---	------------------------------	---------------------------------	-----------

**AUTHORIZED AMENDMENT**

Issue 3 comprises changes to Regulation, AMC and GM. The intent of the RA is unchanged. The aim is to embody routine updates and to improve:

- Clarity and concision of regulation, AMC and GM.
- Consistency with RA 5721 and RA 5722.
- Understanding of the RA and thus improved compliance.

The changes in scope relative to Issue 2 are those summarized in NPA-15-03. Additional changes resulting from the recent NPA process are as follows:

- SQEP criteria for the ISAA have been removed from AMC pending consultation (general guidance remains in GM).
- It is made clearer that OLM and ODR remain the benchmark (expressed in AMC) for meeting the Operational Loads and Usage Validation requirement. Alternative approaches still require AAMC.
