Dear [REDACTED],

Thank you for your email of 19th August 2015 requesting the following information:

Can you please provide the rollout plan (date/sites/time for rollout) for the deployment of the 20 Thales NG primary surveillance radars as part of the Project MARSHALL contract?

If there are additional primary surveillance radar or radar upgrades (either Thales or other providers) to be deployed under Project MARSHALL prior to 2025, can you please provide the rollout plan (date/sites/time for rollout) for these deployments?

Can you also provide the rollout plan (date/sites/time for rollout) for the deployment of the three Thales secondary surveillance radar mentioned by Justin Barratt?

I am treating your correspondence as a request for information under the Freedom of Information Act 2000 (FOIA) and as a follow on request to FOI2015/06390.

A search for the information has now been completed within the Ministry of Defence (MOD), and I can confirm that information in scope of your request is held.

The information in the table is subject to the following caveats:

(i) All of the dates and times in the table below are subject to change in accordance with the Marshall Contract, but they are correct as of 01/09/15.

(ii) The radars under Marshall are procured over a 22 year period, however, as with most contracts the Marshall contract contains termination provisions which means the contract with Aquila could be terminated at any stage during the 22 year contract period. This may mean the service is re-competed. There are also periods during the contract period where the Authority could possibly re-compete the services (the current contractor is entitled to participate in any re-competition).
