Access to Work: Official Statistics

April 2016

Executive summary

32,150 individuals were helped by Access to Work between 1st April 2015 and 31st December 2015.

36,780 individuals were helped by Access to Work in the 2014/15 financial year (1st April 2014 to 31st March 2015).

1 Introduction

1.1 Access to Work

1.1.1 Summary

This summary contains figures on Access to Work in Great Britain from April 2007, up to and including December 2015. Annex A provides more detailed breakdowns. Due to the data being extracted from a live operating system which is constantly updated (e.g. backdated claims being added to the system), some of the figures previously published (particularly for more recent months) may be subject to revision as more complete data becomes available.

Coverage: Great Britain

Next release date: July 2016

1.1.2 Background

Access to Work began in 1994. The purpose of Access to Work is to help pay towards the equipment an individual needs at work; a communicator at job interviews, adapting premises to meet an individual's needs, or paying a support worker. It can also pay towards the cost of getting to work if an individual cannot use public transport.

1.1.3 Methodology

The Access to Work figures in this publication are derived from the DiSC3 (Disability Service Client) database. Access to Work advisors enter information relating to a person and their claim onto DiSC. The resulting data is extracted from the system and sent to DWP analysts to measure aspects of the programme's performance.

1.1.4 Commentary around trends and changes to Access to Work

Operational changes implemented in April 2010 required large employers to contribute more towards their employees who required Special Aids and Equipment / Adaptations to Premises. This change resulted in more resources being available to help smaller employers and to fund longer term support through Access to Work. In December 2010, an operational change resulted in more specific guidance being issued to clarify what could not be funded through Access to Work as it was regarded as standard for employers to provide.

The net effect of these changes was a reduction in the number of new customers helped by the programme in the 2011/12 financial year, mainly individuals with Special Aids and Equipment / Adaptations to Premises awards. This in turn had a knock on effect to the number of customers continuing to benefit from Access to Work Special Aids and Equipment support in 2012/13 and subsequent years. Individuals mainly affected were those with physical problems affecting areas such as arms / hands / back / neck / legs / feet.

However, the overall number of customers helped by Access to Work has increased each year since 2011/12. The largest increases relate to people with a primary medical condition recorded as dyslexia or mental health condition.

1.1.5 Quality of data

Data published within these statistics are subject to a series of process, guidance and checking procedures. There are 3 points at which a new DiSC record for customers is completed and validated by separate Access to Work staff:

- new customers have a DiSC record created by the Telephony First Contact team in Network Service Delivery (NSD)
- an advisor then contacts customers and establishes that the details held are correct and progresses a decision on support
- a Maintenance team advisor concludes the customer record and enables the customer account for payment.

Existing customers have a change of circumstances at a rate of about 1 in 3. An annual review for on-going support gives a further opportunity to validate details held on customers and confirm they are correct.

The basic integrity of amounts paid to customers via DiSC, and the numbers of customers within the live data is maintained to enable correct administration of the customer awards. Estimates of official error are low (<0.02%), and give assurance that core details are correct.

Although the programme has been in operation since 1994, an operating system change occurred in April 2007 where data was migrated across from the previous legacy system, meaning not all supporting fields within DiSC are populated or

maintained. As a result, reliable programme performance data is only available as far back as April 2007.

There are some limitations to the data. It cannot be used to identify the proportion of applicants who are successfully awarded Access to Work. Information relating to a person's employer or the amount their employer contributes towards an Access to Work award is also not of a publishable standard.

Quality assurance checks are carried out comparing current figures to those included in the previous publication to help ensure there are no erroneous increases or decreases in the figures. Other quality assurance is carried out to check for:

- duplicate, missing or contradictory information
- consistency with management information
- trends and variation in characteristic, time series and geographical breakdowns.

DWP quality guidelines are published at:

<https://www.gov.uk/government/collections/dwp-statistics-policies-and-procedures>

1.1.6 User feedback

Comments or suggestions are welcomed from users of these statistics, on additional information you would like to see included in this publication. If you are interested in engaging with us to help us improve this statistical publication, please contact us via the e-mail address on page 2 of this publication.

A summary on the uses and users of Access to Work statistics can be found via the link below:

2 Headline Statistics

These statistics are figures for all Access to Work customers in Great Britain in the current financial year.

