A NATIONAL STATISTICS PUBLICATION

National Statistics are produced to high professional standards set out in the Code of Practice for Official Statistics. They undergo regular quality assurance reviews to ensure that they meet customer needs. They are produced free from any political interference.

The United Kingdom Statistics Authority has designated these statistics as National Statistics, in accordance with the Statistics and Registration Service Act 2007 and signifying compliance with the Code of Practice for Official Statistics.

Designation can be broadly interpreted to mean that the statistics:

- meet identified user needs;
- are well explained and readily accessible;
- are produced according to sound methods, and
- are managed impartially and objectively in the public interest.

Once statistics have been designated as National Statistics it is a statutory requirement that the Code of Practice shall continue to be observed.

For general enquiries about National Statistics, contact the National Statistics Public Enquiry Service on

☎ 0845 601 3034

Amendments to 2012-13 Finalised Tax Credits National Statistics

Reason for Revision

This revised version of the original 2012-13 publication is necessary due to an error having been found within the original publication. The error was caused by a coding problem which has now been corrected. There was no issue with the underlying data and no previous versions of the statistics were affected.

If you have any questions about this issue, please contact Scott Paul Johnston via phone (03000 514885) or email (scottpaul.johnston@hmrc.gsi.gov.uk)

Introduction

What are tax credits?

Tax credits are a flexible system of financial support designed to deliver support as and when a family needs it, tailored to their specific circumstances. They are part of wider government policy to provide support to parents returning to work, reduce child poverty and increase financial support for all families. The flexibility of the design of the system means that as families' circumstances change, so (daily) entitlement to tax credits changes. This means tax credits can respond quickly to families' changing circumstances providing support to those that need them most.

Tax credits are based on household circumstances and can be claimed jointly by members of a couple, or by singles. Entitlement is based on the following factors:

- age
- income
- hours worked
- number and age of children
- childcare costs
- disabilities

For further information about who can claim please refer to the HMRC website:

<https://www.gov.uk/browse/benefits/tax-credits>

Tax Credits are made up of:

Child Tax Credit (CTC)

Brings together income-related support for children and for qualifying young people aged 16-19 who are in full time non-advanced education or approved training into a single tax credit, payable to the main carer. Families can claim whether or not the adults are in-work.

Working Tax Credit (WTC)

Provides in-work support for people on low incomes, with or without children. It extends eligibility to in-work support to people who work 16 hours or more a week and:

- are aged at least 16 and are responsible for a child or young person,
- are aged at least 16 and are receiving or have recently received a qualifying sickness or disability related benefit and have a disability that puts them at a disadvantage of getting a job, or

Otherwise it is extended to people who are aged 25 and over who work 30 hours a week or more.

CTC is made up of the following elements:

- **Family element** which is the basic element for families responsible for one or more children or qualifying young people;
- **Child element** which is paid for each child or qualifying young person the claimant is responsible for;
- **Disability element** for each child or qualifying young person the claimant is responsible for, if they get Disability Living Allowance for the child; and,
- **Severe disability element** for each child or qualifying young person the claimant is responsible for, if they get Disability Living Allowance (Highest Care Component) for the child.

Some out-of-work families with children do not receive CTC but instead receive the equivalent amount via child and related allowances in Income Support or income-based Jobseeker's Allowance (IS/JSA). These families are included in the figures, generally together with out-of-work families receiving CTC. In due course, they will be "migrated" to HMRC and paid via the tax credits system.

WTC is made up of the following elements:

- **Basic element** which is paid to any working person who meets the basic eligibility conditions;
- **Lone Parent element** for lone parents;
- **Second adult element** for couples;
- **30 hour element** for individuals who work at least 30 hours a week, couples where one person works at least 30 hours a week or couples who have a child and work a total of 30 hours or more a week between them and where one of them works at least 16 hours a week;
- **Disability element** for people who work at least 16 hours a week and who have a disability that puts them at a disadvantage in getting a job and who are receiving or have recently received a qualifying sickness or disability related
- **Severe disability element** for people who are in receipt of Disability Living Allowance (Highest Care Component) or Attendance Allowance at the highest rate; and,
- **Childcare element:** for single people who work at least 16 hours a week or couples who both work at least 16 hours a week and who spend money on registered or approved childcare.

