

Notice of variation and consolidation with introductory note

The Environmental Permitting (England & Wales) Regulations 2016

Moy Park Limited
Alkington Poultry Unit
Bentley Cottage Farm
Alkington
Ashbourne
Derbyshire
DE6 3DJ

Variation application number

EPR/BP3434DM/V002

Permit number

EPR/BP3434DM

Alkmonton Poultry Unit

Permit number EPR/BP3434DM

Introductory note

This introductory note does not form a part of the notice.

Under the Environmental Permitting (England & Wales) Regulations 2016 (schedule 5, part 1, paragraph 19) a variation may comprise a consolidated permit reflecting the variations and a notice specifying the variations included in that consolidated permit.

Schedule 1 of the notice specifies the conditions that have been varied and schedule 2 comprises a consolidated permit which reflects the variations being made. All the conditions of the permit have been varied and are subject to the right of appeal.

This variation authorises the following changes:

- An increase in bird places from 302,000 to 365,000 broilers;
- The addition of a sixth broiler house to accommodate the additional bird places;
- The addition of an eleventh biomass boiler with a thermal input of 0.531 MWth to heat the new broiler house;
- An extension of the permit boundary to accommodate the new broiler house and biomass boiler.

New housing introduced with this variation complies with BAT conclusions as defined in the Intensive Farming BAT conclusion document dated 20/02/17.

The rest of the installation is unchanged and continues to be operated as follows.

Alkmonton Poultry Unit is situated approximately 7.2 kilometres south of the town of Ashbourne in Derbyshire. The installation is approximately centred on National Grid Reference SK 18211 39055.

The installation is operated by Moy Park Limited and comprises six poultry houses, numbered one to six, which raise broiler chickens for meat production. The six poultry houses provide a combined capacity for 365,000 bird places. Broilers are brought onto the farm at one day old chicks and are grown for approximately 37 days.

The poultry sheds at the installation are designed with a high velocity roof ventilation system, they also have gable end fans, although these are operated infrequently to maintain temperature, typically in the summer months.

At the end of the growing cycle, all birds are removed from the houses and the litter is taken away from the site in covered vehicles for use at a power station as a fuel source.

The sheds are cleaned out at the end of the production cycle. The sheds are accessed via a concrete surfaced yard. Contaminated water from the wash out of poultry houses is channelled to underground, via diverter valves, to collection tanks close to the houses to await export off site, when it is spread to land owned by a third party.

Roof water from the six poultry houses and lightly contaminated yard water drains to French drains present within the installation boundary.

The land around the site is predominantly agricultural. Associated food is stored on the installation in sealed food bins. Mortalities are collected three times daily and stored in a secure, vermin-proof container on site for removal by a licenced waste carrier. At the end of the cycle the houses are depopulated, washed and disinfected ready for the next cycle.

There are no Special Areas of Conservation (SAC), Special Protection Areas (SPA) or Ramsars within 10km of the installation. Nor are there any Sites of Special Scientific Interest (SSSI) within 5km of the installation. There are 6 nature conservation sites within 2km comprising of 3 Local Wildlife Sites (LWS) and

3 ancient woodlands. An assessment of the impact of emissions has been carried out and the installation is considered to have no adverse effect on the nature conservation sites.

Emissions from this installation may include releases of ammonia and dust to air, releases to surface water and land as well as releases of odour and noise. The operator has odour, noise and dust management plans in place to minimise risk of pollution from the installation.

This permit implements the requirements of the European Union Directive on Industrial Emissions.

The schedules specify the changes made to the permit.

The status log of a permit sets out the permitting history, including any changes to the permit reference number.

