

## Monthly publication of Official Statistics on the incidence and prevalence of tuberculosis (TB) in Cattle in Great Britain – to end January 2016

These statistics and accompanying datasets were released on Wednesday 13 April 2016 at 9:30. The next set of monthly data will be published on Wednesday 11 May 2016 the next quarterly statistical notice which includes headline measures and charts will be published on Wednesday 15 June 2016.

**Short term changes in these statistics should be considered in the context of long term trends.**

Key tables summarising data to January 2016

**Table 1: New herd incidents<sup>1</sup> and incidents where OTF status has been withdrawn<sup>2</sup>**

	New herd incidents			New herd incidents where OTF status is withdrawn (OTFW)		
	12 months to end Jan 2015	12 months to end Jan 2016	Year-on-year change	12 months to end Jan 2015	12 months to end Jan 2016	Year-on-year change
England	3,757	3,967	6%	2,753	2,822	3%
High risk area	3,293	3,456	5%	2,532	2,584	2%
Edge area	347	351	1%	183	187	2%
Low risk area	117	160	37%	38	51	34%
Scotland	46	43	-7%	15	10	-33%
Wales	863	792	-8%	541	432	-20%

**Table 2: Herds not officially TB free at the end of the period due to a bovine TB incident (non-OTF herds)<sup>3</sup>**

	12 months to end Jan 2015	12 months to end Jan 2016	Year-on-year change
England	3,042	3,236	6%
High risk area	2,770	2,908	5%
Edge area	217	253	17%
Low risk area	55	75	36%
Scotland	27	24	-11%
Wales	659	610	-7%

**Table 3: Total animals slaughtered<sup>4</sup>**

	12 months to end Jan 2015	12 months to end Jan 2016	Year-on-year change
England	26,453	28,025	6%
High risk area	22,730	24,629	8%
Edge area	3,037	2,747	-10%
Low risk area	686	649	-5%
Scotland	232	134	-42%
Wales	6,399	8,246	29%

## Footnotes

1. Herds which were not officially TB-free (i.e. herds with an open breakdown with OTF status suspended or withdrawn) due to a TB incident, at the end of the period shown.
2. Herds which were previously OTF but either had cattle that reacted to a tuberculin test or had a tuberculous animal disclosed by routine meat inspection at slaughter, during the period shown.
3. New herd incidents where OTF status was withdrawn from the herd.
4. Reactors slaughtered + inconclusive reactors slaughtered + direct contacts slaughtered.

## Further information

The publication 'quarterly headline statistics on TB in cattle in GB' contains charts on trends in TB as well as data tables, detailed commentary and background information. This and the related datasets can be found at <https://www.gov.uk/government/publications/incidence-of-tuberculosis-tb-in-cattle-in-great-britain>

A wide range of other statistics is available on the internet at:

<https://www.gov.uk/government/organisations/department-for-environment-food-rural-affairs/about/statistics>

## Data

These statistics are obtained from the Animal and Plant Health Agency (APHA) work management IT support system (Sam), used for the administration of TB testing in GB. They are a snapshot of the position on the date on which the data were extracted. These statistics may be subject to regular revision until all test results are available. In particular figures from 2014 onwards will be subject to further revision as test and incident records are completed.

## Methodology

For a description of the data sources and methodology used in the calculation of the TB statistics, together with notes on data revisions policy etc., please refer to the 'Background and Methodology' annex document at: [https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/483748/bovinetb-annex-09dec15a.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/483748/bovinetb-annex-09dec15a.pdf)