Interaction of WTC and CTC

Working families with dependent children can claim both WTC and CTC together. However, the WTC entitlement will continue to reduce after the first income threshold £6,420 (in 2012-13) while CTC does not. The combined entitlement will continue until the household income reaches a point where WTC would be '0'. Families will receive full CTC entitlement until their income reaches £15,860 (in 2014-15). From that point CTC entitlement will start to decline.

Tapering is the amount of the award that will be reduced when the household income exceeds a given threshold. Tapering reduces WTC first and then CTC.

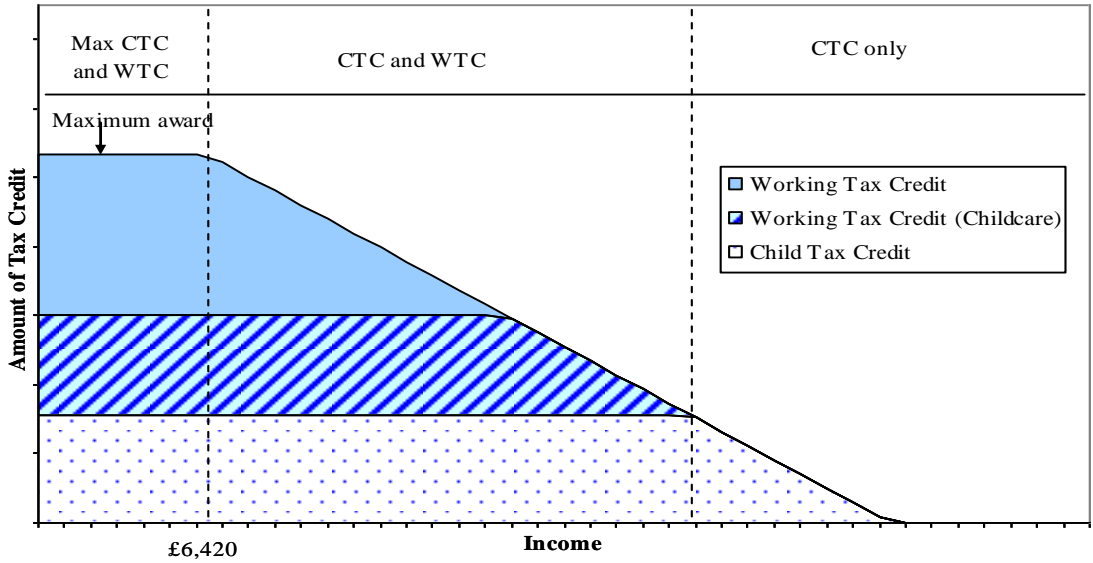

Child and Working Tax Credit Entitlement

The amount of support an eligible family can receive (known as their *entitlement*) varies depending on their income and which tax credit elements they are eligible for. First, a family's maximum possible entitlement is worked out by adding up all the different elements of CTC and WTC they are eligible for (described on page 2).

A household's actual entitlement is then determined by tapering this maximum amount according to different thresholds. As demonstrated within the diagram below, families eligible for the WTC receive the full entitlement until their annual household income reaches £6,420, after which the amount of tax credits they receive is reduced by 41 pence for each additional £1 they earn beyond this threshold.

If a household is out-of-work and therefore eligible for the CTC only, they will receive the full entitlement until their annual household income reaches £15,860 (2012-13). After this point, the amount of tax credits they receive is again reduced by 41 pence for each additional £1 of income beyond this threshold (note that this is not shown on the diagram below).

In-work Child and Working Tax Credit Entitlement

Because of the range of possible eligibilities and interactions between the elements, both the maximum award and the shape of the above award profile will be different for every family with different circumstances.

Tax Credits are based on household income. The income used to calculate the award is based on the families' income from the previous tax year, or on their most recently reported circumstances in-year. A family's tax credits award is provisional until finalised at the end of the year, when it is checked against their final income for the year. This publication relates to the finalised position of tax credit support.

What does this publication tell me?

The finalised awards are currently published in May around one year following completion of the entitlement year in question. The delay in publication is the result of the finalisation process built into the Tax Credits system. Most families have until *July 31st* following the end of the entitlement year to renew their award reporting their finalised income for the year in question. However, families that report income from Self-Assessment (e.g., the self-employed) have until *January 31st* of the following year to finalise their income. As a result, the full picture is not known until at least February the year after the entitlement year ends and consequently publication is delayed until May. These are National Statistics and the month of publication is pre-announced a year in advance with the exact date being published in the preceding publication.

