This report covers military Search and Rescue (SAR) activities for 2015 Q1 (Jan to March). The report includes the number of incidents (i.e. the number of emergencies that military SAR units have responded to), the number of callouts (i.e. the number of units attending an incident) and the number of persons moved. There is a strong seasonal pattern to SAR callouts, with the peak activity occurring in Q3, corresponding to the warmer summer months when people are more active around the coast and mountains of the UK. The long term trend shows that SAR callouts peaked in 2009, and since then there has been a reduction in callout numbers, reverting towards the long term average. Over the past five years, quarterly callout numbers have averaged 482. During 2015 Q1, there were 396 callouts.

Key Points and Trends

- Between January and March 2015, military Search and Rescue units attended 377 incidents, resulting in 396 callouts and 303 persons moved (Table 1). The numbers of incidents, callouts and persons moved were all lower than in 2014 Q1.
- The unit which attended the most callouts this quarter was HMS Gannet, with 89 callouts (Table 4). RAF Chivenor was the second highest, with 57 callouts, closely followed by RAF Lossiemouth, with 53 callouts.
- The unit which moved the highest number of persons this quarter was HMS Gannet, with 79 (Table 6). RAF Chivenor was the second highest, with 45 persons moved.
- The most common type of callout this quarter was Medrescue, with 163 (43% of all helicopter callouts). Medrescues also involved the highest number of persons moved, with 178 (59% of all persons moved).
- The majority (72%) of callouts this quarter were to land-based incidents (Table 3). Callouts on land and coast both show a strong seasonal pattern with a dip in callout numbers in Q1 each year, increasing again in Q3. Maritime callouts show less seasonality, with no clear peaks during the year.
- In 2015 Q1, 95% of callouts were to civilian incidents and 5% were to military incidents (Figure 3).

Further Information

Defence Economics welcomes feedback on statistical products. If you have any comments or questions about this Statistical Bulletin or about our statistics in general, you can contact us at:

- Phone Defence Economics (Price Indices) 030 679 32100.
- Email defstrat-stat-enquiries-mailbox@mod.uk

If you require information which is not available within this or other available publications, you can submit a Request for Information under the Freedom of Information Act 2000 to the Ministry of Defence via the following link:

<http://www.mod.uk/DefenceInternet/ContactUs/FreedomOfInformationInformationRequest.htm>

The United Kingdom Statistics Authority has designated these statistics as National Statistics, in accordance with the Statistics and Registration Service Act 2007 and signifying compliance with the Code of Practice for Official Statistics.

Designation can be broadly interpreted to mean that the statistics:

- meet identified user needs;
- are well explained and readily accessible;
- are produced according to sound methods; and
- are managed impartially and objectively in the public interest.

Once statistics have been designated as National Statistics it is a statutory requirement that the Code of Practice continue to be observed.

What is included in this report?

This report covers military SAR activities for 2015 Quarter 1. It includes details of the activities of UK military SAR helicopters, RAF SAR helicopters operating in Cyprus and the Falkland Islands and military Mountain Rescue Teams. It also provides a summary of Maritime and Coastguard Agency (MCA) helicopter callouts. Additionally, military SAR reports are produced on a monthly and annual basis, available at:
<https://www.gov.uk/government/collections/military-search-and-rescue-monthly-statistics-index>
<https://www.gov.uk/government/collections/military-search-and-rescue-annual-statistics-index>

The report includes counts of the number of incidents, callouts and persons moved in the previous quarter.

Incidents are emergencies attended by Royal Navy or Royal Air Force units whose primary task is SAR, plus other military aircraft and ships that are available to the Aeronautical Rescue Coordination Centre (ARCC).

Each SAR unit attending an incident is described as a callout. An incident may result in one or more callouts.

Persons moved figures include people who are moved from a hostile environment to a safe environment, or to a medical facility to receive urgent medical attention. They also include individuals moved between medical facilities at the request of the NHS.

The data source for this report is a weekly download from the ARCC database. Every incident recorded by the ARCC is included in these tables. Incident data for Cyprus and the Falklands is provided by ARCC Kinloss but checked directly with the overseas units to ensure that there are no missing records. All data is validated and checked by Defence Economics on receipt. Further details are available in the SAR Background Quality Report. This also includes details of internal and external users of the reports, including a summary of their requirements and how well Defence Economics' reports meet these requirements.

