AUTHORIZED AMENDMENT

New capstone regulation for Reduced Vertical Separation Minimum (RVSM).

Growing demand to increase airspace capacity has resulted in the RVSM programme, and, in order to fully exploit airspace worldwide, there is a requirement to comply with the appropriate civil RVSM requirements. This capstone regulation codifies the responsibilities, process and authority for UK military registered Air Systems to achieve RVSM approval.

As new regulation, this RA should be read in entirety to ensure full understanding and the synchronization of subordinate orders.
