

# ENERGY AND CLIMATE CHANGE PUBLIC ATTITUDE TRACKER

Wave 22

## Introduction

In March 2012 the Department of Energy and Climate Change launched a tracking survey to understand and monitor public attitudes to the Department's main business priorities. On 14 July 2016, the Department of Energy and Climate Change (DECC) merged with the Department for Business, Innovation and Skills (BIS), to form the Department for Business, Energy and Industrial Strategy (BEIS). As such, the survey is now BEIS's Energy and Climate Change Public Attitudes Tracker (PAT). The PAT still consists of one annual survey every March and three shorter surveys, usually in June, September and December, which repeat a subset of questions where we think attitudes might shift with greater regularity or be influenced by seasonal factors. The tracker is regularly reviewed to ensure that the dataset continues to offer valuable insight. A list of the changes made to date, covering both question content and frequency, is included in the annex.

This report presents summary headline findings from June – July 2017 (Wave 22) and primarily makes comparisons with data from Wave 18 which was conducted at the same point last year (June 2016).

The twenty-second wave of data was collected between 30 June – 4 July 2017 using face-to-face in-home interviews with a representative sample of 2,097 households in the UK. Data was collected using the Kantar TNS Omnibus, which uses a random location quota sampling method. The questionnaire was designed by BEIS and Kantar Public (formerly TNS BMRB) drawing on a number of questions from previous surveys. Questions were refined through cognitive testing. Full details of the methodology are provided in the technical note.

Tables with fieldwork dates and sample sizes for each wave and a complete list of changes to the question set and frequency in the past 12 months is included in the annex of this report.

# Summary of headline findings

This summary provides selected headlines and highlights statistically significant differences between Wave 22 and previous waves. It is not an exhaustive overview of the findings. Please refer to the accompanying excel summary tables and excel dataset to see full responses to all survey questions: <a href="https://www.gov.uk/government/collections/public-attitudes-tracking-survey">www.gov.uk/government/collections/public-attitudes-tracking-survey</a>.

### **Energy Security**

Levels of concern in relation to the UK's future energy security have decreased considerably from the previous wave. This was most notable for 'steep rises in energy prices in the future' (64% concerned at wave 22 compared with 73% at wave 21), and 'power cuts becoming more frequent in the future' (37% concerned at wave 22 compared with 47% at wave 21). However, the wave 22 results remain consistent with the level of concern one year ago (at wave 18).

### **Energy bills**

Worries over paying for energy bills have dropped to their lowest since the tracker began, with only 20% either very or fairly worried about paying their energy bills at wave 22. The level of worry was lowest amongst those with household incomes over £50,000 (12%), 16-24 year olds (13%) and social grade AB (14%). It was highest amongst social renters (27%), 45-54 year olds (27%), those in social grade DE (26%) and those with household incomes between £16,000 and £24,999. These findings vary considerably from wave 21 when 30% were worried about energy bills. However, the findings are consistent with wave 18 (conducted in June-July 2016) which suggests that the results could be affected by seasonal changes.

Between wave 14 and wave 22, the proportion of respondents who were very or fairly worried about their energy bills has remained between 20% and 30%. In earlier waves of the survey levels of worry were much higher – for example, more than half (59%) were very or fairly worried four years ago at wave 5, whilst around half (49%) were very or fairly worried three years ago at wave 9.

The level of relative concern about energy bills versus other household bills has decreased slightly in the last year. When energy bills are compared against other bills at wave 22, 4% were more worried about energy bills than paying for food, transport, and housing costs, compared with 8% at wave 21. This was slightly lower than the result one year ago at wave 18 (6%), and considerably lower than the peak of 14% in wave 8 of the tracker. This may indicate that other bills are becoming more worrying to consumers than energy bills.

#### Energy suppliers and switching

Consumers' levels of trust in energy suppliers on a range of measures were showed little change from recent waves. Respondents remained most likely to trust suppliers to provide a bill which accurately reflects energy use (69%), and to provide a breakdown of the components of your bill (70%).