Status log of the permit		
Description	Date	Comments
Application HP3834ML (EPR/HP3834ML/A001)	Duly made 25/01/07	Application for a poultry installation environmental permit.
Permit determined EPR/HP3834ML	22/10/07	Permit issued to Moy Park Limited.
Transfer application EPR/ZP3335KF/T001	Duly Made 03/08/09	Application for a full transfer.
Transfer issued EPR/ZP3335KF	16/10/09	Permit transferred in full to Overbrook Farm Limited.
Variation application EPR/ZP3335KF/V002	Duly made 30/07/10	Application to increase stock numbers to 172,000 places.
Additional information received	08/09/10	Site plan, odour and numbers.
Variation issued EPR/ZP3335KF	29/09/10	Variation issued to Overbrook Farm Limited.
Variation application EPR/ZP3335KF/V003	Duly made 13/06/13	Application to add 3 biomass boilers.
Variation and consolidation issued EPR/ZP3335KF	15/08/13	Variation and consolidation issued to Overbrook Farm Limited.
Variation application EPR/ZP3335KF/V004	Duly made 30/04/14	Application to increase place numbers to 240,000, add an additional poultry house, add an additional biomass boiler and change the site's permit boundary.
Request for further information	Received 16/05/14	Revised H1 and EMS summary, ash disposal, confirm RHI and fuel type.
Variation determined EPR/ZP3335KF	16/06/14	Varied permit issued to Overbrook Farm Limited.
Variation application EPR/ZP3335KF/V005	Duly Made 18/11/14	Application to vary the permit to include an additional four 221 kW biomass boilers.
Variation determined EPR/ZP3335KF	18/12/14	Varied permit issued.
Variation application EPR/ZP3335KF/V006	Duly Made 20/04/15	Application to increase place numbers to 302,000, add two biomass boilers and also increase the installation boundary.
Variation determined EPR/ZP3335KF	18/05/15	Varied permit issued.
Application EPR/BP3434DM/T001 (full transfer of permit EPR/ZP3335KF)	Duly made 12/07/16	Full transfer from Overbrook Farm Limited to Moy Park Limited.

Status log of the permit		
Description	Date	Comments
Transfer determined EPR/BP3434DM	05/09/16	Full transfer completed.
Application EPR/BP3434DM/V002 (variation and consolidation)	Duly made 03/10/17	Application to vary the permit to increase bird numbers to 365,000; add an additional poultry house; extend the permit boundary accordingly and add one biomass boiler to the permit.
Additional information received	15/12/17	Confirmation that the farm will be operated in accordance with BAT conclusions, revised site plan to show the extended permit boundary and updated Odour Management Plan.
Variation determined EPR/BP3434DM/V002 (Billing reference: ZP3333JX)	21/12/17	Varied permit issued.

End of introductory note

Notice of variation and consolidation

The Environmental Permitting (England and Wales) Regulations 2016

The Environment Agency in exercise of its powers under regulation 20 of the Environmental Permitting (England and Wales) Regulations 2016 varies and consolidates

Permit number

EPR/BP3434DM

Issued to

Moy Park Limited (“the operator”)

whose registered office is

**The Food Park
39 Seagoe Industrial Estate
Craigavon
BT63 5QE**

company registration number NI004842

to operate an installation at

**Alkmonton Poultry Unit
Bentley Cottage Farm
Alkmonton
Ashbourne
Derbyshire
DE6 3DJ**

to the extent set out in the schedules.

The notice shall take effect from 21/12/2017

Name	Date
Simon Hunt	21/12/2017

Authorised on behalf of the Environment Agency

Schedule 1

All conditions have been varied by the consolidated permit EPR/BP3434DM as a result of the application made by the operator.

Schedule 2 – consolidated permit

Consolidated permit issued as a separate document.

Permit

The Environmental Permitting (England and Wales) Regulations 2016

Permit number

EPR/BP3434DM

This is the consolidated permit referred to in the variation and consolidation notice for application EPR/BP3434DM/V002 authorising,

Moy Park Limited (“the operator”),

whose registered office is

The Food Park

39 Seagoe Industrial Estate

Craigavon

BT63 5QE

company registration number NI004842

to operate an installation at

Alkmonton Poultry Unit

Bentley Cottage Farm

Alkmonton

Ashbourne

Derbyshire

DE6 3DJ

to the extent authorised by and subject to the conditions of this permit.