2.1 Numbers Helped and Continuing to Benefit from Access to Work

2.1.1 Numbers helped (April 2015 to December 2015)

32,150 individuals helped, of which:

- 23,660 were existing customers
- 8,490 were new customers

2.1.2 Further numbers continuing to benefit from Access to Work (April 2015 to December 2015)

- 7,590 individuals continuing to benefit from Access to Work¹

¹ Number of individuals who are not counted within the numbers helped, but for whom there is a Special Aids and Equipment element where approval has been made (including nil cost) and the element was available within the previous two years, and the individual is deemed to still be benefiting from this.

3 Access to Work process

3.1 The key aspects of the Access to Work process

The first point of contact for a customer is an Access to Work Contact Centre Agent. There are three Contact Centres across Great Britain, in Exeter, Glasgow, and Annesley. Applications can be made via telephone, e-mail or post and are routed through one of the two DWP mail handling centres in Wolverhampton, where the mail is sorted and sent on to the Operational Support Unit (OSU) in Harrow. Cases are then allocated to an Access to Work adviser. After the initial contact, customers can nominate an advocate to take forward the application on their behalf if required.

An individual may be able to get Access to Work if they are:

- in a paid job
- unemployed and about to start a job
- unemployed and about to start a Work Trial
- unemployed and about to start a Work Experience placement through the Youth Contract (from 1st October 2012)
- self-employed

and their disability or health condition stops them from being able to do parts of their job.

An individual's disability or health condition may not have a big effect on what they do each day, but may have a long-term effect on how well they can do their job.

The amount of help which an individual may receive from Access to Work will vary depending on how long they have been employed, what support they need and whether they are self-employed.

Access to Work can pay up to 100 per cent of the approved costs if an individual is:

- unemployed and starting a new job
- self-employed
- working for an employer and has been in the job for less than six weeks

Whatever an individual's employment status, Access to Work will also pay up to 100 per cent of the approved costs of help with:

- Support workers
- Fares to work
- Communicator support at interview

Access to Work pays a proportion of the costs of support if all of the following apply to an individual:

- they're working for an employer
- they've been in the job for six weeks or more
- they need special equipment or adaptations to premises

The precise level of cost sharing is agreed between the employer and the Access to Work adviser.

After between one and three years, Access to Work will review an individual's circumstances and the support they're receiving.

In December 2011, Access to Work introduced a new Mental Health Support Service. This service is delivered on Access to Work's behalf by Remploy and offers support for those with mental ill health moving into work or needing help to retain their current employment.

Claimants on Permitted Work Higher Limit, Supported Permitted Work and Permitted Work Limited Capability for Work Related Activity are eligible for Access to Work support but are limited to a maximum of 52 weeks in line with Permitted Work Higher Limit time rules. After a 52 week break, claimants can re apply for Access to Work support for a further 52 weeks. Further information around Permitted Work can be found via the following link: <https://www.gov.uk/employment-support-allowance/eligibility>

Claimants who are on the Work Programme are eligible for some support through Access to Work, although there are restrictions on some elements. The programme can provide:

