

07 January 2015

Year: 2015 Week: 01

## In This Issue:

- Key Messages.
- Weekly summary.
- Total contacts.
- Syndromic indicators.
- Notes and caveats.
- Further information.
- Acknowledgements.

## Syndromic indicators at a glance:

Number of contacts and percentage of Read coded contacts.

## 1: Total out-of-hours contacts:

Daily total number of out-of-hours and unscheduled contacts and 7 day average (adjusted for bank holidays).

## Key messages

Data to: 04 January 2015

Consultations for acute respiratory infections decreased across all age groups during week 1 (figures 2 & 2a). Influenza-like illness consultations also decreased slightly (figure 3), however ILI consultations increased in the 45-64 years age group (figure 3a).

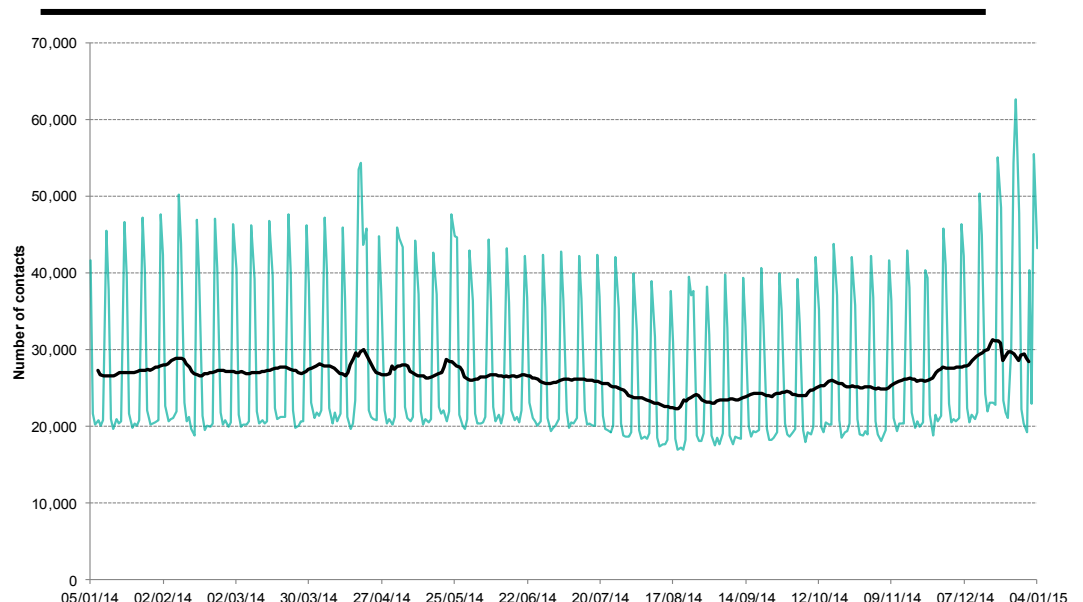

Difficulty breathing/wheeze/asthma increased in the 65+ years age group during week 1 whilst decreasing across other age groups (figure 5a).

A Cold Watch System operates in England from 1 November to 31 March each year. As part of the Public Health England Cold Weather Plan for England the PHE Real-time Syndromic Surveillance team will be monitoring the impact of cold weather on syndromic surveillance data during this period.

Cold weather alert level (current reporting week): **Levels 3/1** – Cold weather action / Winter preparedness and action  
<http://www.metoffice.gov.uk/weather/uk/coldweatheralert/>

