

Civil Service HR

JOURNEY TO THE CLOUD: A GUIDEBOOK

TOOLS APPENDIX

Version 2.0
April 2018

Civil Service HR

changeassociates/

- ▷ This pack is presented by the HR Innovation and Technology team within Civil Service HR Operations.
- ▷ Please note that this is version 2.0 of the Civil Service HR Journey to the Cloud Guidebook Tools Appendix as of 19.04.2018. Please refer to the latest available electronic version of the Guidebook for the most up to date version.
- ▷ For questions or content maintenance please contact: globalhrdesign@cabinetoffice.gov.uk
- ▷ For more information on Change Associates please see: <https://www.changeassociates.com/>

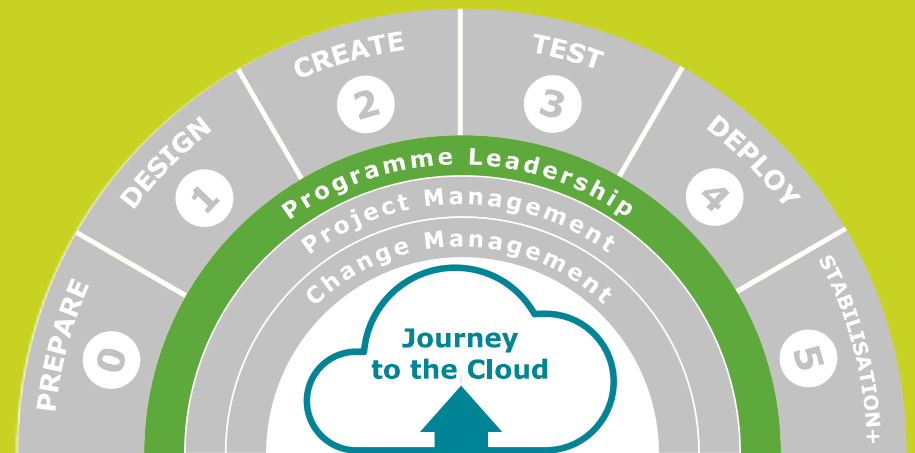

TOOLS APPENDIX CONTENTS

These tools accompany the Civil Service HR Journey to the Cloud Guidebook:

1: Programme Leadership Tools	03	4: Prepare Tools	20
Cloud HR Programme Capability Assessment Tool	04	Quantitative Data Analysis Template	21
2: Project Management Tools	05	Current State Assessment Report Structure	22
Project Initiation Document	06	Visioning Workshop Exercise 1	23
Example Cloud HR Programme Structure	07	Visioning Workshop Exercise 2	24
High Level Project Roles	08	Business Case Content	25
Status Report	09	Functional Fit Discussion Guide	26
3: Change Management Tools	10	Requirements Capture Template	27
Case for Change	11	HR Technology Demo Script Template	28
Change Impact Assessment	12	5: Design Tools	29
Stakeholder Map	13	Role Mapping Template	30
Stakeholder Analysis	14	Process Validation Template	31
Stakeholder Engagement Plan	15		
Change & Comms Strategy	16		
Change & Comms Plan	17		
Training Plan	18		
Change Readiness Assessment	19		

Tools PROGRAMME LEADERSHIP

PROGRAMME LEADERSHIP

CLOUD HR CAPABILITY ASSESSMENT TOOL

What is the Cloud HR Capability Assessment Tool?

- The Cloud HR Capability Assessment Tool will assist leaders and teams in evaluating strengths and capability gaps against the HR requirements for the successful delivery of a Cloud HR Technology implementation programme.
- Capabilities include those that are directly required by HR leaders and SMEs plus capabilities that are required by HR to support other project functions such as Technology, Commercial and Finance. It does not include the range of programme capacities that are outside the remit of HR.

Please write in column H only and do not delete or over-write Average

Change Management - Ensuring acceptance of the change and the adoption of the new technology				HR Capability Assessor	
Theme	Phase	Function	Capability Indicator		
5.1 Change management, engagement and communications planning	0	PHR	Understands organisation context for change		
		All	Understands stakeholder interests in change		
	0	P	Plans communication and engagement activities	A communication and engagement plan is in place to build engagement and address change management resource is identified	
		P	Allocates resource to manage change plan		
5.2 Change management and communications design and delivery	2	P	Develops written content	"The team" applies knowledge and understands delivery style to stakeholder interests, a "Leaders" communicates a compelling, clear and consistent vision and message on the rationale for change at all levels	
		All	Communicates with impact	"The team" facilitates the contribution of others, encourages dialogue as appropriate, and is receptive to the views of others.	
	3, 4, 5	PHR	Encourages dialogue	"The team" evaluates the effectiveness of communications, testing understanding, reviewing approach and methodology, identifying additional requirements.	
		P	Evaluates communications		
5.3 Stakeholder management	All	PHR	Builds influential relationships	"The team" fosters strong and influential relationships with key stakeholders.	
	All	PHR	Involves key stakeholders	"The team" engages and involves stakeholders at the appropriate phase of the project, involving the right people in the design and implementation of changes.	
	All	PHR	Manages resistance to change	"The team" develops special tactics for leveraging change agents' influence and handling opposition to change.	
5.4 User adoption and training delivery	2, 3, 4	PHR	Creates user adoption plan	A user adoption strategy and plan is in place that reflects Cloud HR adoption techniques and the needs of different user-groups.	
		PHR	Assesses gaps and training requirements	A training assessment is conducted for both project team members and end-users to identify gaps for transition.	
	2, 3, 3, 4	PHR	Allocates resource to develop and deliver training	Skilled resource is identified and available to develop and deliver training.	
		PHR	Develops and Delivers training	Trainers applies expert knowledge of Cloud-based technology training approaches to design and deliver training, using flexible methods for different user needs e.g. web based, in class training, guides etc.	