Name	Date
Simon Hunt	21/12/2017

Authorised on behalf of the Environment Agency

Conditions

1 Management

1.1 General management

- 1.1.1 The operator shall manage and operate the activities:
- (a) in accordance with a written management system that identifies and minimises risks of pollution, so far as is reasonably practicable, including those risks arising from operations, maintenance, accidents, incidents, non-conformances, closure and those drawn to the attention of the operator as a result of complaints; and
 - (b) using sufficient competent persons and resources.
- 1.1.2 Records demonstrating compliance with condition 1.1.1 shall be maintained.
- 1.1.3 Any person having duties that are or may be affected by the matters set out in this permit shall have convenient access to a copy of the permit.

1.2 Energy efficiency

- 1.2.1 The operator shall:
- (a) take appropriate measures to ensure that energy is used efficiently in the activities;
 - (b) maintain records of fuel and energy consumption used in the activities.

1.3 Efficient use of raw materials

- 1.3.1 The operator shall:
- (a) take appropriate measures to ensure that raw materials and water are used efficiently in the activities; and
 - (b) maintain records of raw materials and water used in the activities.

1.4 Avoidance, recovery and disposal of wastes produced by the activities

- 1.4.1 The operator shall take appropriate measures to ensure that the waste hierarchy referred to in Article 4 of the Waste Framework Directive is applied to the generation of waste by the activities and that;
- (a) any waste generated by the activities is treated in accordance with the waste hierarchy referred to in Article 4 of the Waste Framework Directive; and
 - (b) where disposal is necessary, this is undertaken in a manner which minimises its impact on the environment.

2 Operations

2.1 Permitted activities

- 2.1.1 The only activity (*activities*) authorised by the permit is (*are*) the activity (*activities*) specified in schedule 1 table S1.1 (the “activities”).

2.2 The site

2.2.1 The activities shall not extend beyond the site, being the land shown edged in green on the site plan at schedule 7 to this permit.

2.3 Operating techniques

2.3.1 The activities shall, subject to the conditions of this permit, be operated using the techniques and in the manner described in the documentation specified in schedule 1, table S1.2, unless otherwise agreed in writing by the Environment Agency.

2.3.2 If notified by the Environment Agency that the activities are giving rise to pollution, the operator shall submit to the Environment Agency for approval within the period specified, a revision of any plan or other documentation ("plan") specified in schedule 1, table S1.2 or otherwise required under this permit which identifies and minimises the risks of pollution relevant to that plan, and shall implement the approved revised plan in place of the original from the date of approval, unless otherwise agreed in writing by the Environment Agency.

2.3.3 The operator shall maintain and implement a system to record the number of animal places and animal movements.

2.3.4 The operator shall ensure that a diet formulation and nutritional strategy is used to reduce the total nitrogen and total phosphorous excreted.

2.3.5 The operator shall take appropriate measures in disposal or recovery of solid manure or slurry to prevent, or where this is not practicable, to minimise pollution.

2.3.6 Any raw materials or fuels listed in schedule 2 table S2.1 shall conform to the specifications set out in that table.

2.3.7 The operator shall ensure that where waste produced by the activities is sent to a relevant waste operation, that operation is provided with the following information, prior to the receipt of the waste:

- (a) the nature of the process producing the waste;
- (b) the composition of the waste;
- (c) the handling requirements of the waste;
- (d) the hazardous property associated with the waste, if applicable; and
- (e) the waste code of the waste.

3 Emissions and monitoring

3.1 Emissions to water, air or land

3.1.1 There shall be no point source emissions to water, air or land except from the sources and emission points specified in table S3.1 and S3.2.

3.1.2 The limits given in schedule 3 shall not be exceeded.

3.1.3 Periodic monitoring shall be carried out at least once every 5 years for groundwater and 10 years for soil, unless such monitoring is based on a systematic appraisal of the risk of contamination.