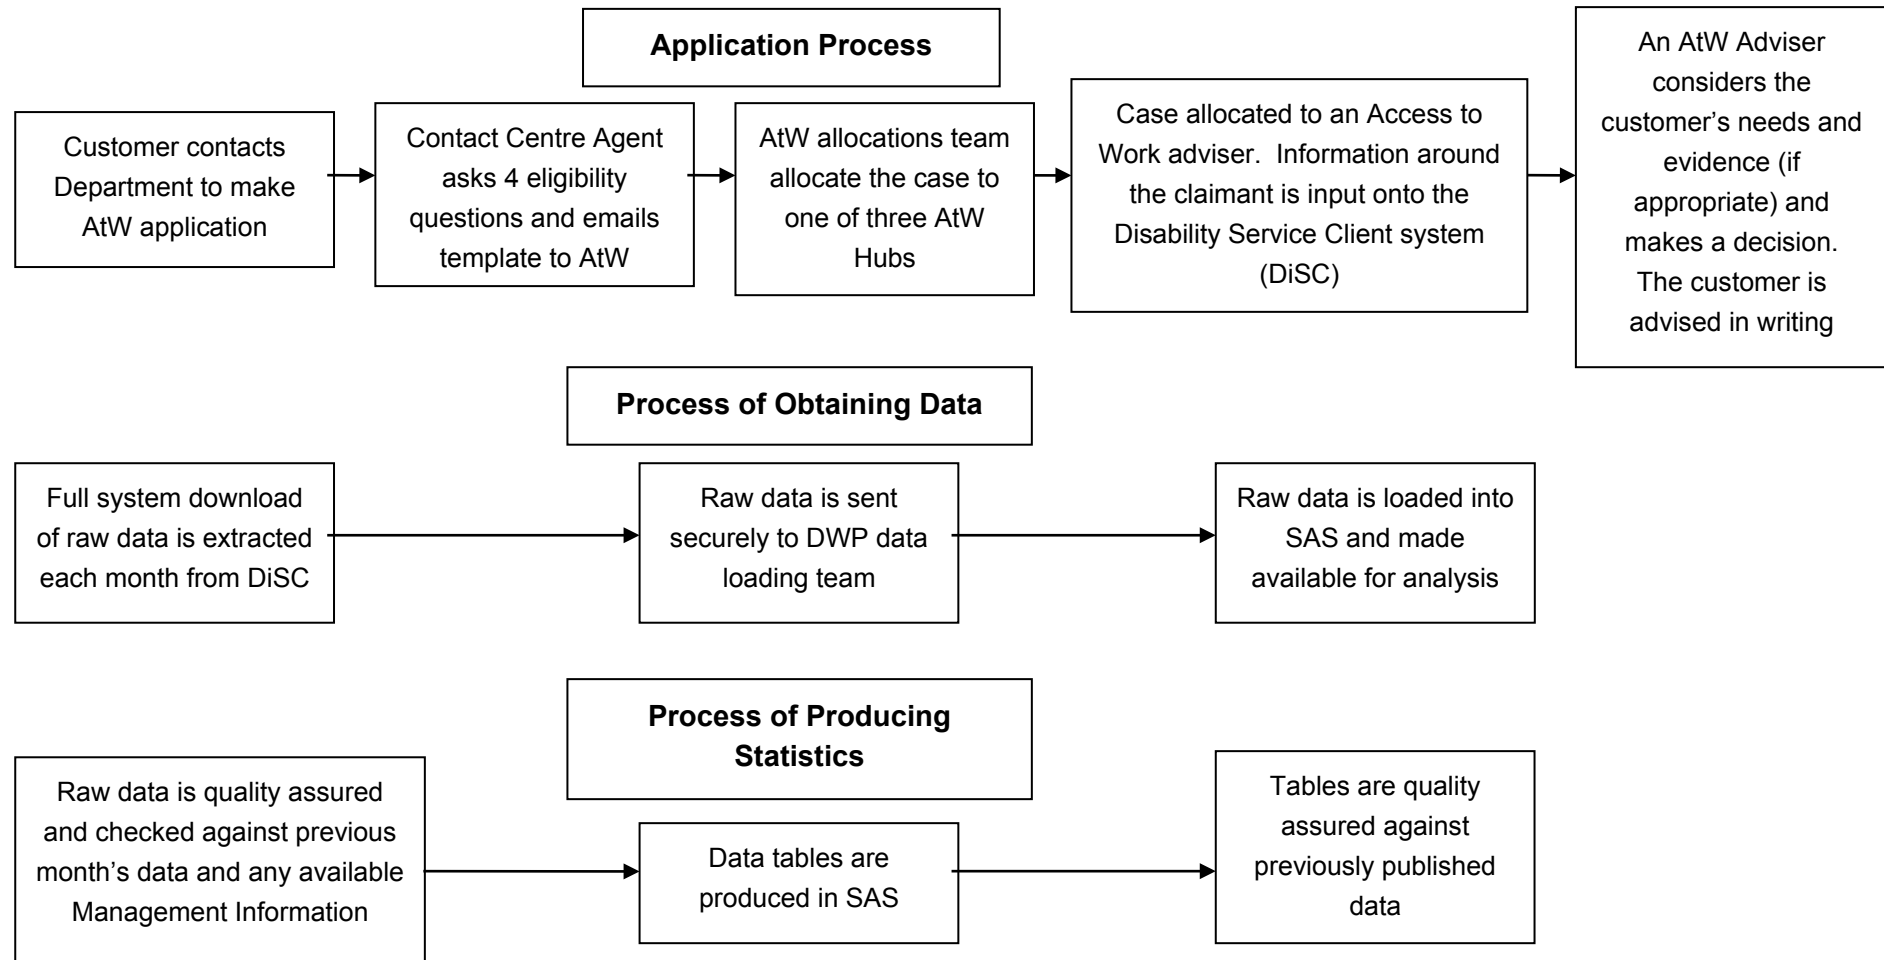

- Special Aids & Equipment to enable a disabled person to do their job.
- Adaptations to equipment to make it accessible.
- Additional costs of travel to work for people who are unable to use public transport because of their disability or health condition.
- Travel in Work
- Support Worker in the workplace, such as:
 - a reader for a visually impaired person.
 - an interpreter for someone with hearing difficulties.

For claimants on the Work Programme, Access to Work cannot support the provision of:

- Job Aide, Job Coach, Counsellor or Travel Buddy
- Communication Support at Interview.

Access to Work is not normally available to people doing voluntary unpaid work, with the exception of those undertaking a voluntary Work Experience placement through the Youth Contract.

3.2 Access to Work process flow chart

Annex A: Access to Work Breakdowns

See section 1.1.4 for commentary around trends. Figures are rounded to the nearest 10. Totals may not sum due to rounding or missing values. Financial years followed by the letter “R” are those which have had their totals for the year revised following the last publication. Revisions are generally less than + or - 1%. See Annex B for definitions used in tables below and explanation of revisions (also section 1.1.1).

Table 1: Number of individuals helped each financial year, by whether an existing customer or a new customer helped

Customer Type	2007-08	2008-09	2009-10	2010-11	2011-12	2012-13	2013-14	2014-15 R	Q1, Q2 and Q3 2015-16	Total numbers helped since April 2007

Annex B: Technical Note

Headline statistics – section 2.1.2 - the numbers continuing to benefit for the current financial year may change as more up to date data on numbers helped becomes available. If an individual received a Special Aids and Equipment (SAE) award on 1st May 2007, they are classed as being helped in the 2007/08 financial year, and are classed as continuing to benefit from that SAE in the 2008/09 and 2009/10 financial years. However, when the numbers helped for the current financial year are updated, we may subsequently find that the individual received another SAE in the 2009/10 year. To avoid double counting this individual within the current year the individual is counted as being helped in the 2009/10 year from their new SAE award, but are removed from the numbers continuing to benefit. The individual will, however, be counted as continuing to benefit from their new SAE in the 2010/11 and 2011/12 years, provided they don't receive another SAE in either of those two years.

