

FOI Release

Information released under the Freedom of Information Act

Title: Biological Systems

FOI.123.15-16

Date of release: 18 March 2016

Information request

Has your department conducted any studies in the use of plant life in the use of life support systems or oxygen recycling? If so, would you release this information to the general public?

Information released

We have now completed a search of our paper and electronic records and I can confirm that the Agency does not hold the information you have requested. The UK Space Agency has not conducted any studies in the use of plant life in the use of life support systems or oxygen recycling. This is because the Agency is responsible for all strategic decisions on the UK civil space programme and does not conduct studies.
