Subject: FW: WEEE stakeholders meeting- European Commission, DG ENV, 20 May 2015

Redacted

Attached is the draft Regulation setting out the Commission's draft implementing act for a methodology for calculating a WEEE generated target methodology and common EEE put on the market methodology. WEEE Directive Articles 7(5) and (6) refer. I would be grateful if you would send around your membership as you see fit **Redacted** – please send to the other industry bodies in the JTA). Selected European level stakeholders have been invited to a meeting in Brussels on 20 May to discuss. **Redacted** will represent BIS.

If you have any comment on the regulation or the methodology explained in the background document please submit to weee@bis.gsi.gov.uk. It would be helpful to have comments in sufficient time for us to consider them ahead of the Brussels meeting. But be warned the background doc is long and complex....

If you (or your members) belong to a European industry body it would be useful to have sight of any "position papers" they produce ahead of the meeting.

Regards
