The Future of Macro-economics, Finance and the Markets

As part of the Development, Concepts and Doctrine Centre's (DCDC) role as Defence's internal think tank, the centre is undertaking a study into the Future of Macro-economics, Finance and the Markets as part of the Global Strategic Trends [GST](#). This study will explore evidence for trends into the future as far as the year 2050, for global macro-economic behaviours, developments in markets and macro-financial practices.

The paper is to have three parts, likely trends, probable trends, and possible outcomes. The first two are to be based, but not exclusively, on linear or directional evidence based trend analysis. Possible outcomes are to be less likely possible scenarios. The paper may be divided into these three themes, or the division may be at the level of individual subjects.

We are interested in a broad range of topics including, but not limited to:

- Capitalism – its evolution
- Economic Warfare in the future
- Banking - the future of
- Trends in the state holding of gold reserves
- The future of trade treaties
- The future efficacy of QE
- Trends in mega-corporations
- Future trends in digital currencies and transactions

Authors are invited to submit a one page outline of the paper they wish to write on this or these topics. Submissions must be original and should not have been published previously. DCDC will review one page submissions and notify authors if they wish to commission the paper.

Key dates: Submission deadline : **12 January 2017**
Author notified : 16 January 2017
Final manuscript due : 08 March 2017

**Ministry
of Defence**
