Sampling and testing of feed materials and compound feeding stuffs for processed animal proteins

Report Period Start Date:	01/04/2016								
Report Period End Date:	31/03/2017								
Premises	Number of samples collected by AHO staff tested for processed animal proteins			Number of non-compliant samples					
	Feed materials	Compound feeding stuffs		Presence of processed animal protein/animal protein from terrestrial animals			Presence of processed animal protein from fish		
		For ruminants	For non-ruminants	Feed materials	Compound feeding stuffs		Feed materials	Compound feeding stuffs	
At import	102	10	3	0	0	0	0	0	0
Feed mills	874	1192	388	0	0	0	0	0	0
Intermediaries/ storage	131	41	0	0	0	0	0	0	0
Means of transport	0	0	0	0	0	0	0	0	0
Home mixers/ mobile mixers	43	167	50	0	0	0	0	0	0
On farm	166	1425	249	0	0	0	0	1	0
Fats & vegetable oils	1	0	0	0	0	0	0	0	0
Total	1317	2835	690	0	0	0	0	1	0
Total samples collected	4842								
Total samples collected using Official Method	2350								

Summary of prohibited processed animal proteins found in samples of feeding stuffs intended for farmed animals 2016/17

	Month of sampling	Type degree and origin of contamination	Sanctions (or other measures) applied
1	October 2016	Presence of fish protein in chicken feed.	Typo on the report – the feed was chicken starter erroneously classified as “R” instead of “NR”

In addition, Member States should analyse fats and vegetable oils intended for feeding stuffs for the presence of traces of bones and include the results of such analyses in the report to in paragraph 2 of this recommendation.