Introduction

Military Search and Rescue

The military Search and Rescue (SAR) service exists primarily to assist military personnel in difficulty, but the majority of its work involves assisting civilians in distress, both on land and at sea (data on the split between civilian and military callouts is presented on page 5). SAR coverage for the United Kingdom and a large area of the surrounding sea is provided 24 hours a day and 365 days a year by the RAF and the Royal Navy.

UK Helicopters

The UK military SAR aeronautical coverage currently consists of RAF and Royal Navy SAR Sea King helicopters operating from eight locations around the UK (RAF Boulmer, RAF Lossiemouth, RAF Leconfield, RAF Valley, RAF Chivenor, RAF Wattisham, RNAS Culdrose and HMS Gannet). The military SAR force operates 24 hours a day. It provides coverage throughout the UK, and also covers an area extending from the Faroe Islands in the north, the English Channel in the south, about half way across the North Sea to the east and halfway across the Atlantic Ocean to the west.

The UK SAR helicopter coverage is coordinated by the Aeronautical Rescue Coordination Centre (ARCC) based at Kinloss Barracks.

Mountain Rescue Teams

The RAF has four mountain rescue teams (MRT), based at RAF Lossiemouth, RAF Leuchars, RAF Leeming and RAF Valley. The MRT units provide land rescues, primarily over the mountain regions of the UK. Military MRT units are coordinated by the ARCC, and often work in conjunction with helicopter units.

Overseas Helicopters

A SAR service is also provided by two overseas bases, at RAF Akrotiri in Cyprus and RAF Mount Pleasant in the Falkland Islands.

Further information on the UK's military SAR coverage is available at:

<http://www.raf.mod.uk/rafsearchandrescue/>

<http://www.royalnavy.mod.uk/Operations/Enduring-Operations/UK/Search-and-Rescue>

Other Search and Rescue

In addition to the RAF and Royal Navy, a number of non-military organisations provide SAR coverage throughout the UK. The activities of most of these non-military organisations is outside the scope of this report; however background information on some of the organisations involved is provided below.

Maritime and Coastguard Agency

In addition to the eight military aeronautical SAR units, additional aeronautical SAR coverage is provided by four Maritime and Coastguard Agency (MCA) helicopter units. Although these are not part of the military SAR service, the MCA helicopters are coordinated by the ARCC at Kinloss Barracks, to provide integrated coverage across the UK. A summary of callouts for this quarter is provided in this report.

In addition to its aeronautical coverage, the MCA provides maritime SAR coverage throughout the UK. Details of maritime SAR callouts are not included in this report. Further information is available at:

<http://www.dft.gov.uk/mca/mcga07-home/emergencyresponse/mcga-searchandrescue.htm>

RNLI

The RNLI is a charitable organisation providing 24 hour lifeboat SAR coverage around the coast of the UK and Republic of Ireland, along with a seasonal lifeguard service.

<http://www.rnli.org.uk/>

Mountain Rescue Teams

A number of voluntary Mountain Rescue services operate throughout the UK. These often work in conjunction with the military SAR service. Details of non-military Mountain Rescue callouts are not included in this report. Further information can be found at:

<http://www.mountain.rescue.org.uk/>
<http://www.mrcofs.org/>

Air Ambulance

Air Ambulance services operate throughout the UK, providing emergency medical assistance. Further information is available at:

<http://www.associationofairambulances.co.uk/>

1. Search and Rescue Summary

This section provides a summary of SAR activity for this quarter, covering both helicopter and mountain rescue units for the UK and Overseas.

[Table 1](#) shows the incidents, callouts and persons moved for 2015 Q1. In 2015 Q1 there were 396 callouts, 377 incidents and 303 persons moved. This quarter, March had the highest number of callouts with 138 and January followed closely behind, with 136.

[Table 2](#) shows the quarterly incidents, callouts and persons moved since 2005 Q1. For the first half of the last decade the number of callouts increased year-on-year, peaking in 2009. Since then callout numbers have fallen and in recent years there has been a return to the long-term average.

