RE: Wind farm re-determination

I wish to record my objection to both of these proposed wind farms. The reasons given by our councils and CUP and Map from the previous rounds still stand. The cumulative and sequential impact should be considered when re-determining the outcome for these wind farms, in addition to the wind farms that are already built on the local hillscape.

If approved, the tipping point could be reached and the landscape will change to that of a 'wind farm landscape'. To alter an area's landscape so dramatically cannot be justified. Instead of rolling countryside, there would be around 80 turbines across the hills, together with the associated infrastructure that comes with it.

It will impact the surrounding landscape and make a fundamental change to the character of this exquisite landscape, trashing an ancient and beautiful countryside for the sake of filling the pockets of developers with consumer subsidies. It is "Industrialisation on that scale will destroy one of the most beautiful parts of Britain" (MP - G Davies).
