

29 November 2017

Year: 2017 Week: 47

**Syndromic  
surveillance national  
summary:**

## Reporting week: 20 November to 26 November 2017

During week 47 there were further increases in selected respiratory indicators. In young infants aged <1 year bronchiolitis and asthma indicators increased further in line with recent increases in laboratory reports for respiratory syncytial virus (RSV).

**Remote Health  
Advice:**

During week 47 there were continued increases in NHS 111 cough calls, particularly in the under 1 year age group (figures 4 & 4a). These findings are consistent with recent increases in laboratory reports for respiratory syncytial virus (RSV).

**GP Out of Hours:**

There were further small increases in consultations for bronchitis/bronchiolitis and difficulty breathing/wheeze/asthma during week 47 (figures 4 & 5). Increases were mainly noted in the <1 year age group (figure 4a & 5a), in line with continued increases in laboratory reports for respiratory syncytial virus (RSV).

## Syndromic surveillance summary notes

- Key messages are provided from each individual system.
- The different syndromic surveillance systems in operation within PHE access data from different areas of the national health care system.
- Each system is able to monitor a different selection of syndromic indicators based upon a different case mix of patients.
- Access to the full version of each syndromic surveillance bulletin is available through the Syndromic Surveillance website found at: (<https://www.gov.uk/government/collections/syndromic-surveillance-systems-and-analyses>); reports will be made available on Thursday afternoons.
- Further weekly and annual reports are available from the RCGP Research and Surveillance web pages: <http://www.rcgp.org.uk/clinical-and-research/our-programmes/research-and-surveillance-centre.aspx>

## Syndromic surveillance systems

---

### Remote Health Advice

*A remote health advice syndromic surveillance system that monitors syndromic calls from remote health advice services e.g. NHS 111 each day across England*

### GP In-Hours Syndromic Surveillance System

*A large UK-based general practitioner surveillance system monitoring daily consultations for a range of clinical syndromic indicators*

### Emergency Department Syndromic Surveillance System (EDSSS)

*A sentinel ED network across England monitoring daily attendances and presenting symptoms/diagnoses*

### GP Out-of-Hours Syndromic Surveillance System (GPOOHS)

*A syndromic surveillance system monitoring daily GP out-of hours activity and unscheduled care across England using a range of clinical syndromic indicators*

### RCGP Weekly Returns Service (RCGP WRS)

*A sentinel GP surveillance network covering England and Wales monitoring weekly consultations for a range of clinical indicators. This surveillance system is coordinated by the RCGP Research and Surveillance Centre*

---

## Acknowledgements:

We thank and acknowledge the contribution of all data providers including:

- NHS 111 and HSCIC
  - Participating EDSSS emergency departments
  - College of Emergency Medicine
  - Advanced Health & Care and the participating OOH service providers
  - QSurveillance®; University of Nottingham; EMIS/EMIS practices; ClinRisk®
  - TPP, ResearchOne and participating SystmOne GP practices