[Figure 1](#) provides a graphical representation of the numbers in [Table 2](#). SAR activity shows a strong seasonal pattern. The busiest quarter is always Q3, corresponding to the warmer summer months. This is due to more people being active around the coastline and in the mountain regions of the UK.

[Table 3](#) shows the location and category of callouts in 2015 Q1. Maritime incidents are those that occur more than 3 nautical miles from the high tide line. Coastal incidents are those occurring between the high tide line and 3 nautical miles out to sea. All other incidents are classed as land. The land callouts can include those occurring at inland waterways, such as lakes or rivers.

[Table 3](#) also shows the type of environment to which the callout is made. The categories are 'aero' for incidents involving aeronautical accidents, 'ship' to casualties located on a ship or large boat, 'leisure craft' for casualties on a smaller vessel such as a yacht or a dinghy, 'rig' for casualties on an oil rig, 'beacon' or 'flare' for callouts responding to these types of distress signals, and 'person' for an individual not on any of the aforementioned structures. The majority of callouts are generally categorised as 'person'.

[Figure 2](#) shows the locations of callouts over the past five years. The majority of callouts are usually on land, averaging 68% of all callouts over the past five years. Both land and coast callouts show a seasonal pattern, with the peaks occurring in the summer months of Q3. Maritime callouts only show a very slight seasonal pattern, as these callouts are generally in response to people taken sick on a boat, which does not depend on the season.

1. Search and Rescue Summary

Figure 3 shows the current quarter's split between callouts to civilian casualties and those to military casualties. Although the military SAR service exists primarily to assist military personnel, the vast majority of their work involves assisting civilian casualties. During 2015 Q1, 95% of callouts were to civilians.

Figure 4 shows UK callouts over the past 5 years grouped according to the categories shown on page 22 of this report. Essentially the 'Rescue-Type' callouts are those where a person was moved without the need for an extensive search, 'Search-Type' callouts are those where a search was performed due to an unknown casualty location, 'Assistance-Type' are those where the unit provided assistance without moving a casualty, and 'Other' are those where the SAR unit was ultimately not needed.

The majority of callouts are generally 'Rescue-Type', averaging around 59% of all callouts over the past five years. These show a seasonal pattern, with the peak generally coming in Q3 each year. Callouts grouped as 'Other' also show a seasonal pattern. There is less seasonality in the 'Search-Type' and 'Assistance-Type' callouts, although these quarterly series are based on relatively low numbers of callouts.

Figure 5 shows the requesting organisations for UK callouts for 2015 Q1. These are the organisations that initially requested the assistance of a military SAR unit. The coastguard and police each requested 31% of UK callouts during 2015 Q1.

Figure 6 shows a time series over the past five years. The coastguard often has the highest number of requests, although more so during the summer months. The number of coastguard requests is highly seasonal, with a dip in Q1. There is less of a seasonal pattern to police or ambulance requested callouts. These type of callouts are generally responding to road traffic accidents, missing persons, or transfers between hospitals, which broadly occur equally throughout the year.

Table 1 UK & Overseas Callouts, Incidents and Persons Moved, 2015 Q1

| | Total Callouts | UK Helicopters | Overseas Helicopters | Mountain Rescue | Incidents | Persons Moved |
|-----------------|-----------------------|-----------------------|-----------------------------|------------------------|------------------|----------------------|
| 2015 Jan | 136 | 127 | 3 | 6 | 128 | 96 |
| Feb | 122 | 115 | 3 | 4 | 119 | 89 |
| Mar | 138 | 123 | 8 | 7 | 130 | 118 |
| 2015 Q1 | 396 | 365 | 14 | 17 | 377 | 303 |

