

## **Preliminary flood risk assessment: North Yorkshire County Council**

**This addendum by North Yorkshire County Council (2017) updates the council's preliminary flood risk assessment report published in 2011. Read the addendum in conjunction with the [preliminary assessment report](#).**

### **Addendum**

The preliminary flood risk assessment (PFRA) and flood risk areas (FRAs) for North Yorkshire County Council were reviewed during 2017, using all relevant current flood risk data and information.

There are no changes to the assessment of risk since the preliminary assessment report was published in 2011.

### **Past flood risk**

This has been updated in annex 1 of the 2011 PFRA to include all significant flood events since 2011.

### **Future flood risk**

There is no new evidence which suggests the risk of flooding in North Yorkshire has changed since 2011.

### **Flood risk areas (FRAs)**

No FRAs have been identified within the North Yorkshire County Council lead local flood authority (LLFA) area for the purposes of the Flood Risk Regulations (2009) second planning cycle.

### **Other changes**

There are no other significant changes that have occurred to the structure or governance of any Risk Management Authorities in the LLFA which would have a significant effect upon the delivery of Flood Risk Management

**North Yorkshire County Council  
December 2017**