Instructions

Background

This Capability Assessment Tool will assist you in evaluating strengths and capacity gaps against the HR capability requirements for the successful delivery of a HR Cloud Technology implementation project. In some cases the HR capabilities may be undertaken by a separate programme team or by HR. Capabilities include those required by HR to support other functions such as Commercial, Finance or Technology. Programme capabilities that are outside the direct or indirect remit of HR are not included in this tool. The information will help you to plan how to build or develop the necessary skills, experience and capacity to deliver and how to leverage the team strengths to your advantage. **This tool is primarily aimed at HR programme leads.**

Using the Tool

It is essential that values are only entered in column 'H' of the assessment sheets. Entering or changing values in any other cell may impair the operation of the summary sheet.

The summary sheet is self-populating, do not over-write in any way.

Use the tool at the start of the project to anticipate and plan capability requirements and resources for different phases of the project. The assessment can be repeated during the project to monitor progress.

The tool is designed to be flexible in its application. Below are some examples of how it could be used:

- 1) Project Team Assessment:** A project manager or sponsor could complete the assessment as a desk top exercise based on their knowledge of the project team.
- 2) Individual Self-Assessment:** The tool may also be used for self assessment by project team members selecting the sections most relevant to their roles.
- 3) Team Assessment/Discussion:** Use as a device for leading a resource planning discussion with leadership or project teams.

Instructions

- Complete the assessment from the organisational perspective (unless you are completing for the specific purpose of an individual Self-Assessment - see row 12 above)
- Assessment should be made based on the Capability Statement (Column F), using the set criteria: **1=Strongly Disagree, 2=Disagree, 3=Partially Agree, 4=Agree 5=Strongly Agree**
- An average score for each "theme" will be calculated. A RAG (RED, AMBER, GREEN) indicator will be applied as a visual tool to indicate capability strengths and gaps: an average score of **2 or below is RED**, indicating a capability or capacity gap and action required to buy or develop capability; **2.1 up to 3.9 is AMBER**, indicating some level of capability but not to the full requirement and additional requirements.

Average Score		2.90

PROJECT MANAGEMENT

Note: Project management processes should follow standard project management protocols and processes used in your organisation. Refer to your local Programme Management Office (PMO) for standard tools and templates such as risk register or actions log.

PROJECT MANAGEMENT

PROJECT INITIATION DOCUMENT

What is a Project Initiation Document?

- A Project Initiation Document defines all major aspects of a project, and forms the basis for managing the project and measuring its success.
- It specifies why the project is important, what will be delivered and when it will be delivered

