This poisonous, injurious weed is being allowed to seed, & the seeds are germinating & growing in our grass field on the East side of the roundabout. As it is poisonous to cattle we have to remove all plants we see, & have spent many hours this year removing plants & spraying emerging plants on our other fields. I gather you are responsible for some areas & Milton Keynes council for some. Please could you let me know what you propose to do about controlling this weed on the areas you are responsible for.