The proportion of the public that plan to switch energy supplier in the next year has remained stable when compared with the result at the same stage last year. At wave 22 only 6% had firm

plans to switch their supplier in the next year, whilst around a third (28%) felt that they 'may or may not switch supplier'. Six in 10 (61%) stated that they would not be switching supplier. The most likely groups to have firm plans to switch in the next year were those with a household income above £50,000 (17%), and those in social grade AB (10%). In comparison, those aged 24 or under (1%), over 65 (4%), social renters (3%), and with household incomes below £16,000 (2%) were least likely to have plans to switch.

#### Energy saving and wasting

The proportion of people that claim to give a lot of thought to saving energy in the home remained very stable since wave 18. Just under a quarter claimed to give a lot of thought to saving energy at home (23%), whilst half claimed to give it a fair amount of thought (49%). The findings at wave 22 are very similar to those at all previous annual waves conducted at this point of the year.

#### Renewable energy

Support for renewable energy has been consistently high during the tracker at around 75-80%. This pattern has continued at wave 22, with 77% expressing support for the use of renewables. Opposition to renewables was very low at 4%, with only 1% strongly opposed.

#### Nuclear energy

Support for the use of nuclear energy has remained fairly stable over the life of the tracker. At wave 22, 35% supported nuclear energy compared with 21% who were opposed. Those with an annual household income of £50,000 or more (46%), males (45%), those aged over 65 (43%), and those in social grade AB (42%) were the most likely to support the use of nuclear energy.

Four in ten (41%) selected the neutral option at this question, to indicate that they neither support nor oppose the use of nuclear energy.

#### Radioactive waste

At wave 22, 15% said they knew a lot or a fair amount about the way the UK manages radioactive waste, whilst 85% knew not very much or nothing at all. These results are consistent with other previous waves.

At wave 22 more than four in ten (41%) claimed to have some knowledge of Geological Disposal Facilities (GDF). Most who were aware did not have a lot of knowledge; 19% said they were aware but did not really know what they are, and 19% knew a little about them. Only 3% said they knew a lot about GDF. Knowledge of GDF differs by gender and also social grade, with men (49%) more likely to claim knowledge than women (34%), and those in higher social grades AB (54%) much more likely to claim knowledge than those in social grades DE (33%). Those who earn £50,000 were also more likely to claim knowledge (54%).

#### Shale gas

Three quarters of the public were aware of fracking at wave 22 (78%). Awareness of fracking has remained very stable over the last three years of the tracker, following a significant increase between wave 2 (42%) and wave 8 (70%). However, despite many people being aware of fracking, only a small proportion claimed to have detailed knowledge. At wave 22, 13% claimed to know a lot about fracking, whilst 47% said they knew a little, and 18% were aware of it but didn't really know what it was. These findings have remained fairly consistent over the course of the tracker. Awareness of fracking was higher for those in social grade AB (90%), aged over 65 (90%), with incomes over £50,000 (91%), and home owners (88%).

When asked whether they support or oppose extracting shale gas, half of the public (48%) neither supported nor opposed it, with a further 3% saying they did not know whether they supported or opposed. This is likely to partly reflect a lack of knowledge about fracking. Of those who did offer an opinion, more people were opposed (33%) to fracking than supported it (16%). Support for fracking has decreased over the last year, from 21% at wave 18 to 16% at wave 22.

Follow-up questions were also asked at wave 22 to identify the most common reasons why people support, oppose, or are neutral towards fracking.

The most common reason for supporting fracking was the need to use all available energy sources (42%). This category has seen an increase since wave 21 (when the level was 35%) and an overall increase since the question was included at wave 16. Other reasons for supporting fracking remained consistent, which include reducing dependency on other fossil fuels (31%), reducing dependency on other countries for UK's energy supply (28%), that it may result in cheaper energy bills (28%) and fracking being good for local jobs and investment (26%).

The most common reason for opposing fracking was the loss or destruction of natural environment (68%). Again, this was an increase from wave 21 (56%) and an overall increase since this question was included at wave 16. Other commonly cited reasons included the risk of contamination to water supply (25%), that it's generally not a safe process (25%), that there is too much risk or uncertainty to support at present (23%) and that there is a risk of earthquakes (20%). The proportion of respondents selecting each of these reasons dropped since the last wave, perhaps indicating an increased focus on the destruction of the natural environment as a reason for opposing fracking.

Of those who were neutral or did not know whether they support or oppose fracking, the majority put this down to not knowing enough about it (73%).

