

## Monthly publication of Official Statistics on the incidence and prevalence of tuberculosis (TB) in Cattle in Great Britain – to end January 2017

These statistics and accompanying datasets were released on Wednesday 19 April 2017 at 9:30. The next monthly notice will be published on Wednesday 17 May 2017.

The next quarterly statistical notice which includes headline measures and charts will be published on Wednesday 14 June 2017.

**Short term changes in TB statistics should be considered in the context of long term trends in incidence and prevalence, presented in the quarterly statistical notice published in March 2017**

Key tables summarising data to January 2017

**Table 1: New herd incidents<sup>1</sup> and incidents where OTF status has been withdrawn<sup>2</sup>**

	New herd incidents			New herd incidents where OTF status is withdrawn (OTFW)		
	12 months to end January 16	12 months to end January 17	Year-on-year change	12 months to end January 16	12 months to end January 17	Year-on-year change
England	3,974	3,728	-6%	2,880	2,500	-13%
High risk area	3,461	3,215	-7%	2,637	2,270	-14%
Edge area	353	385	9%	190	191	1%
Low risk area	160	128	-20%	53	39	-26%
Scotland	43	35	-19%	10	9	-10%
Wales	792	698	-12%	442	373	-16%

**Table 2: Herds not officially TB free at the end of the period due to a bovine TB incident (non-OTF herds)<sup>3</sup>**

	12 months to end January 16	12 months to end January 17	Year-on-year change
England	3,176	3,087	-3%
High risk area	2,857	2,777	-3%
Edge area	249	256	3%
Low risk area	70	54	-23%
Scotland	25	25	0%
Wales	610	561	-8%

**Table 3: Total animals slaughtered<sup>4</sup>**

	12 months to end January 16	12 months to end January 17	Year-on-year change
England	28,026	29,609	6%
High risk area	24,630	25,748	5%
Edge area	2,747	3,310	20%
Low risk area	649	551	-15%
Scotland	134	183	37%
Wales	8,229	10,002	22%

## Footnotes

1. Herds which were previously Officially TB free (OTF) but either had cattle that reacted to a tuberculin test or had a tuberculous animal disclosed by routine meat inspection at slaughter, during the period shown. This is the preferred figure to measure the number of new breakdowns. Figures for Wales include incidents where OTF status has been withdrawn for epidemiological reasons only.
2. New herd incidents where OTF status was withdrawn from the herd due to the detection of typical lesions of TB during post-mortem examination of one or more test reactors or inconclusive reactors, or where samples from one or more reactor, inconclusive reactor or a slaughterhouse case produce positive culture results for *Mycobacterium bovis* (the causative bacterium of bovine TB). Figures for Wales do not include incidents where OTF status has been withdrawn for epidemiological reasons only, in the absence of post-mortem confirmation.
3. Herds which were not officially TB-free (i.e. herds with an open breakdown with OTF status suspended or withdrawn) due to a TB incident, at the end of the period shown.
4. Reactors slaughtered + Inconclusive reactors slaughtered + Direct contacts Slaughtered.

## Further information

The publication 'quarterly headline statistics on TB in cattle in GB' contains charts on trends in TB as well as data tables, detailed commentary and background information. This and the related datasets can be found at <https://www.gov.uk/government/publications/incidence-of-tuberculosis-tb-in-cattle-in-great-britain>

A wide range of other statistics is available on the internet at:

<https://www.gov.uk/government/organisations/department-for-environment-food-rural-affairs/about/statistics>

## Data

These statistics are obtained from the Animal and Plant Health Agency (APHA) work management IT support system (Sam), used for the administration of TB testing in GB. They are a snapshot of the position on the date on which the data were extracted. These statistics may be subject to regular revision until all test results are available. In particular figures from 2015 onwards will be subject to further revision as test and incident records are completed.

## Methodology

For a description of the data sources and methodology used in the calculation of the TB statistics, together with notes on data revisions policy etc., please refer to the 'Background and Methodology' annex document at: [https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/568976/bovinetb-annex-16nov16.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/568976/bovinetb-annex-16nov16.pdf)