1. Search and Rescue Summary

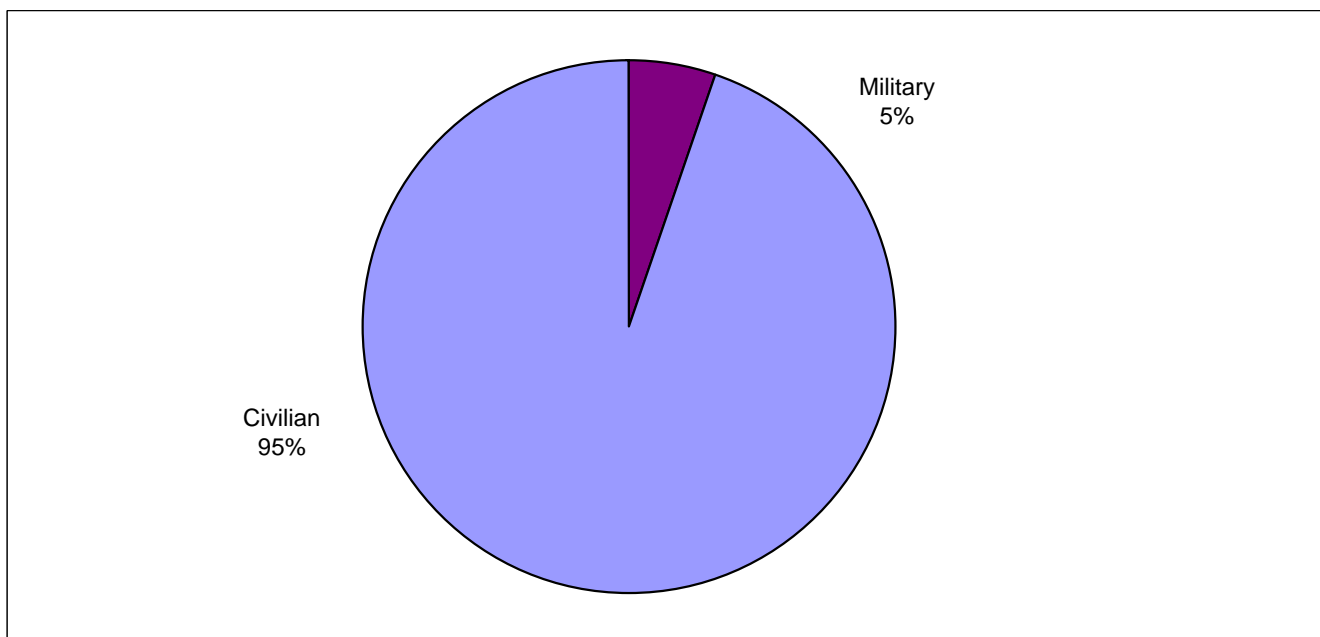

Figure 3 UK & Overseas Callouts by Civilian or Military, 2015 Q1

1. Search and Rescue Summary

Figure 4 UK Callouts by Callout Grouping, 2010 Q1 to 2015 Q1

1. For definitions of callout groupings see SAR Definitions on page 22

Figure 5 UK Callouts by Requesting Organisation, 2015 Q1

Figure 6 UK Callouts by Requesting Organisation, 2010 Q1 to 2015 Q1

2. The requesting organisation is determined using an automated lookup function which searches for key text within the organisations' name. Within the 'Other' category, there may be a limited number of callouts by either Ambulance, Police or Coastguard due to the automated algorithm used.

2. Search and Rescue Helicopter Callouts

This section focuses on SAR helicopter callouts, excluding Mountain Rescue Teams.

[Table 4](#) presents the number of callouts in 2015 Q1 by both unit and assistance type. The unit responding to the most callouts in 2015 Q1 was HMS Gannet, with 89 callouts. The next highest were RAF Chivenor and RAF Lossiemouth, with 57 and 53 callouts respectively.

The assistance type with the most helicopter callouts during 2015 Q1 was Medrescue, with 163 callouts. This represents 43% of all helicopter callouts during the quarter. Medrescues involve moving an injured person to a medical facility, and generally account for a large proportion of the work of the SAR units

[Figures 7a, 7b](#) and [7c](#) show the number of callouts by unit over the past five years. The units responding to the highest number of callouts are HMS Gannet (averaging 80 per quarter over the past five years), RAF Valley (averaging 75) and RAF Chivenor (averaging 70), which generally cover the Scottish Highlands, Snowdonia National Park, and south west England and south Wales respectively.

Most units show some seasonality in their callout numbers, although this is most pronounced for RAF Chivenor and RNAS Culdrose (both covering the south west of England), and RAF Valley (covering north Wales). These regions typically see a large increase of activity during the summer months, both around the coast and inland.

