Introductory note

This introductory note does not form a part of the notice.

The following notice gives notice of the surrender in part of an environmental permit.

Brocklesby Ltd reprocess recovered oils and fats originating from a variety of sources to produce either technical oils for use in the chemical industry or biofuel (fatty acid methyl ester (FAME)).

The Schedule 1 activity undertaken at this installation is:

- Section 4.1 A (1) a) (ii) for production of esters

There are also Directly Associated Activities:

- Abatement systems for controlling odour
- Production of steam in boilers
- Heat and physical treatment of non-hazardous oils and fats before use in esterification reaction.

There is also one waste operation:

- Hazardous and non-hazardous waste recovery activity.

This surrender relates to areas of land within the existing permit boundary that are being surrendered to help facilitate the construction and operation of an anaerobic digestion (AD) plant on an adjacent site. This AD Plant, Brocklesby Biogas AD Plant, will be operated by Advantage Biogas Limited. The AD plant has five associated combined heat and power (CHP) engines – one of which, CHP5, will be located within the Brocklesby FAME Plant site and that portion of land is also being surrendered.

Wastes from the Brocklesby FAME Plant site can now be sent as pumpable liquid feedstock to the adjacent Brocklesby AD Plant by underground pipeline.

Any changes made as a result of the part surrender are set out in the schedules.

The status log of a permit sets out the permitting history, including any changes to the permit reference number.
