AUTHORIZED AMENDMENT

1. As highlighted in the table below, several elements of the 3000 Series (Air Traffic Management) Regulatory Articles (RA) and associated manuals have been updated as a result of:
 - a. The CAA coordinated approach to the introduction of the Standardized European Rules of the Air regulations to the UK Flight Information Region (FIR) (as detailed in CAA Director Safety and Regulatory Group safety notice issued on 5 Dec 14.
<http://www.caa.co.uk/docs/33/SafetyNotice2014010.pdf>)
 - b. The introduction of Class E airspace to the UK FIR in Nov 14;
 - c. Delays to the introduction of an amended version of JSP 426 Volume 3 Leaflet 02 - MOD

Regulations - Airfield Rescue and Fire-fighting Services and Fire and Rescue; and,

d. Requests for Change (RFCs) and procedural changes that have emerged in the intervening period of time between the ATM 3000 Series NAA 14/32 being published in Aug 14 and the original live date of 12 Jan 15.

2. RA 3263 (Aerodrome Classification) has been amended to address the provision of medical cover for flying operations. The changes made have resulted in a regulation that is less prescriptive and allows FLCs to assess the level of medical cover required at aerodromes.
3. The MADS has been updated to incorporate material that was removed from the MMATM as part of the 3000 Series (ATM) review, and also to address RFCs and typographical errors.
4. The Defence Aerodrome Manual (DAM) has been amended to take account of the 3000 Series (ATM) Review.
5. The RAs and Manuals affected by these changes are highlighted by red text in the table below. Please note that the issue numbers remain as notified in NAA14/32.
6. These changes become effective on 4 Feb 15, as detailed in Regulatory Notice MAA/RN/2015/01 (D Ops).
