RE: Re-determination for Llanbrynmair and Carnedd Wen Wind Farms

Dear Sir

I understand that both of the above windfarms are being re-determined as to their applications for development in Montgomeryshire in the future. Please can I object to both on the grounds already raised by the objectors in the previous round in July.

The impacts are not only to the local roads and connections and amenities, but to wildlife which is being continually pushed to the edges of everywhere, and to those who live and love these lands. These two windfarms will have huge accumulative impact across our hills and then the lines to transmit from one windfarm to another will criss cross between sites, together with a proposed even bigger line out of Montgomeryshire to Shropshire.

I have lived in Montgomeryshire all my life – these hills and valleys are part of who we are and what we “offer” to the tourists who visit us. The peace of our countryside is transmitted in what we see, hear and feel in the environment around us. We are the people who will be left with all of this destruction to our landscape long after the developers have finished building - we must surely have a say?
