

Rail passenger numbers and crowding on weekdays in major cities in England and Wales: 2014

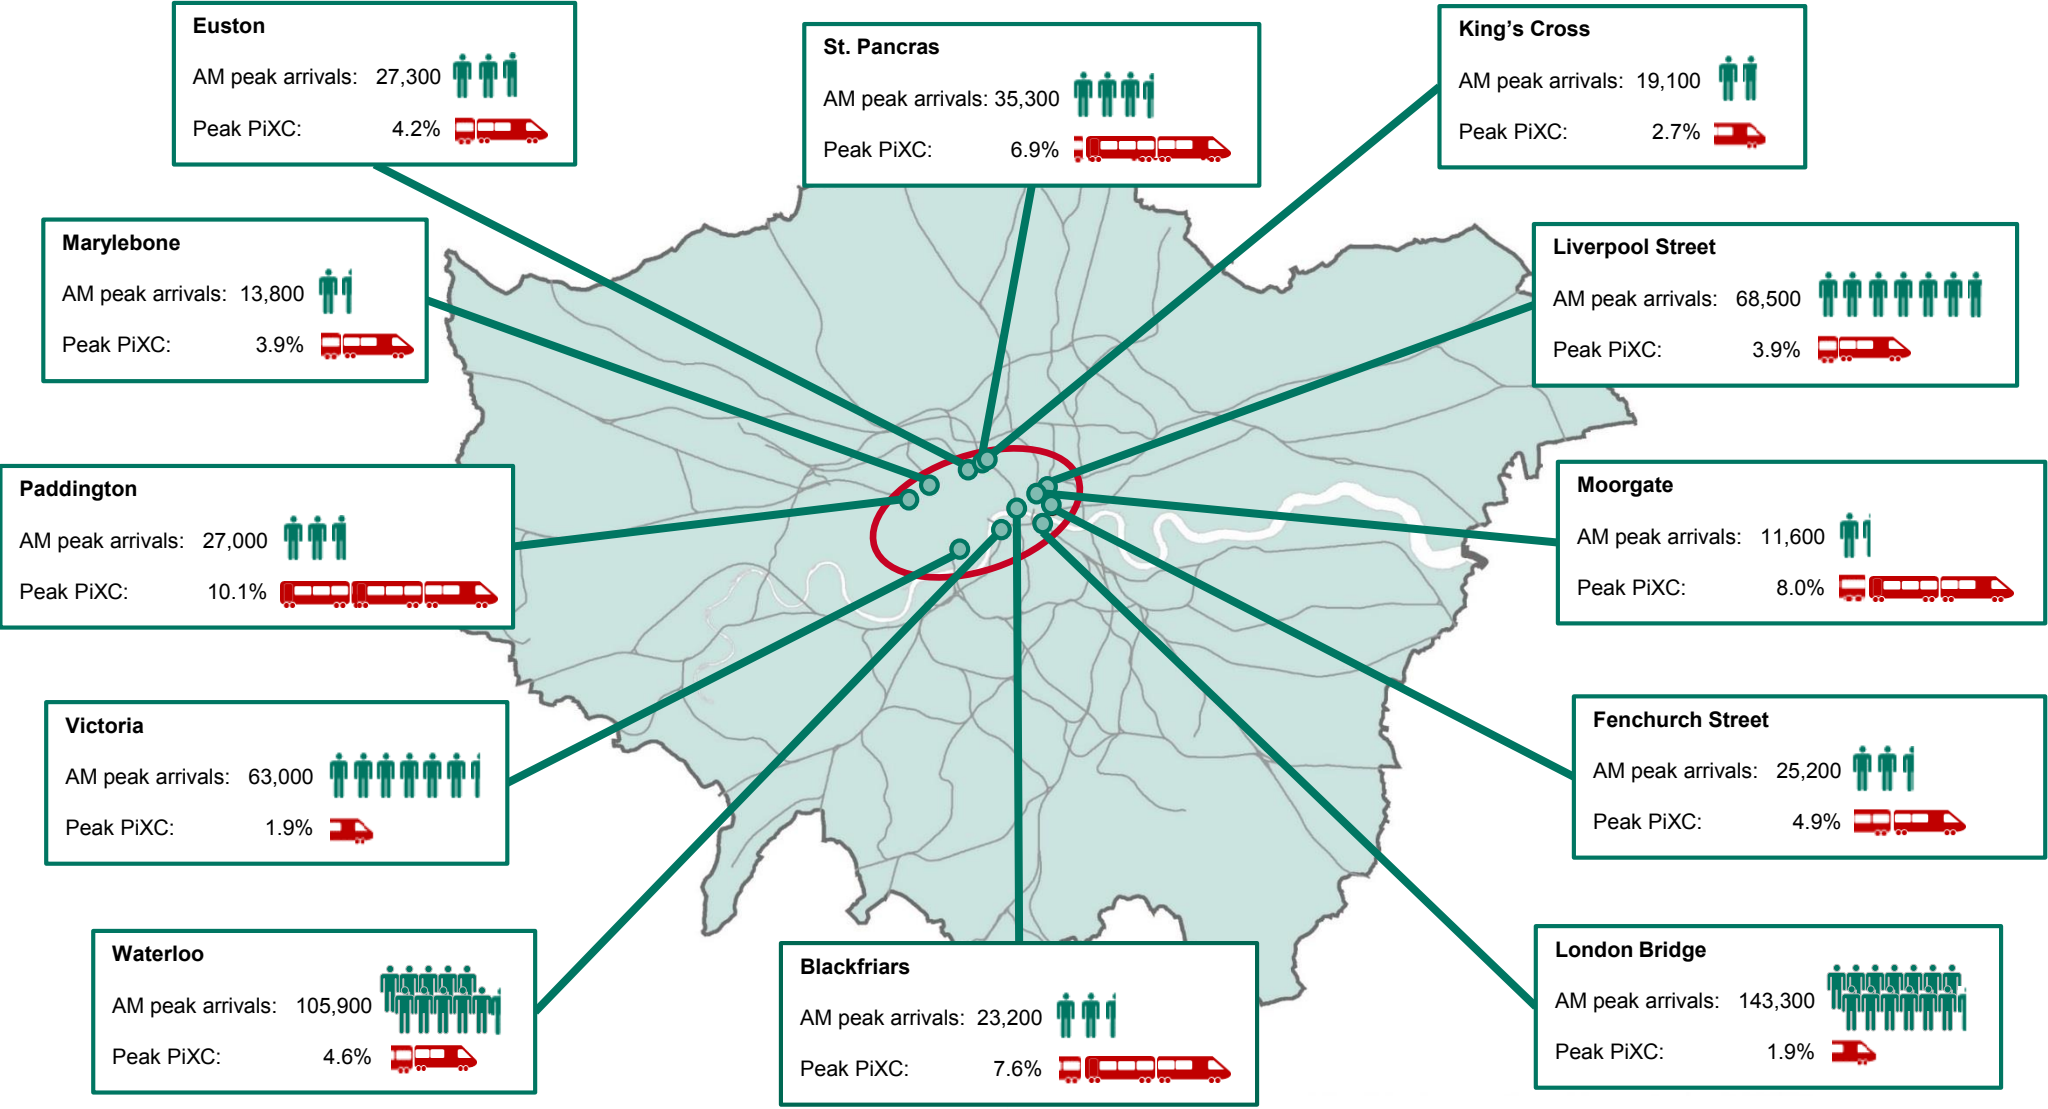

Key

AM peak arrivals is the number of passengers arriving into the city centre by national rail on a typical autumn weekday in 2014 during the three hour morning peak (7-10am).

Peak PiXC is the percentage of passengers in excess of capacity (PiXC) across the morning and afternoon peaks on a typical autumn weekday in 2014. It is the main measure of crowding in these statistics. A higher PiXC percentage represents a worse crowding level.

Rail passenger numbers and crowding on weekdays in London: 2014

Key

AM peak arrivals is the number of passengers arriving into the city centre by national rail on a typical autumn weekday in 2014 during the three hour morning peak (7-10am).

Peak PiXC is the percentage of passengers in excess of capacity (PiXC) across the morning and afternoon peaks on a typical autumn weekday in 2014. It is the main measure of crowding in these statistics. A higher PiXC percentage represents a worse crowding level.

 This represents central London (Zone 1 Travelcard area)