3.2 Emissions of substances not controlled by emission limits

- 3.2.1 Emissions of substances not controlled by emission limits shall not cause pollution. The operator shall not be taken to have breached this condition if appropriate measures, including, but not limited to, those specified in any approved emissions management plan, have been taken to prevent or where that is not practicable, to minimise, those emissions.
- 3.2.2 The operator shall:
- (a) if notified by the Environment Agency that the activities are giving rise to pollution, submit to the Environment Agency for approval within the period specified, an emissions management plan which identifies and minimises the risks of pollution from emissions of substances not controlled by emission limits; and
 - (b) implement the approved emissions management plan, from the date of approval, unless otherwise agreed in writing by the Environment Agency.
- 3.2.3 All liquids in containers, whose emission to water or land could cause pollution, shall be provided with secondary containment, unless the operator has used other appropriate measures to prevent or where that is not practicable, to minimise, leakage and spillage from the primary container.

3.3 Odour

- 3.3.1 Emissions from the activities shall be free from odour at levels likely to cause pollution outside the site, as perceived by an authorised officer of the Environment Agency, unless the operator has used appropriate measures, including, but not limited to, those specified in any approved odour management plan, to prevent or where that is not practicable to minimise the odour.

3.4 Noise and vibration

- 3.4.1 Emissions from the activities shall be free from noise and vibration at levels likely to cause pollution outside the site, as perceived by an authorised officer of the Environment Agency, unless the operator has used appropriate measures, including, but not limited to, those specified in any approved noise and vibration management plan to prevent or where that is not practicable to minimise the noise and vibration.

3.5 Monitoring

- 3.5.1 The operator shall, unless otherwise agreed in writing by the Environment Agency, undertake the monitoring specified in the following tables in schedule 3 to this permit:
- (a) point source emissions specified in tables S3.1, and S3.2,
 - (b) process monitoring specified in table S3.3.
- 3.5.2 The operator shall maintain records of all monitoring required by this permit including records of the taking and analysis of samples, instrument measurements (periodic and continual), calibrations, examinations, tests and surveys and any assessment or evaluation made on the basis of such data.
- 3.5.3 Monitoring equipment, techniques, personnel and organisations employed for the emissions monitoring programme and the environmental or other monitoring specified in condition 3.5.1 shall have either MCERTS certification or MCERTS accreditation (as appropriate), where available, unless otherwise agreed in writing by the Environment Agency.

3.6 Pests

- 3.6.1 The activities shall not give rise to the presence of pests which are likely to cause pollution, hazard or annoyance outside the boundary of the site. The operator shall not be taken to have breached this condition if appropriate measures, including, but not limited to, those specified in any approved pests

management plan, have been taken to prevent or where that is not practicable, to minimise the presence of pests on the site.

3.6.2 The operator shall:

- (a) if notified by the Environment Agency, submit to the Environment Agency for approval within the period specified, a pests management plan which identifies and minimises risks of pollution, hazard or annoyance from pests; and
- (b) implement the pests management plan, from the date of approval, unless otherwise agreed in writing by the Environment Agency.

4 Information

4.1 Records

4.1.1 All records required to be made by schedules 3, 4 and 5 to this permit shall:

- (a) be legible;
- (b) be made as soon as reasonably practicable;
- (c) if amended, be amended in such a way that the original and any subsequent amendments remain legible, or are capable of retrieval; and
- (d) be retained, unless otherwise agreed in writing by the Environment Agency, for at least 6 years from the date when the records were made, or in the case of the following records until permit surrender:
 - (i) off-site environmental effects; and
 - (ii) matters which affect the condition of the land and groundwater.

4.1.2 The operator shall maintain convenient access, in either electronic or hard copy, to the records, plans and management system required to be maintained by this permit.

4.2 Reporting

4.2.1 The operator shall send all reports and notifications required by the permit to the Environment Agency using the contact details supplied in writing by the Environment Agency.

4.2.2 For the following activities referenced in schedule 1, table S1.1 a report or reports on the performance of the activities over the previous year shall be submitted to the Environment Agency by 31 January (or other date agreed in writing by the Environment Agency) a year. The report(s) shall include as a minimum:

- (a) a review of the results of the monitoring and assessment carried out in accordance with the permit including an interpretive review of that data.