## Heating

A question was included in wave 22 asking respondents if they had heard of the Domestic Renewable Heat Incentive (DRHI); this question was only previously asked in wave 15. The level of awareness is unchanged from wave 15. At wave 22 12% had heard of the DRHI and 88% had not heard of it. Those who earned £50,000 or more (22%), those aged 45-54 (18%), those in social grade AB (16%) and male (14%) were more likely to have heard of the DRHI.

#### Technical notes

The results shown here are based on 2,097 face-to-face in-home interviews conducted with a representative sample of UK adults aged 16+. Fieldwork was conducted between 30th June 2017 and 4th July 2017 on the Kantar TNS Omnibus, which uses a random location quota sampling method. The questionnaire was designed by BEIS and Kantar Public drawing on a number of questions from previous surveys. Questions were refined through cognitive testing. The representativeness of the data was controlled through sample design, fieldwork quotas and post-fieldwork weighting. The data was weighted for the following characteristics: sex, age, social grade, region and tenure. Results included here are based on weighted data.

Please refer to the full technical note at <a href="www.gov.uk/government/publications/public-attitudes-tracker-technical-note-on-use-of-wave-1-and-wave-2-datasets">www.gov.uk/government/publications/public-attitudes-tracker-technical-note-on-use-of-wave-1-and-wave-2-datasets</a> for further details.

# Annex

Table 1. Fieldwork dates and sample sizes for each wave

	Fieldwork dates	Sample size
Wave 1	21 - 25 March 2012	2,121
Wave 2	27 June - 1 July 2012	2,100
Wave 3	26 - 30 September 2012	2,118
Wave 4	12 December 2012 - 2 January 2013	2,107
Wave 5	27 - 31 March 2013	2,051
Wave 6	3 - 7 July 2013	2,124
Wave 7	25 - 29 September 2013	2,103
Wave 8	11 - 15 December 2013	2,110
Wave 9	26 - 30 March 2014	2,040
Wave 10	25 - 29 June 2014	2,087
Wave 11	24 - 28 September 2014	2,103
Wave 12	10 December 2014 - 8 January 2015	2,119
Wave 13	18 - 29 March 2015	1,981
Wave 14	24 - 28 June 2015	2,118
Wave 15	23 - 27 September 2015	2,121
Wave 16	9 -13 December 2015	2,121
Wave 17	23 March 2016 - 27 March 2016	2,105
Wave 18	29 June - 3 July 2016	2,114
Wave 19	28 September - 2 October 2016	2,080
Wave 20	14 – 18 December 2016	2,138
Wave 21	29 March – 2 April 2017	2,180
Wave 22	30 June – 4 July 2017	2,097

Table 2. Changes to question set and frequency

Question	Frequency
<ul> <li>Q4) How often, if at all, do you personally do any of the following?</li> <li>a) Leave the lights on when you are not in the room</li> <li>b) Boil the kettle with more water than you are going to use</li> <li>c) Wash clothes at 30 degrees or lower</li> <li>d) Try to keep rooms that you are not using at a cooler temperature than those you are using</li> <li>e) Leave the heating on when you go out for a few hours</li> </ul>	Q4_d and Q4_e asked in the Annual wave from wave 13.
<ul> <li>Q7) Which answer best applies to you and your household at the moment with regards to the following measures to heat your home and/or provide hot water?</li> <li>Installing a biomass boiler (this may involve burning wood logs, pellets or chips to provide central heating and/or hot water)</li> <li>Installing an air source heat pump</li> <li>Installing a ground source heat pump</li> <li>Installing solar thermal panels (this means solar panels for hot water, not solar PV panels which generate electricity)</li> <li>Replacing an older gas boiler with a more efficient condensing gas boiler</li> <li>Installing a micro-CHP (combined heat and power) unit</li> </ul>	Question removed after wave 17.
Q7_1) The next question is about renewable heat. By renewable heat we mean heating systems which use energy from biomass or the sun, or which use electricity to draw heat from the ground, water, or air to heat your home. This does not include solar panels which produce electricity. How much would you say you know about renewable heat?  • Knew a lot about it • Knew a little about it • Aware of it but did not really know what it was • Never heard of it	Moved to Bi-annual wave (winter) from wave 20 (published on an annual basis).
Q7_1A) How much, if anything do you know about the following types of renewable heating system (air source heat pumps, ground source heat pumps, biomass boiler)?  • Know a lot • Know a little about it • Aware of it but did not really know what it is • Never heard of it	New question in wave 15. Moved to the Bi-annual wave (winter) from wave 20 (published on an annual basis). Filtered to only ask those who say they know about renewable heating (from wave 20).

