

Funding for local groups of NHS organisations (Sustainability and Transformation Partnerships)

1.1 The Budget provides £3.5 billion of capital investment for estates transformation, and improvement and efficiency schemes, so that the NHS can locally deliver more integrated care for patients and better meet demand.

1.2 £2.6 billion of this funding will be for local groups of NHS organisations (Sustainability and Transformation Partnerships) to deliver transformation schemes that improve their ability to meet demand for local services. This funding will also allow the NHS to increase the proceeds from selling surplus NHS land and buildings to at least £3.3 billion, almost doubling the scale of investment available to the NHS, and unlocking land for housing.

1.3 Today, the government is provisionally allocating up to 10% of this funding to 12 of the highest quality schemes with the strongest potential to help STPs meet future demand and develop local clinical and financial accountability. This is subject to business case approval. The rest of the £2.6bn will be allocated in due course.

1.4 The 12 schemes announced today are:

- Barnsley Hospital Children’s Emergency Department and Assessment Unit scheme (South Yorkshire and Bassetlaw STP) to support the rapid assessment and treatment of children.
- Doncaster Urgent and Emergency Care scheme (South Yorkshire and Bassetlaw STP) to expand, redesign and improve emergency care.
- Leeds Community Child and Adolescent Mental Health Inpatient Unit scheme (West Yorkshire STP) to provide a new specialist inpatient unit for young people and children with mental health conditions.
- Chesterfield Urgent Care scheme (Derbyshire STP) to provide a modern urgent care facility at Chesterfield Royal NHS Foundation Trust.
- Russell’s Hall Hospital Dudley Urgent Care Centre scheme (Black Country STP) to better integrate their urgent and emergency care Department.
- Birmingham Children’s Hospital Emergency Department scheme (Birmingham and Solihull STP) to increase emergency care capacity and improve patient experience.
- South Warwickshire NHS Foundation Trust Out of Hospital Care scheme (Coventry and Warwickshire STP) to provide an integrated information system between local trusts.
- Mid and South Essex Transforming Health and Care scheme (Mid-and-South Essex STP) to upgrade facilities to help meet increasing demand.
- South West London and St George’s NHS Mental Health Trust Estates Modernisation scheme (South West London STP) to improve inpatient care and free up land for housing.
- Frimley Out of Hospital Integrated Care Hubs scheme (Frimley Health STP) to enable patients to be treated out of hospital.

- Bracknell Forest Heathlands scheme (Frimley Health STP) to build a new care home for elderly mentally infirm patients.
- Chiltern and Aylesbury Vale Primary Care Hub scheme (Buckinghamshire, Oxfordshire and Berkshire West STP) to allow the expansion of community teams and care provision outside of traditional hospital settings.