4.2.3 Within 28 days of the end of the reporting period the operator shall, unless otherwise agreed in writing by the Environment Agency, submit reports of the monitoring and assessment carried out in accordance with the conditions of this permit, as follows:

- (a) in respect of the parameters and emission points specified in schedule 4 table S4.1;
- (b) for the reporting periods specified in schedule 4 table S4.1 and using the forms specified in schedule 4 table S4.2; and
- (c) giving the information from such results and assessments as may be required by the forms specified in those tables.

The operator shall, unless notice under this condition has been served within the preceding four years, submit to the Environment Agency, within six months of receipt of a written notice, a report assessing whether there are other appropriate measures that could be taken to prevent, or where that is not practicable, to minimise pollution.

4.3 Notifications

4.3.1 In the event:

- (a) that the operation of the activities gives rise to an incident or accident which significantly affects or may significantly affect the environment, the operator must immediately :—
 - (i) inform the Environment Agency,
 - (ii) take the measures necessary to limit the environmental consequences of such an incident or accident, and
 - (iii) take the measures necessary to prevent further possible incidents or accidents; and
- (b) of a breach of any permit condition the operator must immediately :—
 - (i) inform the Environment Agency, and
 - (ii) take the measures necessary to ensure that compliance is restored within the shortest possible time;
- (c) of a breach of permit condition which poses an immediate danger to human health or threatens to cause an immediate significant adverse effect on the environment, the operator must immediately suspend the operation of the activities or the relevant part of it until compliance with the permit conditions has been restored.

4.3.2 Any information provided under condition 4.3.1 (a)(i), or 4.3.1 (b)(i) where the information relates to the breach of a limit specified in the permit, shall be confirmed by sending the information listed in schedule 5 to this permit within the time period specified in that schedule.

4.3.3 Where the Environment Agency has requested in writing that it shall be notified when the operator is to undertake monitoring and/or spot sampling, the operator shall inform the Environment Agency when the relevant monitoring and/or spot sampling is to take place. The operator shall provide this information to the Environment Agency at least 14 days before the date the monitoring is to be undertaken.

4.3.4 The Environment Agency shall be notified within 14 days of the occurrence of the following matters, except where such disclosure is prohibited by Stock Exchange rules:

Where the operator is a registered company:

- (a) any change in the operator's trading name, registered name or registered office address; and
- (b) any steps taken with a view to the operator going into administration, entering into a company voluntary arrangement or being wound up.

Where the operator is a corporate body other than a registered company:

- (c) any change in the operator's name or address; and
- (d) any steps taken with a view to the dissolution of the operator.

In any other case:

- (e) the death of any of the named operators (where the operator consists of more than one named individual);
- (f) any change in the operator's name(s) or address(es); and
- (g) any steps taken with a view to the operator, or any one of them, going into bankruptcy, entering into a composition or arrangement with creditors, or, in the case of them being in a partnership, dissolving the partnership.

4.3.5 Where the operator proposes to make a change in the nature or functioning, or an extension of the activities, which may have consequences for the environment and the change is not otherwise the subject of an application for approval under the Regulations or this permit:

- (a) the Environment Agency shall be notified at least 14 days before making the change; and
- (b) the notification shall contain a description of the proposed change in operation.

4.3.6 The Environment Agency shall be given at least 14 days notice before implementation of any part of the site closure plan.

4.4 Interpretation

4.4.1 In this permit the expressions listed in schedule 6 shall have the meaning given in that schedule.

4.4.2 In this permit references to reports and notifications mean written reports and notifications, except where reference is made to notification being made "immediately", in which case it may be provided by telephone.

Schedule 1 – Operations

Table S1.1 activities		
Activity listed in Schedule 1 of the EP Regulations	Description of specified activity	Limits of specified activity
Section 6.9 A(1)(a)(i) Rearing of poultry intensively in an installation with more than 40,000 places	The rearing of poultry in a facility with a capacity for 365,000 broiler places.	From receipt of birds, raw materials and fuels onto the site to removal of birds and associated wastes from site.
Directly Associated Activity	Description of specified activity	Limits of specified activity
Biomass boilers	Operation of eleven biomass boilers with an aggregated thermal rated input not exceeding 2.634 MWth, for site heating requirements, burning biomass fuel not comprising waste or animal carcasses.	From receipt of raw materials and fuels, to release of combustion products to air and associated wastes removed from site.

