

Preliminary flood risk assessment: Barnsley Metropolitan Borough Council

This addendum by Barnsley Metropolitan Borough Council (2017) updates the council's preliminary flood risk assessment report published in 2011. Read the addendum in conjunction with the [preliminary assessment report](#).

Addendum

The preliminary flood risk assessment (PFRA) and flood risk areas (FRAs) for Barnsley Metropolitan Borough Council were reviewed during 2017, using all relevant current flood risk data and information.

Following the 2017 review, there are no changes to the assessment of risk since the preliminary assessment report was published in 2011.

The annexes to the preliminary assessment report have been reviewed. No updates have been added as all recorded flood incidents since 2011 have been below threshold

Past flood risk

No Changes since 2011 assessment.

Future flood risk

Modelling has provided a more detailed understanding of flood risk within the Low Valley area of the borough. Modelling was undertaken to assess the impact of a proposed development area and the potential for flooding has been reduced as a result.

Flood risk areas (FRAs)

No FRAs identified within the Barnsley Borough.

Other changes

No significant changes since 2011 assessment.
