Syndromic Surveillance System: England

#### 30 September 2014

Year: 2014 Week: 39

### Key messages

Data to: 28 September 2014

Calls for cough continue to increase consistent with seasonally expected levels.

## Syndromic indicators at a glance:

Indicator	Current trend
Cold/flu	No trend
Fever	No trend
Cough	Increasing
Difficulty breathing	No trend
Diarrhoea	No trend
Vomiting	No trend
Eye problems	No trend

NHS Direct call data for the period 2010 to 2013 for comparable syndromes are used as the baseline. These data are included to illustrate the usual seasonal trend in indicators: rates for a specific indicator may be higher or lower than current rates collected from the 111 service due to differences in the services and care should be taken when comparing the two.

## Data summary:

Year	Week	Total calls
2014	39	176,867

## In This Issue:

## **Remote Health Advice**

30 September 2014	Year: 2014 Week: 39
Introduction to charts:	<ul> <li>Weekends and bank holidays are marked by vertical grey lines (bank holidays darker grey).</li> <li>A 7-day moving average (adjusted for bank holidays) is overlaid on the daily data reported in each chart, unless specified.</li> <li>Until sufficient NHS 111 data are available, historical baseline are presented using NHS Direct data for 2010 to 2013 for comparable syndromes overlaid on each chart to illustrate expected trends. The NHS Direct historical baseline for difficulty breathing is based on data for 2012 to 2013 only.</li> <li>For comparison, the baseline data are included using historical data from the NHS Direct 0845 telephone service. These data are included to illustrate seasonal trends in indicators: rates for a specific indicator may be higher or lower than current rates collected from the 111 service due to differences in the services and care should be taken when comparing the two.</li> <li>This new syndromic surveillance system is still under development and further analyses at PHE Centre level will be included in future bulletins.</li> </ul>
Notes and further information:	Further information about NHS 111 can be found at: http://www.nhs.uk/NHSEngland/AboutNHSservices/ Emergencyandurgentcareservices/Pages/NHS-111.aspx The Remote Health Advice Syndromic Surveillance bulletin can also be downloaded from the PHE Real-time Syndromic Surveillance website which also contains more information about syndromic surveillance: https://www.gov.uk/government/collections/syndromic-surveillance-systems- and-analyses
Acknowledgements:	We are grateful to NHS 111 and to HSCIC for their assistance and support in providing the anonymised call data that underpin the Remote Health Advice Syndromic Surveillance System.
