Weekly all-cause mortality surveillance 26 February 2015 – week 9 report

Amendment to the following figure and text on Page 1:

Figure 1: Observed & predicted all-cause death registrations, E&W

Due to a formatting error in the document, figure 1 was not updated with week 7 data. This has now been updated. The text associated with figure 1 (Excess overall all-cause mortality, England and Wales) has been updated to read 'This is less than the 12,039 estimated death registration in **week 6**' rather than week 5.