[Figures 8a to 8h](#) show the number of callouts for each helicopter unit over the past five years by the callout groupings shown on page 22 of this report. For most units 'Rescue-Type' tends to be the largest grouping, although there is some seasonal variation. Most units tend to follow the overall pattern of peak activity in Q3, although this is most pronounced for the 'Rescue-Type' callouts.

[Table 5](#) presents flying times for each helicopter unit. Total flying hours is a measure of the total time spent flying whilst on SAR callouts during the quarter, while average flying hours is the average time spent flying per callout during the quarter. The average time to casualty is the average time between departure from the base and arrival at the incident. All timings are expressed in hours and minutes. SAR units are held at a readiness of 15 minutes between 08.00 and 22.00, and a readiness of 45 minutes between 22.00 and 08.00.

The unit with the highest total flying hours this quarter was HMS Gannet, with over 170 hours flown. The unit with the highest average flying hours per callout was RAF Lossiemouth, with an average of 2 hour 38 minutes

[Figures 9a to 9c](#) shows flying hours by unit over the past five years. There is usually a strong correlation between callout numbers and total flying hours, although this can be affected by significant callouts which can often involve many hours searching. RAF Lossiemouth and HMS Gannet often have high flying hours, as these units typically respond to callouts in remote regions in Scotland, which can take longer to reach than callouts within some of the other units' response areas.

2. Search and Rescue Helicopter Callouts

Table 4 UK & Overseas Callouts by Unit and Assistance Type, 2015 Q1

Table 5 UK & Overseas Flying Hours by Unit, 2015 Q1

| | Total Flying Hours ³ | Average Flying Hours ³ | Average time to casualty ^{3,4} | Average distance from base (nm) ⁵ |
|----------------------------|---------------------------------|-----------------------------------|---|--|
| RAF Boulmer | 79.40 | 2.25 | 0.31 | 65 |
| RAF Lossiemouth | 139.54 | 2.38 | 0.35 | 62 |
| RAF Leconfield | 39.55 | 1.36 | 0.20 | 42 |
| RAF Valley | 74.09 | 1.35 | 0.13 | 34 |
| RAF Chivenor | 84.36 | 1.29 | 0.18 | 36 |
| RAF Wattisham | 30.51 | 1.49 | 0.15 | 45 |
| RNAS Culdrose | 65.55 | 1.30 | 0.19 | 44 |
| HMS Gannet | 170.14 | 1.55 | 0.27 | 52 |
| UK Other Helicopters | - | - | - | - |
| Cyprus | 2.10 | 0.43 | 0.05 | 10 |
| Falklands | 17.45 | 1.37 | 0.17 | 27 |
| Overseas Other Helicopters | - | - | - | - |
| | 705.09 | 1.52 | 0.23 | 47 |

3. Times are expressed in Hours and Minutes.

4. Time to casualty is the time from departure from base to arrival at incident.

Figure 9a Flying Hours for Boulmer, Lossiemouth & Leconfield, 2010 Q1 to 2015 Q1

Figure 9b Flying Hours for Valley, Chivenor & Wattisham, 2010 Q1 to 2015 Q1

Figure 9c Flying Hours for Culdrose, Gannet & Overseas, 2010 Q1 to 2015 Q1

3. Persons Moved

This section provides a summary of the persons moved during SAR callouts this quarter.

[Table 6](#) shows the persons moved by unit and assistance type for 2015 Q1, for UK and Overseas helicopter units. A single callout can involve moving persons under more than one assistance type. For example, if two persons were moved from a hostile environment, one being injured and the other not, this would be recorded as one Medrescue and one Rescue.

The number of persons moved is generally strongly correlated with the number of callouts. A callout typically involves moving 1, 2 or no persons. However, occasionally there are large incidents with many persons moved.

Table 6 shows that during 2015 Q1, 59% of the persons moved were for Medrescues. The next highest group was Rescue, representing 17% of the quarterly total. Rescues involve the transfer of distressed uninjured persons from a hostile to a benign environment.