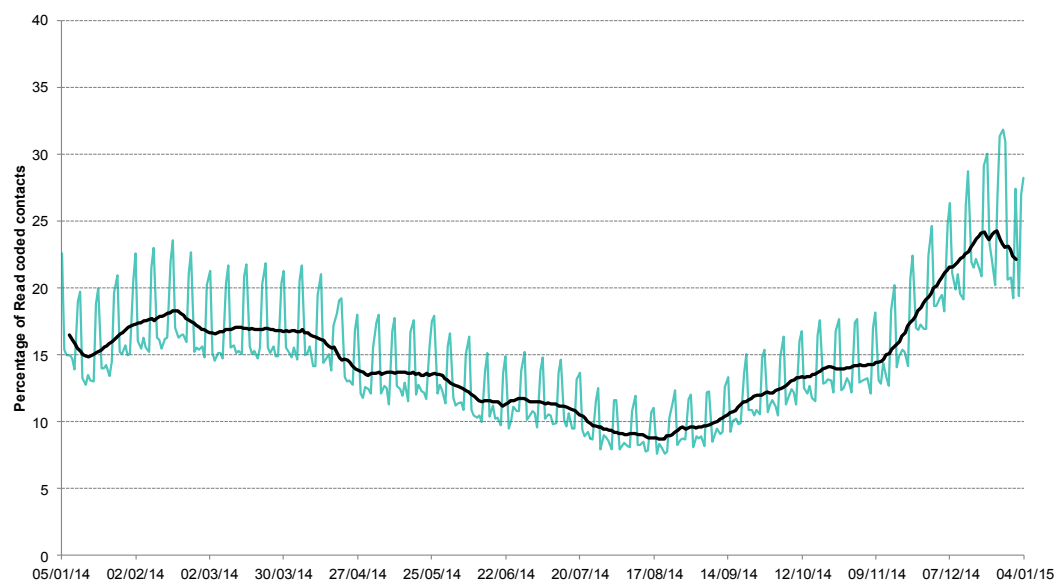

Key indicator	No. of contacts	% Week 01	% Week 52	Trend*
All OOH contacts, all causes	223,800			
Acute respiratory infection	30,356	24.98	28.77	↓
Influenza-like illness	827	0.68	0.71	↔
Bronchitis/bronchiolitis	624	0.51	0.71	↓
Difficulty breathing/wheeze/asthma	4,138	3.41	3.82	↔
Pharyngitis	161	0.13	0.14	↓
Gastroenteritis	5,335	4.39	4.16	↔
Diarrhoea	1,367	1.12	1.06	↔
Vomiting	1,866	1.54	1.37	↔
Myocardial infarction	1,201	0.99	0.80	↔

\*Trend: reports on the trend seen over previous weeks in the percentage of Read coded contacts.

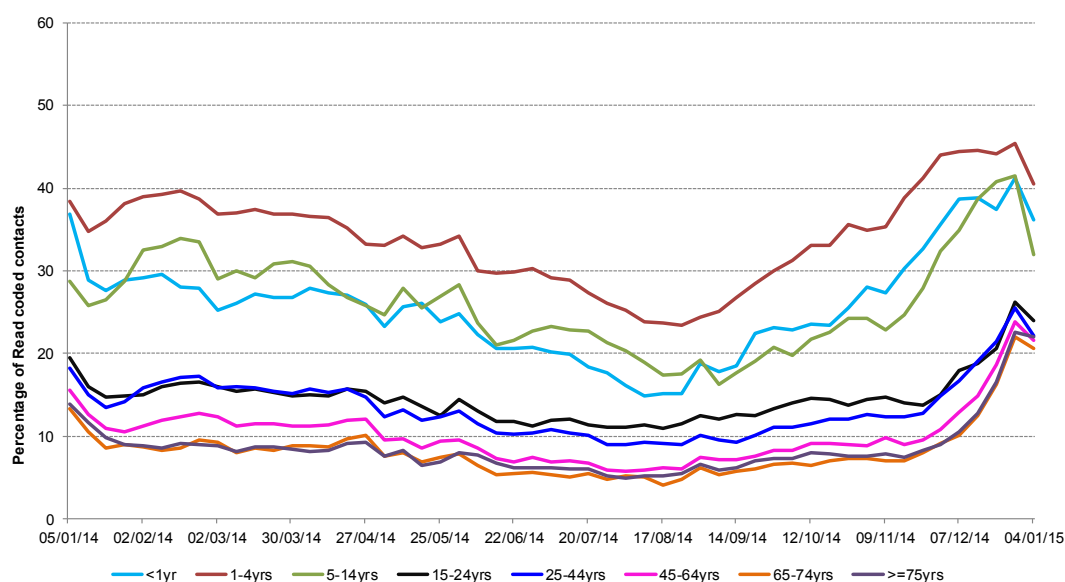

**2: Acute Respiratory Infection daily contacts.**

Shown as a percentage of the total contacts with a Read code and as a 7 day average\*.

