Title: UK Patent Landscape - Top UK based applicants for the eight great technologies

Date of release: 25 April 2016

Information request:

I have been reading the patent overviews for each the Eight Great Technologies published in May - July 2014. Namely:

- Eight Great Technologies - Life Sciences, Genomics and Synthetic Biology - A patent overview
- Eight great technologies: advanced materials - A patent overview
- Eight great technologies: agri-science - A patent overview
- Eight great technologies: Big data - A patent overview
- Eight great technologies: Energy storage - A patent overview
- Eight great technologies: robotics and autonomous systems - A patent overview
- Eight great technologies: Regenerative medicine - A patent overview
- Eight great technologies: satellites - A patent overview

In each of these reports, you provide some great information about the UK Landscape (section 3). Specifically, you have published some charts that show the top 10 UK based applicants, like the chart I have copied below. In the accompanying text for each chart you mention some of the top 30 applicants. Would it be possible to find the data showing the Top 30 applicants and the number of patent families for each of the Eight great Technology families? Is this information available anywhere on your site?

Information released:

See the Top UK based patent applicants for the eight great technologies Excel spreadsheet.
