

Application for an environmental permit

Part RSR-C3 – Variation to a bespoke radioactive substances activity permit (nuclear site, open sources and radioactive waste)

Please read through this part of the form and the part RSR-C3 guidance notes before you fill it in.

It will take about 2 hours to fill in this form.

Fill in this part of the form, together with parts RSR-A and RSR-F, if you are applying to vary (change) the conditions or any other part of your permit, except those relating to on-site disposals of solid waste to land. If you want to vary (change) the conditions relating to on-site disposals of solid waste to land, fill in part RSR-C5.

You only need to give us details in this application for the parts of the permit that will be affected (for example, if you are adding a new radioactive substances activity or making changes to existing ones.)

For security reasons, do not refer to sealed sources on this part of the form. There is a separate part (RSR-C2) to vary permits for radioactive substances activities involving sealed sources.

1 About the permit

1a What is the permit number that this application relates to?

EPR/ZP3493SQ/V004

1b If you are applying for a chargeable variation and your current permit(s) was issued under RSA93, we will take this opportunity to update your permit to our new format and conditions (as set out in our 'How to Comply' guidance). This includes combining open source registrations and radioactive waste authorisations into a single permit. Please tell us if there is a particular reason why you think we should not do this.