Question	Frequency
Q7_2) Thinking about these types of renewable heating system, how positive or negative would you say you are towards the idea of having a renewable heating system in your home?  • Very positive • Fairly positive • Neither positive nor negative • Fairly negative • Very negative • Don't know	Question removed after wave 17.
Q7_3) And still thinking about renewable heating systems, how much do you agree or disagree with the following statement?  • Strongly agree • Slightly agree • Neither agree nor disagree • Slightly disagree • Strongly disagree • Don't know	Moved to the Biannual Wave (winter) from Wave 20 (published on an annual basis). Filtered to only ask those who say they know about renewable heating (from Wave 20).
<ul> <li>Q7_6) How confident are you that?</li> <li>A ground source heat pump would provide/provides enough heat to keep my home at a reasonable temperature</li> <li>A ground source heat pump would be/is reliable</li> <li>A ground source heat pump would be/is affordable</li> <li>A ground source heat pump would be/is easy to use</li> </ul>	Question removed after wave 17.
Q7_7a) Which of the following would you trust to provide advice about which heating system to install in your home?  • A tradesperson (e.g. builder, plumber, gas fitter) • Heating system manufacturer • Friends/Family • Your energy supplier/another energy supplier • Green Deal assessor / adviser • The Energy Saving Advice Service (ESAS) or Home Energy Scotland • Your housing association • Your landlord • A company that installs renewable heating systems • Other (specify) • None of these • Don't know	Moved to Bi-annual Wave (winter) from Wave 20 (published on an annual basis).

Question	Frequency
Q7_7b) And which one would you trust the most to provide advice about which heating system to install in your home?  (same answer options as in Q7_7a)	Moved to Bi-annual Wave (winter) from Wave 20 (published on an annual basis).
Q7_8) How much attention do you pay to the amount of heat you use in your home?  • A lot • A fair amount • Not very much • None at all • Don't know	New question in Wave 15. Annual from March 2016. Moved to Bi-annual Wave (winter) from Wave 20 (published on an annual basis).
<ul> <li>Q7_9) You said that you pay [a lot/ a fair amount] of attention to the amount of heat you use in your home. What is the main reason for this?</li> <li>To minimise the amount of money you spend on heat</li> <li>To minimise the environmental impact of the heat you use</li> <li>I want to make sure me/my household has sufficient heat to be comfortable</li> <li>I struggle to control the amount of heat used</li> <li>I want to keep control over the amount of heat used</li> <li>Other reason (please specify)</li> <li>Both of these equally</li> <li>Neither of these / for another reason</li> <li>Don't know</li> </ul>	New question in Wave 15. Moved to Bi-annual Wave (winter) from Wave 20 (published on an annual basis).
Q7_10) You said that you pay [not very much/ no] attention to the amount of heat you use in your home. What is the main reason for this?  I use as much heat as is needed to be comfortable I don't feel I can control the amount of heat used I'm just not interested in the amount of heat used I set controls at a level I'm comfortable with and then don't need to adjust them Other reason (please specify) Some/all of these reasons equally None of these / for another reason Don't know	New question in Wave 15. Moved to Bi-annual Wave (winter) from Wave 20 (published on an annual basis).