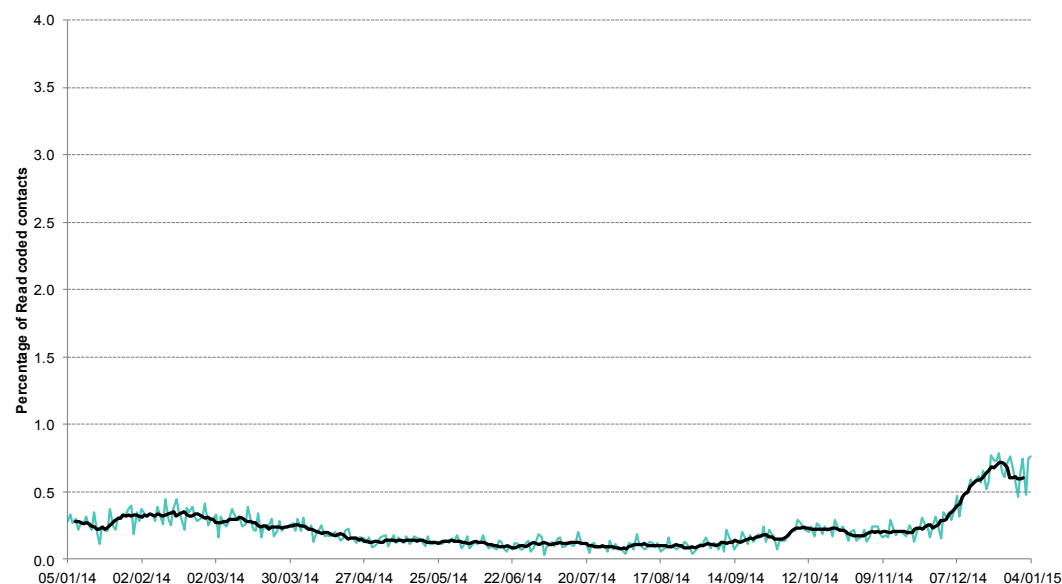

**2a: Acute respiratory infection daily contacts by age group.**

**3: Influenza-like illness daily contacts.**

Shown as a percentage of the total contacts with a Read code and as a 7 day average\*.

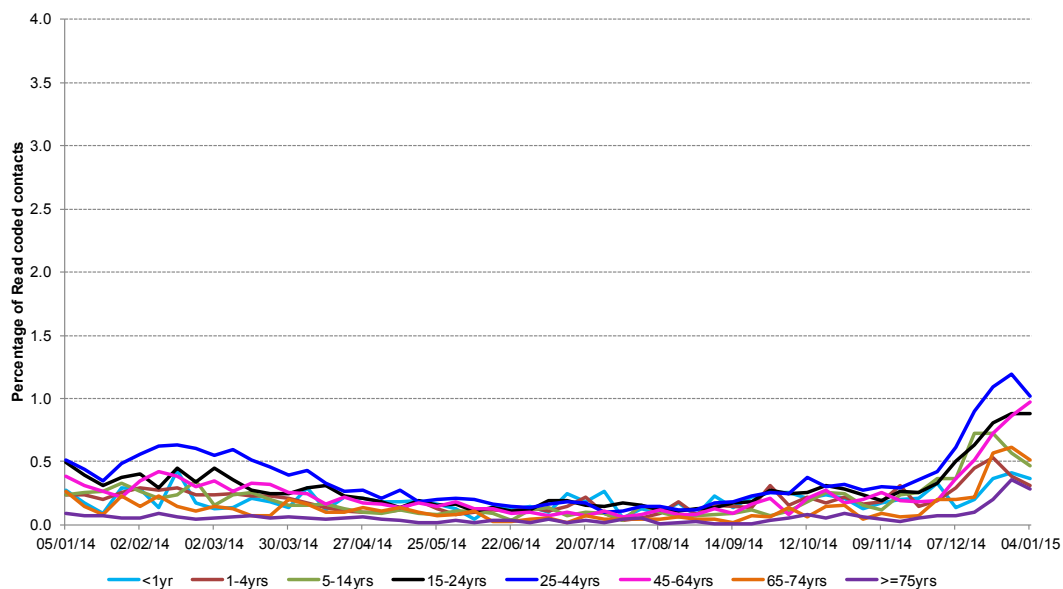

\*7-day moving average adjusted for bank holidays.

## Notes and caveats:

- This bulletin presents data from the Public Health England (PHE) GP Out-of-hours\Unscheduled Care Surveillance System (GP OOHSS).
- Fully anonymised data from GP out-of-hours (OOH) and unscheduled care service providers in England are being transferred to the PHE for analysis and interpretation by the PHE Real-time Syndromic Surveillance Team (ReSST).
- This new system supplements existing PHE syndromic surveillance systems by monitoring data on general practitioner consultations outside of routine surgery opening times (evenings, weekends and bank holidays) and unplanned contacts within NHS primary care.
- The key indicators presented within this bulletin are derived by grouping selected Read coded consultations.

## Further information:

---

The GP Out-of-Hours Surveillance System Bulletin can also be downloaded from the PHE Real-time Syndromic Surveillance website which also contains more information about syndromic surveillance:

<https://www.gov.uk/government/collections/syndromic-surveillance-systems-and-analyses>

## Acknowledgements:

---

We are grateful to Advanced Health and Care and the GP out-of-hours and unscheduled care service providers who have kindly agreed to participate in this system.