Table S1.2 Operating techniques		
Description	Parts	Date Received
Application EPR/HP3834ML/A001	The responses to sections B2.3.1, B2.3.2, B2.3.3, B2.6.1, B2.6.2, B2.6.3, B2.7.1 and B2.7.2 in the Application.	25/01/07
Request for Information dated 07/05/2007	Entire request.	18/07/07
Additional information EPR/ZP3335KF/V003	Email response relating to boiler fuel type, stack height and the retention of back up heaters.	10/07/13
Application EPR/ZP3335KF/V004	The responses to the EPA Application Form Parts C2 and C3 for Environmental Permit Applications. Site drainage plan, revised application Site Condition Report and Non-technical Summary provided in the Application – Supporting Documents.	08/04/14
Additional information EPR/ZP3335KF/V004	Further details regarding the biomass boilers. Revised H1 and EMS summary.	16/05/14
Additional information EPR/ZP3335KF/V005	The responses to the Application Form Parts C2 and C3 and referenced supporting information including details of the accident prevention measures used.	18/11/14
Application EPR/ZP3335KF/V006	Application form C3.5 question 8 response plus supporting documentation and duly making response	Duly made 20/04/15
Application EPR/BP3434DM/V002	Responses to Parts C2 and C3.5 of the application form and referenced supporting documentation.	Duly made 03/10/17
Additional information requested 12/12/17	Response to Request for Information confirming the farm will be operated in accordance with the new BAT conclusions, revised site plan to show the extended permit boundary and updated odour management plan.	15/12/17

Schedule 2 – Waste types, raw materials and fuels

Table S2.1 Raw materials and fuels	
Raw materials and fuel description	Specification
Fuel for biomass boiler units	Biomass chips or pellets comprising virgin timber, straw, miscanthus; grade A waste wood or a combination of these.

Schedule 3 – Emissions and monitoring

Table S3.1 Point source emissions to air – emission limits and monitoring requirements						
Emission point ref. & location	Source	Parameter	Limit (including unit)	Reference Period	Monitoring frequency	Monitoring standard or method
High velocity roof fan outlets on poultry houses 1-6 as shown on the site plan reference 'AG2 Site Plan' in application EPR/BP3434DM/V002	Poultry houses 1 - 6	---	---	---	---	---
Gable end fan outlets on poultry houses 1-6 as shown on the site plan reference 'AG2 Site Plan' in application EPR/BP3434DM/V002	Poultry houses 1 - 6	---	---	---	---	---
Exhaust from standby generator as shown on the site plan reference 'AG2 Site Plan' in application EPR/BP3434DM/V002	Standby Generator	---	---	---	---	---
Oil tank vent as shown on as shown on the site plan reference 'AG2 Site Plan' in application EPR/BP3434DM/V002	Oil tank	---	---	---	---	---
Emissions from 11 biomass boilers as shown on the site plan reference 'AG2 Site Plan' in application EPR/BP3434DM/V002	Aggregated 2.634 MWth biomass boilers	---	---	---	---	---

Table S3.2 Point Source emissions to water (other than sewer) and land – emission limits and monitoring requirements						
Emission point ref. & location	Source	Parameter	Limit (incl. unit)	Reference Period	Monitoring frequency	Monitoring standard or method
Discharge to piped watercourse, to the east of the installation boundary, as indicated on the drainage plan reference 'AG2 Site Plan' in application EPR/BP3434DM/V002.	Roof water from poultry houses 1 to 6 intercepted by French drains prior to discharge	---	---	---	---	---
Discharge to piped watercourse, to the north east of the installation boundary, as indicated on the drainage plan reference 'AG2 Site	Clean roof and yard water from sheds 1 to 6 (excluding poultry house wash out periods)	---	---	---	---	---

Table S3.2 Point Source emissions to water (other than sewer) and land – emission limits and monitoring requirements