Each release consists of four publications: the main publication, a supplementary payments publication, and the accompanying geographical publications. The statistics in this release include analysis at

- Country and English Region;
- Local Authority (LA);
- Westminster Parliamentary Constituency; and
- Scottish Parliamentary Constituency;

This series has been produced annually since the introduction of Tax Credits in April 2003.

Small Area Statistics

Estimates are also provided in a separate publication at Lower Super Output Area and Data Zone for England, Scotland and Wales. These statistics are available here:

<https://www.gov.uk/government/collections/personal-tax-credits-statistics>

The small area statistics are based on the finalised award position, but using a family's circumstances as at 31st August rather than as an average across the year. This ensures that the statistics are directly comparable to other published small area statistics, such as Child Benefit.

Who might be interested?

The statistics contained in this publication will be of interest for anyone that is looking for the most comprehensive data on Tax Credits. Specifically, there are aggregate statistics on who is getting what level of tax credits support and the amount of that support, as well as breakdowns of both by various sub-categories - e.g., family composition, family income, work status, and geographical analyses. It may be of interest to academics, think-tank's, political parties interested in the twin aims of Tax Credits: eradicating child poverty and improving work incentives. Equally it may be of interest for people considering wider questions on government support systems and/or others designing benefit systems. Finally, the geographical analyses might be of interest at the more local level, giving some indication of the level of government support in each Region/Local Authority level.

Which publication should I use?

Generally, if you are content with less timely statistics, use the finalised awards data publication. If you are more concerned with getting the latest up-to-date information that may not align exactly with finalised data further down the line, use the provisional awards data. Sticking to the finalised award data will also mean the figures will align with other published data on Tax Credits such as information in HMRC's Departmental Accounts.

Provisional awards vs. finalised awards

It is important to recognise that the finalised awards statistics are not a revision of the provisional statistics. The provisional numbers relate to the caseload position at a snapshot point in time, based on the family circumstances we have been informed of by each family prior to that particular time. The finalised awards relate to the complete retrospective picture for the year, based on a finalised view of family incomes and circumstances. The caseload population will be different between the two publications as a result of HMRC knowing the complete finalised picture of the award.

At the start of the year, the tax credit award will be a provisional award reflecting the reported circumstances as at April 6th (the start of the tax year). Over the course of the year, a family's circumstances may or may not change. As and when a family's circumstances change, the provisional award is updated each time with the latest set of circumstances and a new provisional award re-calculated. It is only at finalisation (usually four to nine months after the end of the tax year) that the family's circumstances for the whole year are known and a finalised award can be calculated. As a result, the finalised award statistics are not available until around 12 months after the end of the entitlement year in question. Given this lag in availability of data, there is some value in looking at a snapshot of families' circumstances at any given time to give some indication of the level of support one might expect to see subsequently at finalisation.

To illustrate the difference, let us look at a family that has one change of circumstance throughout the year, moving from in-work to out-of-work in January of any one year:

The snapshot data looking at the provisional award in December will model entitlement for the whole year on the basis that the family is in-work for the whole year (since we do not know about the move out-of-work at that time). It is not until finalisation - and thereby in the finalised award data publication - that the family's entitlement will be modelled on the basis of 9 months in-work and 3 months out-of-work.

So the figures for provisional awards are more up to date, but are subject to retrospective change. The sizes of these changes can be seen by comparing the data for selected dates in finalised awards with data published earlier on provisional awards at the same snapshot dates. The provisional award data tables classify families according to the levels of their entitlement at the reference date, modelled from data on their circumstances and their latest annual incomes reported and processed by that date. The actual amount being received at that date can be lower, due to the recovery of earlier overpayments. The tables describe as "recipients" all families with positive modelled entitlement, though in some cases the payments are reduced to zero. For more details, see the Technical Note.

What information do the tables contain?

CTC and WTC are claimed by individuals, or jointly by couples, whether or not they have children (described as "families" in this publication). These tables cover families who had claimed, and were eligible for, CTC (or the equivalent via benefits) or WTC for all of or part of 2012/13

The tables in Section 1 include both out-of-work and in-work families, and show the time series since 2003/04 of the tax credits population by profile position. Also included are the total levels of entitlement for each group. Table 1.2 provides further breakdowns of the population in terms of families, children and elements received.

