**Subject:** Duration of public consultation on the options for the operation of a Compliance Fee

Dear Redacted

I understand that it has been publically stated that there were several submissions for the operation of a Compliance Fee received by BIS.

Previously BIS have stated that the public consultation to consider these would be a minimum of 4 weeks.

Given the potential complexity of the submissions and importance of the fee mechanism to the operation of the UK WEEE system, the JTA asks that the consultation period provides sufficient time for preparing a detailed analysis and corresponding submission in respect of these alternative prospective schemes. To perform this analytical response the JTA suggests that the consultation period be a minimum of 6 weeks, although we would not object to this being extended further if BIS considers this appropriate.

Thank you for your consideration of this request.