Tables 1 to 4 – Each individual is counted once in each financial year. This shows the number of individuals who have been assessed within the year or for whom there is an element where approval has been made (including nil cost) and the element has been made available within the year. If a person has been helped in more than one financial year, they are only counted once in the total numbers helped since April 2007 column. A person is classed as a new customer if it is the first time they have ever received Access to Work support. Once that first Access to Work award has ended, if they renew that award or begin a new award, they will then be counted as an existing customer from that point onwards. Numbers for more recent years are subject to revision in future publications due to late claims being added to the system. Primary medical condition recorded is based on a self-definition of an individual's medical condition, and the condition recorded reflects the barrier the customer faces in finding employment.

Table 5 – Further numbers who continue to benefit with receipt of Special Aids and Equipment (SAE) in previous two financial years. Each individual is counted once in each year. These are individuals for whom there is a SAE element where approval has been made (including nil cost) and the element was available within the previous two years, and the individual is deemed to still be benefiting from this. When comparing the same financial year between Tables 1 to 4 and 5, these individuals will be counted in Tables 1 to 4 in one or both of the previous two financial years, but are not counted as being helped in the same financial year. If a person has continued to benefit from a SAE element in more than one financial year, they are only counted once in the total who have continued to benefit since April 2007 column.

Table 6 and 7 – Each person is only counted once across all financial years. This measure differs from the numbers helped as it simply counts new customers who have received support in each period. Numbers for more recent years are subject to revision in future publications due to late claims being added to the system.

Table 8 – A person may receive more than one element. Therefore the sum of the awards is greater than the numbers helped in any given financial year. Numbers for more recent years are subject to revision in future publications due to late claims being added to the system.
