# Domestic Consumption in England and Wales

## Headline tables

Headline tables at National level. Mean, median and number in sample for each property attribute and household characteristic for gas and electricity, 2005 to 2014. Data for 2005 to 2010 cover England only, data for 2011 to 2014 cover England and Wales. Attributes and characteristics covered are:

- Floor area
- Number of bedrooms
- Property type
- Property age
- Tenure
- Household income
- Number of adults
- Region
- Output Area Classification
- Rural Urban Classification
- Fuel poverty
- Index of multiple deprivation

## Additional tables

Tables at a National level which include headline statistics and details of distributions. Gas and electricity consumption relating to each of the variables outlined above for the headline tables. Data cover 2005 to 2014. Data for 2005 to 2010 cover England only, data for 2011 to 2014 cover England and Wales.

The following statistics are included:

- Mean
- Standard deviation
- 5th percentile
- 10th percentile
- Lower quartile
- Median
- Upper quartile
- 90th percentile
- 95th percentile

### Multiple attributes by region table

A single table with multiple property attributes in each row, covering gas and electricity consumption in 2014 for England and Wales:

- Region (country for Wales)
- Property type
- Property age
- Number of bedrooms
- Gas present
- Electricity profile (Standard or Economy 7)

Statistics included are:

- Number in sample
- Mean
- Upper quartile
- Median
- Lower quartile

### Local Authority tables 2014

Tables with mean and median gas and electricity consumption in 2014, for each Local authority within England and Wales. Number in sample is also included. Attributes and characteristics covered are:

- Floor area
- Number of bedrooms
- Property type
- Property age
- Tenure
- Household income
- Number

### NEED Table Creator

The NEED Table Creator provides users with the ability to create bespoke cross tabulations on consumption by property attributes and household characteristics, based on the data available from NEED. Two variables can be selected to be considered at once (e.g. property age and property type), with mean, median or number of observations shown in the table. There is also a choice of fuel (electricity or gas). The tool includes electricity and gas consumption data for each year from 2005 to 2014.

# Impact of measures in England and Wales

## Headline Tables

Impact of a single measure analysis includes cavity wall insulation, loft insulation, solid wall insulation and a condensing boiler installed in 2013. Impact of a combination of measures analysis includes combinations of the following measures installed: cavity wall insulation, loft insulation, solid wall insulation, condensing boiler and solar PVs.

Tables 1 and 2 include:

- Number in sample
- Median and mean percentage saving
- Median and mean kWh saving

Tables 3 and 4 include:

- Number in sample
- Percentage difference in gas consumption: mean, 5th percentile, lower quartile, median, upper quartile, 95th percentile

## Additional Tables

The following tables provide a breakdown of gas consumption savings (and electricity consumption savings for solar PV) by region, property attributes and household characteristics for each single and/or combination of energy efficiency measures considered in the report. The following variables are included in each table:

- Number in sample
- Percentage saving: mean, 5<sup>th</sup> percentile, lower quartile, median, upper quartile, 95<sup>th</sup> percentile
- Saving (kWh): mean, median

Attributes and characteristics covered are:

- Region

- Property age
- Property type
- Number of bedrooms
- Tenure
- Household income
- Number of adult occupants

# Scotland

## Headline tables

Headline tables for Scotland. Mean, median and number in sample for each property attribute and household characteristic for gas and electricity, 2011 to 2014. Attributes and characteristics covered are:

- Number of bedrooms
- Property type
- Property age
- Tenure
- Household income
- Number of adults

## Additional tables

Additional tables for Scotland which include headline statistics and details of distributions. Gas and electricity consumption relating to each of the variables outlined above for the Scotland headline tables. Data cover 2011 to 2014. The following statistics are included:

- Mean
- Standard deviation
- 5th percentile
- 10th percentile
- Lower quartile
- Median
- Upper quartile
- 90th percentile
- 95th percentile
