## **Translations of the claims of European patent applications filed under section 78(7) – notification in the Patents Journal**

Translations relating to French or German-language European patents or applications may be filed at the IPO in two separate circumstances. First, a translation into English of the claims of a European patent application may be filed under section 78(7). Second, a corrected translation into English of a granted European Patent (UK) or the claims a European Patent application can, in certain circumstances, be filed under section 80(3).

Between October 2006 and January 2015 notifications relating to corrected translations filed under section 80(3) and translated claims filed under section 78(7) both appeared in the Journal under the heading **Corrected translation filed under section 80(3)**.

Throughout the time period given above the translations in question have correctly been placed on the relevant patent files and have been available by inspecting the files in our office or by requesting a copy of the files. Furthermore, for granted European Patents (UK), information relating to these translations has been correctly recorded on the Patent Register and has been available via our online file inspection service, Ipsum.

From now on notifications of translations will appear in the Journal under the correct heading.