Question	Frequency
<ul> <li>Q7_11) Now thinking about your heating system. Which of the statements on this screen comes closest to your view?</li> <li>I will only replace my heating system when my current one breaks down or starts to deteriorate</li> <li>I would consider replacing my heating system while it is still working</li> <li>Not my decision to make because I'm renting the property/living with parents</li> <li>Don't know</li> </ul>	New question in Wave 15. Moved to Bi-annual Wave (winter) from Wave 20 (published on an annual basis).
<ul> <li>Q7_12) Which of these would be the more important consideration in changing your heating system?</li> <li>Saving money on what you spend on bills at present</li> <li>Switching to a more environmentally friendly heating system</li> <li>Having a more reliable heating system than my current one</li> <li>Both of these equally</li> <li>Neither of these / for another reason (state)</li> <li>Don't know</li> </ul>	New question in Wave 15. Moved to Bi-annual Wave (winter) from Wave 20 (published on an annual basis).
Q7_13) Have you heard of the Domestic Renewable Heat Incentive?  • Yes • No • Don't know	New question in Wave 15 (not asked in subsequent waves).
<ul> <li>Q15c) You said that you support hydraulic fracturing for shale gas, otherwise known as fracking. Why is this?</li> <li>Good for local jobs and investment</li> <li>Reduces dependence from other countries for UK's energy supply</li> <li>Reduces dependence on fossil fuels (coal, oil)</li> <li>Need to use all available energy sources</li> <li>Will have positive impact on climate change / meeting carbon reduction targets</li> <li>May result in cheaper energy bills</li> <li>Will have positive impact on UK economy</li> <li>Won't affect me/my local area so no personal impact</li> <li>Positive reports in the media</li> <li>Community benefits (included from Wave 19)</li> <li>Shale Wealth Fund (included from Wave 19)</li> <li>No specific reason (SINGLE CODE)</li> <li>Other (specify)</li> <li>Don't know</li> </ul>	New question in Wave 16. Quarterly from Wave 17.

Question	Frequency
Q15d) You said that you oppose hydraulic fracturing for shale gas, otherwise known as fracking. Why is this?  Loss/destruction of natural environment Increased traffic/noise/disruption Local house prices will fall Use of chemicals in the process Should focus on developing renewable energy sources Should focus on developing other energy sources Risk of contamination to water supply Risk of earthquakes Negative impact on climate change / meeting carbon reduction targets Not a safe process Will not be regulated effectively Negative reports in the media Too much risk / uncertainty to support at present No specific reason (SINGLE CODE) Other (specify)	New question in Wave 16. Quarterly from Wave 17.
Q15e) You said that you neither support nor oppose hydraulic fracturing for shale gas, otherwise known as fracking. Why is this?  Don't know enough about it Not interested in it I can see the positives and negatives Haven't made up my mind yet Will have no impact on me There are many vocal campaigns and I don't know what to believe Have never heard of it Other (specify) Don't know	New question in Wave 17. Quarterly from Wave 17.
<ul> <li>Q20a) Over the course of a year, which of these do you think uses the most energy in your home?</li> <li>Large appliances (e.g. fridge, washing machine)</li> <li>Small appliances (e.g. toasters, hair dryers, vacuum cleaners)</li> <li>Technological appliances (TV, laptop, phone - including charging these)</li> <li>Keeping the house warm with central or other heating</li> <li>Hot water I use (e.g. for showering, washing up)</li> <li>Don't know</li> </ul>	New question in Wave 15. Bi-annual from Wave 17.

Question	Frequency
Q20b) Over the course of a year, which of these do you think uses the second most energy in your home?  (same answer options as in Q20a)	New question in Wave 15. Bi-annual from Wave 17.
Q23a) I'm now going to ask you how concerned you are about various things happening in the future. When I talk about 'the future' I mean the next 10-20 years. When answering please think about how concerned you would be if this happened, rather than how likely you think it is to happen. So, how concerned, if at all, are you about  • Steep rises in energy prices in the future  • UK supplies of fossil fuels not being sufficient to meet the UK's demand for them	Bi-annual
<ul> <li>Q23b) And still thinking about the next 10-20 years, how concerned, if at all, are you about</li> <li>Power cuts becoming more frequent in the future</li> <li>The UK becoming too dependent on energy from other countries</li> <li>The UK not investing fast enough in alternative sources of energy</li> <li>The UK not developing technology to use existing sources of fossil fuels sufficiently</li> </ul>	Bi-annual
Q23c) You said that you are [very / fairly] concerned about the UK becoming too dependent on energy from other countries. When you gave this answer, were you thinking about specific energy types?  No specific sources Oil Gas Electricity Other source (specify) Don't know	New question in Wave 16. Bi-annual from the Wave 17.
<ul> <li>Q24a) Do you know what the Energy performance certificate (EPC) rating for your property is?</li> <li>Yes, I know the exact rating</li> <li>Yes, I have a sense of what the rating is</li> <li>I'm aware of EPCs but I don't know what the EPC rating for my home is</li> <li>I've not heard of EPCs</li> </ul>	New question in Wave 15. Annual from Wave 17.