Emission point ref. & location	Source	Parameter	Limit (incl. unit)	Reference Period	Monitoring frequency	Monitoring standard or method
Plan' in application EPR/BP3434DM/V002.						
French drains acting as soakaways to land as indicated on the drainage plan reference 'AG2 Site Plan' in application EPR/BP3434DM/V002.	Clean surface water runoff from sheds 1 to 6 (excluding poultry house wash out periods)	---	---	---	---	---

Table S3.3 Process monitoring requirements

Emission point reference or source or description of point of measurement	Parameter	Limit (incl. Unit)	Monitoring frequency [1]	Monitoring standard or method
Broilers in houses 1 - 5	kg N excreted/animal place/year	From 21/02/2021 0.6 kg N/animal place/year	Annually	Using a mass balance of nitrogen based on the feed intake, dietary content of crude protein, and animal performance or Estimation by using manure analysis for total nitrogen content.
	kg P ₂ O ₅ excreted/animal place/year	From 21/02/2021 0.25 kg P ₂ O ₅ animal place/year		Using a mass balance of phosphorus based on the feed intake, dietary content of crude protein, total phosphorus and animal performance or Estimation by using manure analysis for total phosphorus content.
	Kg NH ₃ /animal place/year	From 21/02/2021 0.08 kg NH ₃ /animal place/year		Estimation using emission factors
Broilers in house 6	kg N excreted/animal place/year	0.6 kg N/animal place/year	Annually	Using a mass balance of nitrogen based on the feed intake, dietary content of crude protein, and animal performance or Estimation by using manure analysis for total nitrogen content.
	kg P ₂ O ₅ excreted/animal place/year	0.25 kg P ₂ O ₅ animal place/year		Using a mass balance of phosphorus based on the feed intake, dietary content of crude protein, total phosphorus and animal performance or Estimation by using manure analysis for total phosphorus content.

Table S3.3 Process monitoring requirements				
Emission point reference or source or description of point of measurement	Parameter	Limit (incl. Unit)	Monitoring frequency [1]	Monitoring standard or method
	Kg NH ₃ /animal place/year	0.08 kg NH ₃ /animal place/year		Estimation using emission factors
Broilers in houses 1 - 6	Dust	n/a	Annually	Estimation using emission factors
Note [1] - For all existing housing permitted before 21/02/17 the monitoring is a requirement from 21/02/21.				

Schedule 4 – Reporting

Parameters, for which reports shall be made, in accordance with conditions of this permit, are listed below.

Table S4.1 Reporting of monitoring data			
Parameter	Emission or monitoring point/reference	Reporting period	Period begins
Process monitoring Parameters as required by condition 3.5.1	-	Every 12 months	1 January

Table S4.2 Reporting forms		
Media/parameter	Reporting format	Date of form
Kg NH ₃ /animal place/year	Form Process Monitoring 1 or other form as agreed in writing by the Environment Agency	21/12/17
kg N excreted/animal place/year & kg P ₂ O ₅ excreted/animal place/year	Form Process Monitoring 1 or other form as agreed in writing by the Environment Agency	21/12/17
Dust atmospheric mass emission	Form Process Monitoring 1 or other form as agreed in writing by the Environment Agency	21/12/17

Schedule 5 – Notification

These pages outline the information that the operator must provide.

Units of measurement used in information supplied under Part A and B requirements shall be appropriate to the circumstances of the emission. Where appropriate, a comparison should be made of actual emissions and authorised emission limits.

If any information is considered commercially confidential, it should be separated from non-confidential information, supplied on a separate sheet and accompanied by an application for commercial confidentiality under the provisions of the EP Regulations.

Part A

Permit Number	
Name of operator	
Location of Facility	
Time and date of the detection	

(a) Notification requirements for any malfunction, breakdown or failure of equipment or techniques, accident, or emission of a substance not controlled by an emission limit which has caused, is causing or may cause significant pollution

To be notified within 24 hours of detection

Date and time of the event	
Reference or description of the location of the event	
Description of where any release into the environment took place	
Substances(s) potentially released	
Best estimate of the quantity or rate of release of substances	
Measures taken, or intended to be taken, to stop any emission	
Description of the failure or accident.	

