

FOI Release
Information released under the Freedom of Information Act

Title: Trade marks and designs registered in the UK

Date of release: 18 April 2016

Information request:

I would like to know how many trademarks and designs are currently registered at the UK IPO.

Information released:

In reply to your information request, the number of design registrations (correct at 31 December 2015) was 43,110. It would take us a few days to provide the number to date if that is what you require.

The total number of trade marks registered, including both UK domestic registrations and marks protected in the UK under the Madrid Protocol was 589,559 (in a total of 1,240,485 classes of goods and services). Again that figure was correct at the end of December.

Please let me know if those figures are not recent enough for your purposes. These are the figures we have just submitted to WIPO, but they have probably not published them yet on their website. If you are not already aware of it, the WIPO statistics website contains a variety of data from various countries, available at: <http://www.wipo.int/ipstats/en/> .
