information on the DFID Digital Remittance Project?  I am particularly interested in a "business requirements specification" for the solution that is being designed and built, plus any publicly available information, if it exists".*

You can access information on the [Digital Remittance Project](#) using this link to the GOV.UK website. DFID does not hold a 'business requirements specification' as no decisions have yet been taken by the World Bank regarding procurement of an IT solution for the Safer Corridor Pilot.