[Figures 10a](#) to [10c](#) show the number of persons moved by unit over the past five years. During this period RAF Valley and HMS Gannet averaged the highest number of persons moved per quarter with 72 and 71 respectively. These units are located in areas which typically show high demand for SAR assistance (see [page 6](#)).

[Table 7](#) shows the number of persons moved in 2015 Q1 by location, for all SAR units (including Mountain Rescue Teams). As with callouts, most of the persons moved this quarter were from incidents on land.

[Figure 11](#) shows persons moved by location over the past five years. In any given quarter over this period over half of the persons moved were from land-based incidents, with the average being 72%. There is a seasonal pattern to both the land and coast numbers, with the peak occurring in the summer months during Q3. The number of persons rescued from a maritime environment (typically people taken ill on a ship) does not show a large degree of seasonal fluctuation.

[Table 8](#) shows the number of persons moved this quarter by category. In 2015 Q1, 83% of persons moved were categorised as 'Person', i.e. an individual not associated with any of the other structures, such as ships, leisure crafts, rigs or aeroplanes.

[Figure 12](#) shows the split between civilian and military persons moved over the past five years. Typically around 97% of persons moved are civilians. In 2015 Q1, 94% of persons moved were civilian and 6% were military.

4. Other Search and Rescue

This section focuses on the non-helicopter units within the military SAR service, and also gives a summary of the Maritime & Coastguard Agency's (MCA) helicopter callouts for this quarter.

[Table 9](#) shows the callouts, persons moved and man hours for each military Mountain Rescue Team (MRT) during 2015 Q1. The number of persons moved by each MRT unit tends to be relatively low. MRT units often work in conjunction with helicopter units, to help locate casualties in difficult terrain. If the casualty is then transferred out by the helicopter unit, the helicopter unit will be associated with the person moved in the report, rather than the MRT unit.

The MRT man hours are the total time spent working on a callout by all members of the unit. The total man hours figure this quarter is 2,109, which is above the average for the past five years of 1,601 hours per quarter.

[Figures 13a](#) to [13d](#) show the callouts and man hours for each MRT unit over the past five years. These tend to be fairly volatile series, with some large changes from one quarter to the next. This is primarily due to the small numbers of callouts, which can vary considerably from month to month, and the large range of activities undertaken by MRT units which result in considerable variability in man hours required. There is little appreciable seasonality, although the MRT units can often be at their busiest during the winter months. This is often the result of walkers in mountain regions being caught by rapidly changing weather during the colder months, and consequently needing to be rescued.

[Figure 14](#) presents military fixed wing callouts. Prior to March 2010, fixed wing coverage was provided by Nimrod aircraft operating out of RAF Kinloss. The Nimrods were withdrawn from service in March 2010.

[Table 10](#) shows MCA callouts for this quarter. Lee on Solent responded to the highest number of callouts, with 46. Shetland and Stornoway both attended similar number of callouts in 2015 Q1, with 34 and 30 respectively. Portland responded to 14 callouts this quarter. These statistics are validated and provided by the MCA. They are subject to change and are outside the scope of National Statistics.

[Figure 15](#) shows MCA callouts over the past five years. As with the military SAR callouts, there is a seasonal pattern, with the peak callout numbers occurring over the summer.

4. Other Search and Rescue

Table 9 MRT Callouts, Persons Moved and Man Hours by Unit, 2015 Q1

| | Callouts | Persons | Man Hours |
|--------------------------|-----------|----------|--------------|
| Lossiemouth ⁵ | 5 | - | 1,196 |
| Leeming | 7 | 1 | 668 |
| Leuchars | - | - | - |
| Valley | 5 | 1 | 245 |
| Other | - | - | - |
| Total | 17 | 2 | 2,109 |

Please note that the figures in Table 10 and Figure 15 are provisional and subject to audit. They are provided by other bodies and are not designated as National Statistics. The Department has not assessed the quality of these statistics. They are published to provide extra context.

5. UK Search and Rescue Geography

The maps over the following four pages show the locations of military SAR callouts during this quarter.

Each unit has an area over which they typically respond to incidents. Sea King helicopters have a maximum endurance of 6 hours, giving a usual radius of actions of around 300 nautical miles from base.

