#### GP Out-of-Hours Surveillance System: England

#### 12 December 2017

#### Year: 2017 Week: 49

#### In This Issue:

Key Messages. Weekly summary. Total contacts. Syndromic indicators. Notes and caveats. Further information. Acknowledgements.

Syndromic indicators at a glance:

Number of contacts and percentage of Read coded contacts.

#### Key messages

#### Data to: 10 December 2017

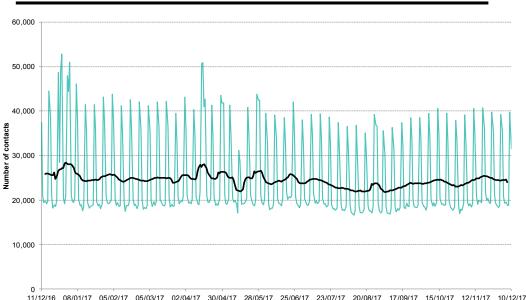

During week 49 there were further decreases in GP consultations for bronchitis/bronchiolitis in young children (figures 4 & 4a). Acute respiratory infection consultations increased in all age groups 15 years and over (figures 2 & 2a).

A Cold Watch System operates in England from 1 November to 31 March each year. As part of the Public Health England Cold Weather Plan for England the PHE Real-time Syndromic Surveillance Team will be monitoring the impact of cold weather on syndromic surveillance data during this period. Cold weather alert level (current reporting week): Level 1 Winter preparedness and action / 3 Severe weather action

| Notes and caveats:                    | <ul> <li>This bulletin presents data from the Public Health England (PHE) GP Out<br/>-of-hours\Unscheduled Care Surveillance System (GP OOHSS).</li> <li>Fully anonymised data from GP out-of-hours (OOH) and unscheduled<br/>care service providers in England are being transferred to the PHE for<br/>analysis and interpretation by the PHE Real-time Syndromic Surveillance<br/>Team (ReSST).</li> <li>This system supplements existing PHE syndromic surveillance systems<br/>by monitoring data on general practitioner consultations outside of routine<br/>surgery opening times (evenings, weekends and bank holidays) and<br/>unplanned contacts within NHS primary care.</li> <li>The key indicators presented within this bulletin are derived by grouping<br/>selected Read coded consultations.</li> <li>GP OOH consultation data are analysed on a daily basis to identify<br/>national and regional trends. A statistical algorithm underpins each<br/>system, routinely identifying activity that has increased significantly or is<br/>statistically significantly high for the time of year. Results from these daily<br/>analyses are assessed by the ReSST, along with analysis by age group,<br/>and anything deemed of public health importance is alerted by the team.</li> <li>Baselines represent seasonally expected levels of activity and are<br/>constructed from historical data. Furthermore, they take into account any<br/>known substantial changes in data collection, population coverage or<br/>reporting practices. Baselines are refreshed using the latest data on a<br/>regular basis.</li> </ul> |
| Further information:                  | The GP Out-of-Hours Surveillance System Bulletin can also be downloaded from the PHE Real-time Syndromic Surveillance website which also contains more information about syndromic surveillance:<br>https://www.gov.uk/government/collections/syndromic-surveillance-systems-and-analyses                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
