**RE: Determination of the application for Llanbrynmair and Carnedd Wen Wind Farms**

Dear Mr Sir

I **OBJECT** to Carnedd Wen and Llanbrynmair windfarms.

Llanbrynmair and Carnedd Wen are close to each other, so the combined effect of both windfarms would be unacceptable in terms of visual, environment, habitat and "effectiveness". The tranquillity of the Welsh countryside is an important component of sustainable development. We have inherited the timeless beauty of these landscapes from our forebears and we recognise our duty to safeguard their serenity for future generations. If we progress with these two applications for even more on-shore commercial wind "farms", future generations will be amazed that we overwhelmed the landscape with such an inefficient and destructive response to reducing pollution. Informed, as they will be, with the true facts, I doubt if they will forgive us.

One objector referenced the Valuing our Environment Partnership (2006) review where it stated "**The environment is fundamental to prosperity in Wales**". The people who live in these areas, value them and need to protect them for the future – we have fought so hard for so long to prevent further wind farms. The whole ethos of local determination and the July 2015 announcement stated that on shore windfarms must be determined locally, and must have local support. Please hear us and help us safeguard Montgomeryshire from even further on-shore windfarm development.

A decision has already been made and published. Please defend that decision and let that be an end to the wind farm descruption.

Yours faithfully
