Syndromic Surveillance System: England

03 April 2018		Year: 2018	Week: 13	
In This Issue:	Key messages	Data to: 02	April 2018	
Key messages.				
Syndromic indicators at a glance.	Calls to NHS 111 about sore throat increased in week 13 and are above levels expected for this time of year, particularly in the 5-14			
Data summary.	years age group (figures 6 & 6a).			
Indicators by syndrome.				
Cold/flu.				
Fever.				
Cough.				
Difficulty Breathing.	A Cold Watch System operates in England from 1 November England Cold Weather Plan for England the PHE Real-tim			
Sore throat.	impact of cold weather on syndromic surveillance data during this period. Cold weather alert level (current reporting week): Level 1 - Winter preparedness / 2-Alert & readiness			
Diarrhoea.	http://www.metoffice.gov.uk/weather/uk/coldweatheralert/			

# Syndromic indicators at a glance:

Indicator	Trend	Level *
Cold/flu	decreasing	above baseline levels
Fever	decreasing	below baseline levels
Cough	no trend	below baseline levels
Difficulty breathing	decreasing	below baseline levels
Sore throat	increasing	above baseline levels
Diarrhoea	no trend	below baseline levels
Vomiting	no trend	below baseline levels
Eye problems	no trend	below baseline levels

\*Since week 47 2014 new baselines have been introduced for comparison with previous years. Baselines use historical data from the NHS Direct surveillance system to estimate seasonal trend but with levels adjusted to reflect changes since the switch to using NHS 111 data in September 2013.

# Data summary:

Year	Week	Total calls
2018	14	357,935

#### WW Public Health England

#### 03 April 2018

#### 1: Total calls.

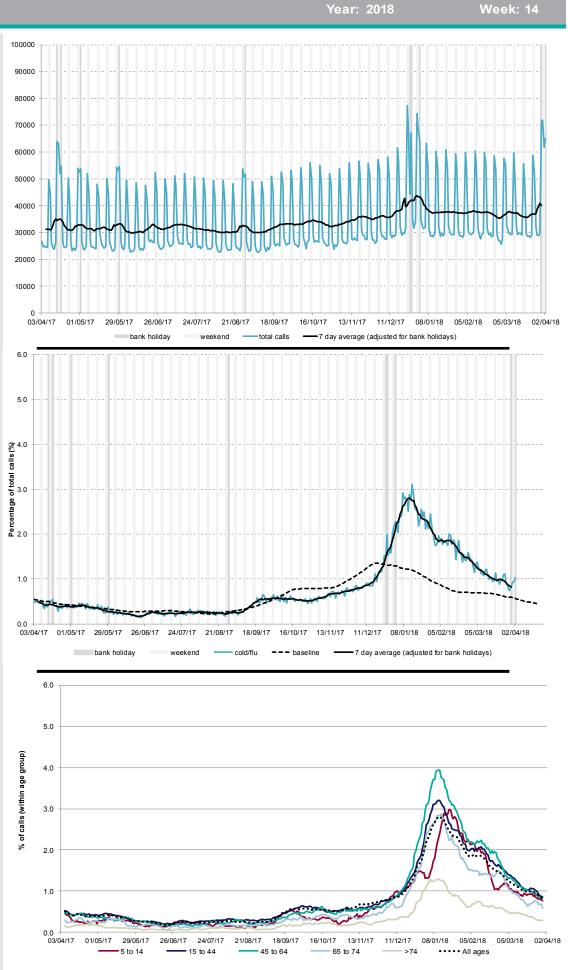

The total number of syndromic calls recorded each day by NHS 111.

Daily 'cold/flu' calls as a percentage of total calls. Baselines are constructed from historical data since 2010, including data from NHS 111 and NHS Direct.

Cold/flu calls as a percentage of total calls within each age group, shown as a 7 day moving average adjusted for bank holidays. Age groups below 5 years old, not shown.

03 April 2018	Year: 2018 Week: 14			
Introduction to charts:	<ul> <li>Weekends and bank holidays are marked by vertical grey lines (bank holidays darker grey).</li> <li>A 7-day moving average (adjusted for bank holidays) is overlaid on the daily</li> </ul>			
	<ul> <li>data reported in each chart, unless specified.</li> <li>Baselines represent seasonally expected levels of activity and are constructed from historical data. Furthermore, they take into account any known substantial changes in data collection, population coverage or</li> </ul>			
	reporting practices. Baselines are refreshed using the latest data on a regular basis.			
	<ul> <li>NHS 111 call data are analysed on a daily basis to identify national and regional trends. A statistical algorithm underpins each system, routinely identifying activity that has increased significantly or is statistically significantly high for the time of year. Results from these daily analyses are assessed by the ReSST, along with analysis by age group, and anything deemed of public health importance is alerted by the team.</li> </ul>