Section 2 provides further breakdowns of the 2012/13 population, specifically those with children, in terms of family size, level of entitlement and profile position.

Section 3 goes into further detail about the average number of families benefiting from the various individual elements of tax credits, as well as a table showing the income used to calculate the award.

Out-of-work families

A family is defined as being out-of-work at the reference date if both adults, or the single adult, does not work for at least 16 hours per week, these families can fall into two categories:

- 1) Families administered by HMRC who are receiving their child support through CTC
- 2) Families administered by DWP and claiming their child support through benefits

Child Tax Credit was introduced in April 2003 and any application since then falls under 1), whereas families who were receiving out-of-work benefits prior to April 2003 and remain so will fall under 2) – these cases are being migrated over to HMRC. All the tables in this publication include all out of work families, irrespective of the source of their support.

User Engagement

Bespoke analysis of tax credits data is possible although there may be a charge depending on the level of complexity and the resources required to produce. If you would like to discuss your requirements, to comment on the current publications, or for further information about the tax credits statistics please use the contact information at the beginning of this publication, or from the <https://www.gov.uk/government/organisations/hm-revenue-customs/about/statistics#contact-us>

We are committed to improving the official statistics we publish. We want to encourage and promote user engagement, so we can improve our statistical outputs.

We would welcome any views you have using the link to the feedback form below. We will undertake to review user comments on a quarterly basis and use this information to influence the development of our official statistics. We will summarise and publish user comments at regular <https://www.gov.uk/government/organisations/hm-revenue-customs/about/statistics#contact-us>

National Statistics Review

A formal review of our National and Official Statistics publications was held between May and August 2011. Over 130 responses were received from a broad range of users.

A report summarising the responses received has been published.
https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/277973/report.pdf

Policy changes which came into effect on 6th April 2012

The following changes were introduced on 6th April 2012 as part of the Coalition Government's announcements in the June 2010 Budget and the 2010 Spending Review:

The first income threshold for those entitled to CTC only has been reduced from

The second threshold has been abolished.

The first taper rate is increased by 2 percentage points to 41% while the second

The support provided through the childcare element of WTC is reduced to its 2005-06 level, supporting 70% of eligible childcare costs.

A new working hours condition for couples with children. At least one adult must work 16 hours or more per week, and their combined working hours must be 24 hours or more in order to be eligible for WTC.

Income rise disregard has been reduced from £25,000 to £10,000.

A new income fall disregard of £2,500 has been introduced.

The 50+ return to work payment has been abolished.

The baby element of CTC has been abolished.

The removal of the second income threshold means that most families that used to receive the Family Element or less are no longer entitled to receive anything. As a result some categories in this publication have been changed. The previous distinction between In-work families receiving 'More than the Family Element' 'the Family element' and 'Less than the Family Element' has been removed, and will now be referred to as 'CTC Only'.

Footnotes

¹ Area codes implemented from 1 January 2011 in line with the new GSS Coding and Naming policy.

² Includes Foreign and not known

³ All figures are rounded to the nearest integer therefore not all totals may exactly equal the sums of their respective components.

⁴ "Foreign and not known" consists of a small proportion of recipient families and children who do not live within England, Scotland, Northern Ireland or Wales. They may for instance be a Crown servant posted overseas, or living in a British Crown Dependency. Due to the small size of this population we combine them into one group which also consists of those whom, at the time of publication, either have a UK postcode that does not match to a geographical office region code, or do not have a postcode in the available data.

Footnotes

¹ Excludes WTC only cases which are included in table 1C.

² Area codes implemented from 1 January 2011 in line with the new GSS Coding and Naming policy.

³ Includes Foreign and not known

⁴ All figures are rounded to the nearest integer therefore not all totals may exactly equal the sums of their respective components.

⁵ "Foreign and not known" consists of a small proportion of recipient families and children who do not live within England, Scotland, Northern Ireland or Wales. They may for instance be a Crown servant posted overseas, or living in a British Crown Dependency. Due to the small size of this population we combine them into one group which also consists of those whom, at the time of publication, either have a UK postcode that does not match to a geographical office region code, or do not have a postcode in the available data.

