

# Notice of variation and consolidation with introductory note

**The Environmental Permitting (England & Wales) Regulations 2010**

---

Viridor Waste Management Limited  
St Helens Electrical Recycling Facility  
Parr Industrial Estate  
Cornwall Street  
St Helens  
Merseyside  
WA9 1QW

**Variation application number**

EPR/AP3899VY/V005

**Permit number**

EPR/AP3899VY

# St Helens Electrical Recycling Facility

## Permit number EPR/AP3899VY

### Introductory note

#### **This introductory note does not form a part of the notice.**

Under the Environmental Permitting (England & Wales) Regulations 2010 (schedule 5, part 1, paragraph 19) a variation may comprise a consolidated permit reflecting the variations and a notice specifying the variations included in that consolidated permit.

Schedule 1 of the notice specifies the conditions that have been varied and schedule 2 comprises a consolidated permit which reflects the variations being made. All the conditions of the permit have been varied and are subject to the right of appeal.

The Industrial Emissions Directive (IED) was transposed in England and Wales by the Environmental Permitting (England and Wales) (Amendment) Regulations 2013 on 27 February 2013. This variation implements the changes brought about by the IED for “existing facilities operating newly prescribed activities” and completes the transition of this facility from a waste operation to an IED Installation.

The site operations consist of fridge recycling, WEEE recycling and Cathode ray tube (CRT) processing.

The site is already permitted as an installation for the CRT dismantling under the following:

Section 5.3 A(1)(a)(vi): Disposal or recovery of hazardous waste with a capacity exceeding 10 tonnes per day involving the following activity – recycling or reclamation of inorganic materials other than metals or metal compounds.

This Variation permits the following newly prescribed activities as installation activities:

1. Section 5.6 A(1)(a): Temporary storage of hazardous waste with a total capacity exceeding 50 tonnes pending any of the activities listed in Section 5.1, 5.2, 5.3
2. Section 5.4 A(1)(b)(iv): Recovery or a mix of recovery and disposal of non-hazardous waste with a capacity exceeding 75 tonnes per day (or 100 tonnes per day if the only waste treatment activity is anaerobic digestion by treatment in shredders of metal waste, including waste electrical and electronic equipment and end-of-life vehicles and their components
3. Section 5.3 A(1)(a)(ii): Disposal or recovery of hazardous waste with a capacity exceeding 10 tonnes per day involving physico-chemical treatment.

The facility is located at the following address: Parr Industrial Estate, Cornwall Street, St Helens, Merseyside, WA9 1QW.

The schedules specify the changes made to the permit.

The status log of a permit sets out the permitting history, including any changes to the permit reference number.