Question	Frequency
Q26a) How much, if anything, do you know about the way the UK currently manages radioactive waste?  • A lot • A fair amount • Not very much • Nothing at all	Quarterly
Q26b) The next question is about Geological Disposal Facilities. These are deep underground facilities for the permanent disposal of radioactive waste. Before today, how much, if anything, did you know about the UK's plans to dispose of radioactive waste in Geological Disposal Facilities in the UK?  • Knew a lot about them • Knew a little about them • Aware of them but don't really know what they are • Never heard of them	Quarterly
Q35) Which of these energy types do you think is most used by UK households overall?  • Gas • Electricity (including renewable energy) • Petroleum • Bioenergy and waste • Solid fuels (wood, coal) • Other • Don't know	Piloted in Wave 16. Replaced with Q37, Q38 and Q39.
Q36) And which energy type do you think is second most used by UK households overall?  (same answer options as Q35)	Piloted in Wave 16. Replaced with Q37, Q38 and Q39.
Q37) As far as you know, which of these are used as energy sources in your home – for example, to provide heating or to power appliances? Please exclude anything used outside of your home – for example fuel for vehicles.  • Electricity • Natural gas (mains gas) • Bottled gas • Oil • Wood • Coal • Other • Don't know	Replaced Q35 and Q36. Piloted in Wave 19.

Question	Frequency
Q38) And over the course of the year, which of these types of energy do you think your household spends the most money on?	Replaced Q35 and Q36. Piloted in Wave 19.
(same answer options as Q37)	19.
Q39) And over the course of the year, which of these types of energy do you think your household spends the next most money on?	Replaced Q35 and Q36. Piloted in Wave 19.
(same answer options as Q37)	
Q8) Before today, had you heard of smart meters?	Increased frequency to bi-annual from Wave 19.
IF YES ASK: Do you have one?	
<ul> <li>Yes, I have one</li> <li>Yes, but I do not have one</li> <li>No – I have never heard of them</li> </ul>	
Q9) Were you given an in-home energy display or energy monitor at the time your smart meter was installed? An in-home energy display is a portable device that displays current and how much it is costing or will cost.	Question asked only in Wave 17.
<ul> <li>Yes, I look at it every day</li> <li>Yes, I look at it occasionally</li> <li>Yes, but I never look at it</li> <li>Yes, but I have never installed it</li> <li>No, I was not offered one</li> <li>No, I was offered one but refused it</li> <li>Don't know</li> </ul>	
Q41-51) See Wave 20 questionnaire for question text	New questions in Wave 20.
Q52) As far as you know, do you have a condensing boiler in your home? If you're not sure, any gas boiler installed since 2006 will be condensing. Any oil boiler installed since 2008 will be condensing.	New question in Wave 20.
<ul> <li>Yes – have a condensing boiler</li> <li>No – don't have a condensing boiler</li> <li>Don't know</li> </ul>	
Q53) How likely do you think you are to install a condensing boiler in your home over the next few years?	New question in Wave 20.
<ul><li>Very likely</li><li>Fairly likely</li></ul>	
Not very likely	
<ul><li>Not at all likely</li><li>Don't know</li></ul>	
30	

Question	Frequency
Q25) How likely do you think you will be to join a heat network like this if you were given the opportunity? When answering please assume that you would pay no more for your heating bills than you do at present.	From Wave 21, filtered to only ask those who say they know about heat networks.
<ul><li>Very likely</li><li>Fairly likely</li></ul>	
Not very likely	
Not at all likely	
<ul><li>Already joined one</li><li>It depends</li></ul>	
Don't know	
Q25i) From what you know, or have heard about heat networks, generally how positive or negative would you say you are towards them?  • Very positive • Fairly positive • Fairly negative • Very negative • Don't know	From Wave 21, filtered to only ask those who say they know about heat networks.
Q.7_13 Have you heard of the Domestic Renewable Heat Incentive?	Question asked only in wave 22.
• Yes	
• No	
Don't know