Table 2: Average number of benefiting families and annual entitlements in each local authority, 2012-13 ¹⁶

Appendix A : Technical Note

Using finalised awards data

The figures for 2012-13 in the table are mostly derived from a scan of the tax credits computer system taken in early April 2012. For each award, the scan contained a record for each sub-period of the year for which the family's circumstances (adult partners, hours worked, number of children, childcare costs, disabilities) remained unchanged. For each such sub-period, the scan revealed the various elements for which the family qualified for the period, and the daily monetary value of the childcare element. It also revealed the values of the 2011-12 and 2012-13 incomes for each award.

For each award, and for each sub-period, the daily rate of entitlement was then modelled by summing the various element values to which the family was entitled and tapering the total away using the income data¹. The modelled daily entitlement was then used to establish where on the plateau - taper profile the family fell for that period. A small number

For each case covered by the scan, and for each sub-period, it was possible to compare the modelled entitlement with that held on the computer system. For all but about 0.1 per cent of cases the discrepancy was at most 2p per day.

The scan did not cover out of work families who received their child support via Income Support or income-based Jobseeker's Allowance (IS-JSA) rather than CTC. A scan of such families at August 2008 was obtained from the Department for Work and Pensions. This contained sufficient information to distinguish single parents from couples. The number and ages of the children were obtained from the Child Benefit records for these families who were still receiving their child support through IS-JSA at August 2012. The level of entitlement at August 2012 was modelled using this information, which however could not include the disabled child or severely disabled child premium. To produce annual averages to be added to the annual CTC averages, the August 2012 aggregates were scaled by a factor needed to produce a separately-estimated overall average for the year. The annualised August 2012 entitlements were also scaled to agree with the

Interpreting annual entitlement

The calculation of the annual entitlement for an award also yields a value of the entitlement for each day of the year. This can vary within the year as the family's circumstances vary. Also, awards can end during the year (for example, as couples separate, or as families cease to satisfy the qualifying conditions listed above), and other awards start during the year. The tables show annual average numbers of benefiting

Their aggregate annual entitlement (in £ million) is the sum, taken over all days in the year, of the daily entitlements of families with these characteristics on the day.

Their average annualised entitlement (in £) is 365 times the average, taken over all days in the year, of the aggregate daily entitlement of these families.

¹ In accordance with the tax credits system, the income used to taper the award was the 2012-13 income, if that was more than £10,000 above the 2011-12 income then 2012-13 income will be lowered by £10,000; if the 2012-13 income was less than the 2011-12 income by more than £2,500 then the 2012-13 income will be enhanced by £2,500.

Minimum award payable	26	26	26	26	26	26	26	26	26	26

¹ Payable to families for any period during which they have one or more children aged under 1.

² Payable for each child up to 31 August after their 16th birthday, and for each young person for any period in which they are aged under 20 (under 19 to 2005-06) and in full-time non-advanced education, or under 18 and in their first 20 weeks of registration with the Careers service or Connexions.

³ Payable in addition to the child element for each disabled child.

⁴ Payable in addition to the disabled child element for each severely disabled child.

⁵ Payable for any period during which normal hours worked (for a couple, summed over the two partners) is at least 30 per week.

⁶ Payable for each qualifying adult for the first 12 months following a return to work.

⁷ Income is net of pension contributions, and excludes Child Benefit, Housing benefit, Council tax benefit, maintenance and the first £300 of family income other than from work or benefits. The award is reduced by the excess of income over the first threshold, multiplied by the first withdrawal rate.

⁸ For those entitled to the Child Tax Credit, the award is reduced only down to the family element, plus the baby addition where relevant, less the excess of income over the second threshold multiplied by the second withdrawal rate.

⁹ Those also receiving Income Support, income-based Jobseeker's Allowance or Pension Credit are passported to maximum award with no tapering.

Appendix C : Revisions

Prior to the 15/16 release of the finalised awards statistics, a comprehensive QA of the end-to-end process was undertaken. This uncovered a number of historical issues affected various tables. It was decided that revisions would be made to these affected tables with their corresponding publications being re-released on 31/07/2017.

Only one methodological change has been applied to this publication: Awards which had been tapered to the level of the family element or lower are now included in tables looking at the number of families benefiting from the childcare and disabled worker elements. (Impacts Tables 1B, 2, 3 and 4)
