Introductory note

This introductory note does not form a part of the notice.

Under the Environmental Permitting (England & Wales) Regulations 2010 (schedule 5, part 1, paragraph 19) a variation may comprise a consolidated permit reflecting the variations and a notice specifying the variations included in that consolidated permit.

Schedule 1 of the notice specifies the conditions that have been varied and schedule 2 comprises a consolidated permit which reflects the variations being made. All the conditions of the permit have been varied and are subject to the right of appeal.

The Industrial Emissions Directive (IED) was transposed in England and Wales by the Environmental Permitting (England and Wales)(Amendment) Regulations 2013 on 27 February 2013. This variation implements the changes brought about by the IED for "existing facilities operating newly prescribed activities".

Potter Logistics Limited are operating a storage, treatment and transfer facility for non-hazardous and hazardous wastes at Midland Distribution Centre, Kidderminster Road, Droitwich. The facility consists of six warehouses and site activities which include basic treatment and storage of waste materials in addition to the warehousing of products.

The activities undertaken at the facility include temporary storage of hazardous wastes for recovery, and treatment of hazardous wastes for recovery by repackaging and bulking up. These activities were listed within the previous permit as waste activities and within this variation have been varied to installation activities under the Environmental Permitting (England and Wales)(Amendment) Regulations 2013 Schedule 1 Part 2:

- Section 5.6 'Temporary storage of hazardous waste with a total capacity exceeding 50 tonnes pending any of the activities listed in Sections 5.1, 5.2 and 5.3', and
- Section 5.3 Part A(1) a) (iv) 'Disposal or recovery of hazardous waste with a capacity exceeding 10 tonnes per day involving repackaging prior to submission to any of the other activities listed in this Section or in Section 5.1'.

The schedules specify the changes made to the permit.

The status log of a permit sets out the permitting history, including any changes to the permit reference number.
