

Countryside Stewardship

How can it work for me?

ENGLAND

Countryside Stewardship is a targeted and competitive scheme, with grants going to those who will deliver the most for the environment. Farmers and land managers who **work together**, or choose options that **support wild pollinators and wildlife** or **improve water quality or reduce flood risk** are more likely to receive a grant. Anyone can apply for land that isn't already in Environmental Stewardship or the English Woodland grant scheme.