The areas typically covered by each SAR unit are as follows:

RAF Boulmer: the Lake District, the north east coast of England, and south east Scotland

RAF Valley: North Wales and in the Irish Sea

RAF Wattisham: south east England

RAF Chivenor: south west England and south Wales

RAF Leconfield: the Midlands and the east coast of England

RAF Lossiemouth: the north of Scotland

HMS Gannet: central and western Scotland

RNAS Culdrose: Cornwall and out into the Atlantic Ocean

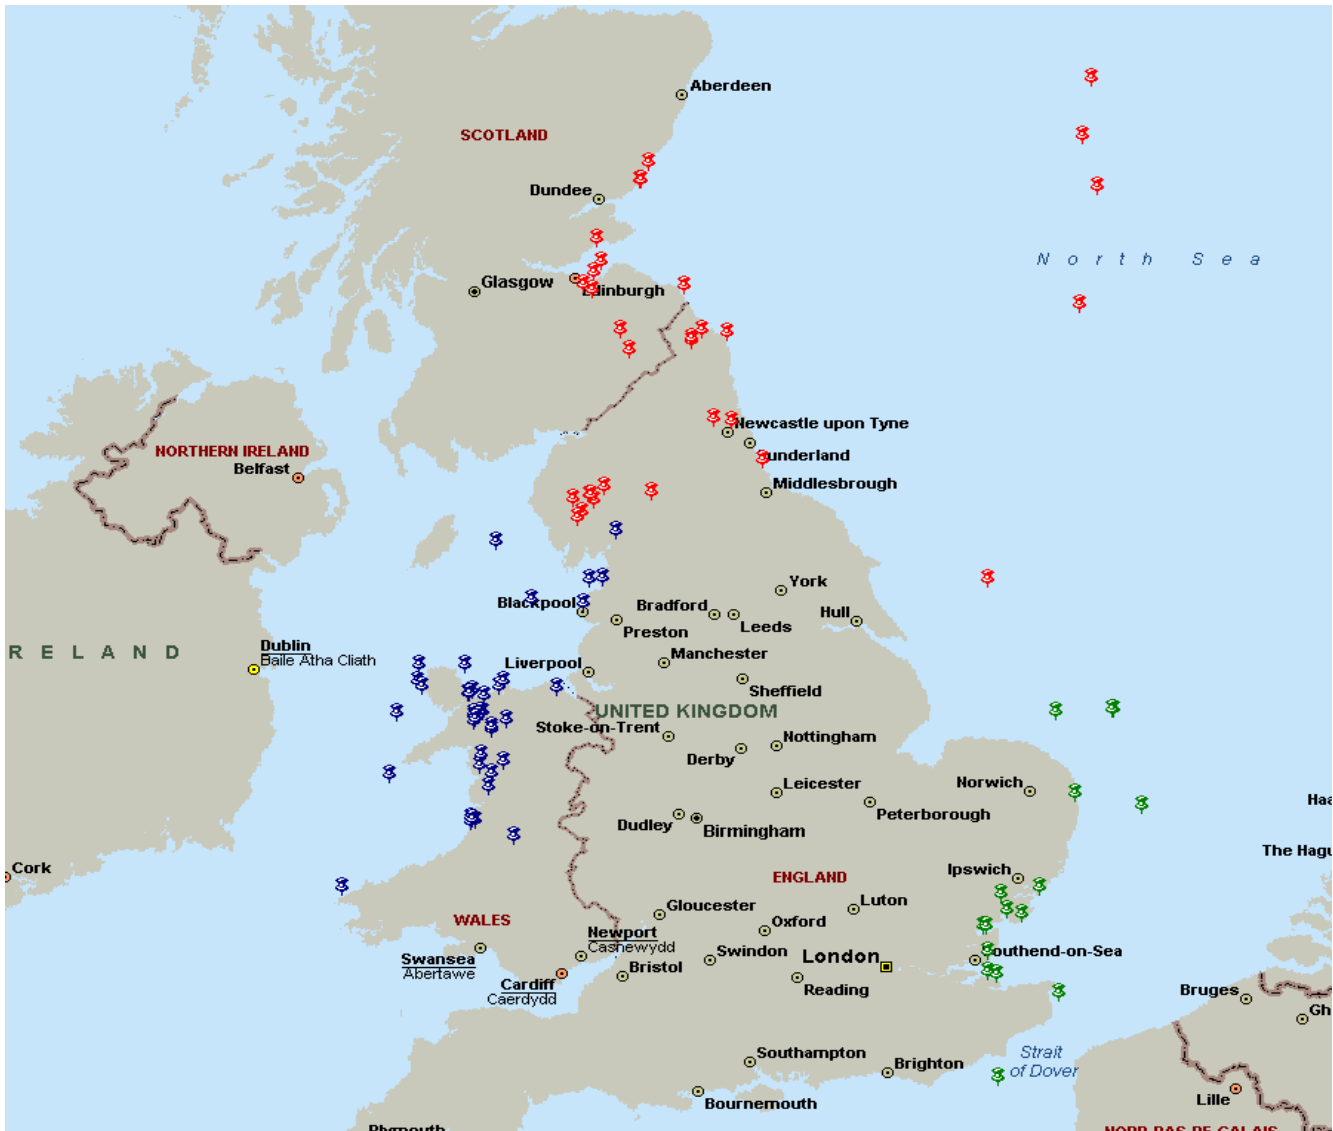

Although each unit will typically respond to callouts close to their base, they are sometimes required to travel further.

The consolidated aeronautical SAR coverage provided by the RAF, Royal Navy and MCA means that there are certain areas which are typically covered by the MCA (and as such are not represented on the following maps). In particular, the south coast of England is typically covered by the MCA units at Lee on Solent and Portland. Similarly, the Hebrides and Shetland Islands are typically covered by MCA units.

6. Search and Rescue definitions

| | | GROUPING |
|--------------------|--|-----------------|
| RESCUE | Transfer of distressed uninjured person(s) from a hostile to a benign environment. | Rescue-Type |
| MEDRESCUE | Transfer of sick or injured persons(s) from a hostile environment to a recognised medical facility (eg, hospital or chamber). | Rescue-Type |
| TRANSFER | Transfer of military personnel, or their families, on compassionate grounds. | Rescue-Type |
| MEDTRANSFER | Transfer of patients or organs between medical establishments at the request of a recognised Medical Authority, i.e. NHS Trust, Hospital or Ambulance Authority. | Rescue-Type |
| RECOVERY | Recovery of person(s) apparently dead. | Rescue-Type |
