

Housing Benefit Speed of Processing Statistics

Quarterly

Data for Quarter 2 of 2016/17 (July 2016 to September 2016)

Published: 25 January 2017

Great Britain

Official Statistics

Housing Benefit is an income related benefit that is intended to help meet housing costs for rented accommodation. Speed of processing relates to the average time taken to process new claims and change of circumstances for this benefit. The average time is measured in calendar days, rounded to the nearest day.

Main stories

22 days to process new Housing Benefit claims in the second quarter of 2016/17.

Average Processing Time per Quarter

The average time taken to process new claims is fairly consistent over time. Processing time in the second quarter of 2016/17 is on average 1 day lower than in the same quarter of 2015/16.

9 days to process Change of Circumstance on existing Housing Benefit claims in the second quarter of 2016/17.

Average Processing Time per Quarter

The average speed of processing varies throughout the year, but is fairly consistent over time. Processing time in the second quarter of 2016/17 is on average 1 day lower than in the same quarter of 2015/16.

What you need to know

These statistics were released on 25 January 2017 according to the arrangements approved by the UK Statistics Authority.

This means that the [Official Statistics](#).

- meet identified user needs;
- are well explained and readily accessible;
- are produced according to sound methods; and
- are managed impartially and objectively in the public interest.

This release contains Official Statistics on Speed of Processing of Housing Benefit (HB) claims for quarter 2 of 2016/17.

The statistics show speed of processing of new claims and changes of circumstances. Volumes of claims, changes and the total days to process are included in supporting detailed tables.

Further information and detailed tables, including a breakdown by local authority, can be viewed at the [Housing Benefit Speed of Processing Collection Page](#).

The statistics are released quarterly in April, July, October and January and are sourced from data originally collected via administrative systems (Single Housing Benefit Extract).

Genuine variations between months can occur at a local authority level. For example, some of these are caused by time limited issues or localised changes in operational policy. Hence, figures for individual authorities should be interpreted with care.

From April 2013, [Universal Credit](#) (UC) was introduced and will replace Housing Benefit as it is rolled out. It is now available in all Jobcentre Plus offices to single claimants, and is being expanded across the country to include all claimant types via the Full Service. The roll out schedule for Full Service can be found [here](#).

New Housing Benefit claims are no longer accepted from working-age claimants in some UC areas. This has an impact on the Speed of Processing figures at the local authority level; the number of new claims will fall in these areas and the processing days for new claims may change as resources are adjusted in line with the new claim levels. The impact will be greater in areas where UC is more established, such as the North West, or in areas that have implemented the Full Service, which is taking claims from all claimant types. Due to this care should be taken when interpreting the data, particularly when comparing different local authorities.

The next release is planned to be in April 2017. This will contain data for quarter 3 of the 2016/17 financial year (October 2016 to December 2016).

Average Housing Benefit Speed of Processing

Average Processing Time per Quarter

The average time taken to process new HB claims in quarter 2 of 2016/17 is 22 calendar days. This is 1 day lower than it was in quarter 2 of 2015/16.

In quarter 2 there were 286 thousand new HB claims. This represents a decrease of 4 thousand (1.3%) since the last quarter and a decrease of 45 thousand (13.6%) since quarter 2 of 2015/16.

The average time taken to process change of circumstances to HB claims for quarter 2 of 2016/17 is 9 calendar days. This is 1 day lower than it was in quarter 2 of 2015/16.

For quarter 2 there were 2.99 million changes of circumstances to HB claims. This is a decrease of 162 thousand (5.1%) cases from quarter 2 of 2015/16.

There are decreases in processing time in Q4 each year that are explained by the decreases in February and March that are explained below.

Average Processing Time per Month

The average time taken to process new HB claims is: 22 calendar days for July; 22 calendar days for August and 23 calendar days for September.

In quarter 2 2016/17 there were 286 thousand new HB claims:

93 thousand in July
95 thousand in August
97 thousand in September

The average time taken to process change of circumstances to HB claims is: 9 calendar days for July; 9 calendar days for August and 9 calendar days for September.

At quarter 2 2016/17 there were 2.99 million changes of circumstances to HB claims:

0.99 million in July
0.99 million in August
1.02 million in September

The average time taken to process change of circumstances tends to decrease in February and/or March. This may be due to the increase of resources to deal with bulk change of circumstances, and often uprating activity, at the end of the financial year.

Please note: The monthly figures may not sum to the quarterly ones. Local authorities with one or more months of missing data are excluded from the quarterly total.

Where to find out more

The historical [Housing Benefit & Council Tax Benefit Claims Administration Quarterly Performance Data](#) which is available to 2007/08 are based on clerical returns made by individual local authorities. Breakdowns of new claims and changes in processing times are available historically, and the new claims processing times are broadly comparable over time. However, a change in definition for change of circumstances between 2007/08 and 2009/10 means that direct comparison of this element with Speed of Processing statistics is not meaningful.