(b) Notification requirements for the breach of a limit

To be notified within 24 hours of detection

Emission point reference/ source	
Parameter(s)	
Limit	
Measured value and uncertainty	
Date and time of monitoring	
Measures taken, or intended to be taken, to stop the emission	

Time periods for notification following detection of a breach of a limit	
Parameter	Notification period

(c) Notification requirements for the detection of any significant adverse environmental effect	
To be notified within 24 hours of detection	
Description of where the effect on the environment was detected	
Substances(s) detected	
Concentrations of substances detected	
Date of monitoring/sampling	

Part B – to be submitted as soon as practicable

Any more accurate information on the matters for notification under Part A.	
Measures taken, or intended to be taken, to prevent a recurrence of the incident	
Measures taken, or intended to be taken, to rectify, limit or prevent any pollution of the environment which has been or may be caused by the emission	
The dates of any unauthorised emissions from the facility in the preceding 24 months.

Schedule 6 – Interpretation

“accident” means an accident that may result in pollution.

“application” means the application for this permit, together with any additional information supplied by the operator as part of the application and any response to a notice served under Schedule 5 to the EP Regulations.

“authorised officer” means any person authorised by the Environment Agency under section 108(1) of The Environment Act 1995 to exercise, in accordance with the terms of any such authorisation, any power specified in section 108(4) of that Act.

“building” means a construction that has the objective of providing sheltering cover and minimising emissions of noise, particulate matter, odour and litter.

“emissions to land” includes emissions to groundwater.

“emissions of substances not controlled by emission limits” means emissions of substances to air, water or land from the activities, either from the emission points specified in schedule 3 or from other localised or diffuse sources, which are not controlled by an emission limit.

“EP Regulations” means The Environmental Permitting (England and Wales) Regulations SI 2016 No.1154 and words and expressions used in this permit which are also used in the Regulations have the same meanings as in those Regulations.

“groundwater” means all water, which is below the surface of the ground in the saturation zone and in direct contact with the ground or subsoil.

‘Hazardous property’ has the meaning in Annex III of the Waste Framework Directive.

“Industrial Emissions Directive” means DIRECTIVE 2010/75/EU OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL of 24 November 2010 on industrial emissions.

‘List of Wastes’ means the list of wastes established by Commission Decision 2000/532/EC replacing Decision 94/3/EC establishing a list of wastes pursuant to Article 1(a) of Council Directive 75/442/EEC on waste and Council Decision 94/904/EC establishing a list of hazardous waste pursuant to Article 1(4) of Council Directive 91/689/EEC on hazardous waste, as amended from time to time.

“Manure and slurry” have the following meaning:

- Manures may be either slurries or solid manures.
- Slurries consist of excreta produced by livestock whilst in a yard or building mixed with rainwater and wash water and, in some cases, waste bedding and feed. Slurries can be pumped or discharged by gravity.
- Slurry includes duck effluent, seepage from manure and wash water.
- Solid manures include farmyard manure (FYM) and comprise material from straw-based housing systems, excreta with lots of straw/sawdust/woodchips in it, or solids from mechanical separators.
- Most poultry systems produce solid manure (litter).

“virgin timber” means timber from

- Whole trees and the woody parts of trees including branches and bark derived from forestry works, woodland management, tree surgery and other similar operations (it does not include clippings or trimmings that consist primarily of foliage);
- Virgin wood processing (e.g. wood offcuts, shavings or sawdust from sawmills) or timber product manufacture dealing in virgin timber.
- If virgin timber is mixed with waste timber or any other waste, the mixed load is classed as waste.

“pests” means Birds, Vermin and Insects.

‘Waste code’ means the six digit code referable to a type of waste in accordance with the List of Wastes and in relation to hazardous waste, includes the asterisk

“Waste Framework Directive” or “WFD” means Waste Framework Directive 2008/98/EC of the European Parliament and of the Council on waste.

“year” means calendar year ending 31 December.

Schedule 7 – Site plan

Site plan - showing installation boundary as referred to in condition 2.2.1.

END OF PERMIT