| SEARCH | Search for craft, person(s), etc which does not result in moving a person. | Search-Type |
| SEARCH – RESCUE | Search for craft, person(s), etc resulting in the rescue of an uninjured person. | Search-Type |
| SEARCH – MEDRESCUE | Search for craft, person(s), etc resulting in the rescue of a sick/injured casualty. | Search-Type |
| SEARCH – ASSIST | Search for craft, person(s), etc involving assistance to other SAR assets. | Search-Type |
| SEARCH – RECOVERY | Search for craft, person(s), etc resulting in the recovery of person(s) apparently dead. | Search-Type |
| SEARCH – ABORT | Search for craft, person(s), etc during which callout terminated due to eg malfunction or adverse weather. | Search-Type |
| TOP-COVER | On-scene assistance, e.g. communications relay, target identification, vectoring to target etc. for another rescue asset, or as cover for person(s) or vessel(s) in distress that does not result in further intervention. | Assistance-Type |
| PRECAUTION | Pre-positioning of a SAR helicopter to provide faster response to an anticipated or potential incident, eg, in response to an aircraft declaring a “MAYDAY” or a potential incident on a offshore installation. | Assistance-Type |
| ASSIST | Assistance to other SAR assets etc, such as moving SAR personnel or equipment (eg, mountain rescue teams, divers, pumps), shepherding of aircraft etc. | Assistance-Type |
| CIVIL AID | Military Aid to the Civil Community (eg fire control). | Assistance-Type |
| RECALLED | Asset recalled from incident whilst en route. | Other |
| NOT REQUIRED | Asset arrived on scene but no action required. | Other |
| ABORT | Callout terminated due to eg malfunction or adverse weather. | Other |
| FALSE ALARM | Unnecessary callout with good intent. | Other |
| HOAX | Unnecessary callout with malicious intent | Other |