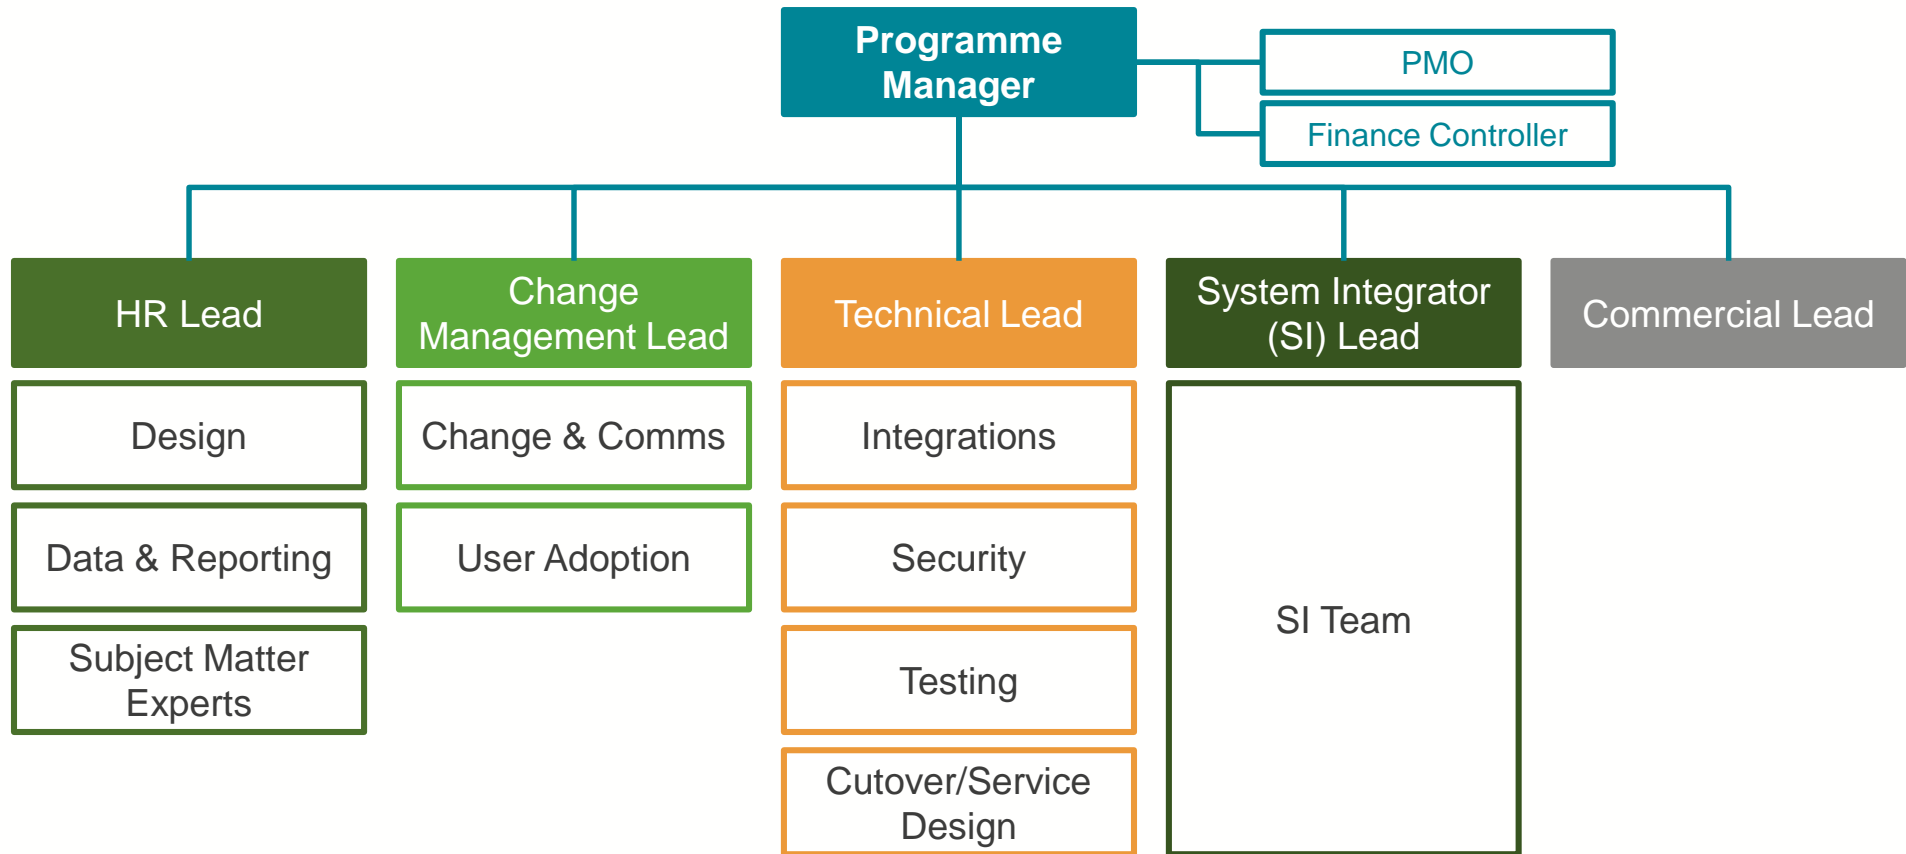

PROJECT NAME	
Project Manager	
Project Sponsor	
Objectives & Rationale	[Define the key objectives of the project] [Why are we doing the project?] [Reference how this project fits within the overall Civil Service programme agenda and organisational objectives/priorities] [Time criticality – impact on critical path if known]
Scope	Inclusions: [what is included] Exclusions: [what is excluded] Constraints: [what constraints are we aware of?]
Success Measures	[Define what success for this project will look like – what will the end of the project look like?]
Proposed workstreams	[List workstreams]
Deliverables and timescales	List of SMART deliverables that the status of the project can be tracked against (SMART = Specific, Measurable, Achievable, Realistic and Tangible) Try to keep to maximum of 5 – 10, choose sensible chunks of work that break the project into logical pieces which will give a good measure of completion.
Major Risks	[Detail any risks identified at this stage]
Interdependencies and interfaces	[Detail any other project(s)/tasks that is/are dependent on this project for their success] [Detail and identify key interfaces (e.g. third parties)]
Budget & resources	List the positions and roles of staff List consultants to be appointed, their role & approximate fee levels Firm budget estimation for the project development phase

PROJECT MANAGEMENT

EXAMPLE CLOUD HR PROGRAMME STRUCTURE

- This shows a typical Cloud HR programme structure.
- The number of roles will depend on the size of the programme and will change over time during the duration of the programme.
- Some roles may be combined or may not be fully dedicated to the programme at all times.
- High level role descriptions are provided on the next page.

PROJECT MANAGEMENT

HIGH LEVEL PROJECT ROLES

NOTE: Roles will depend on the size of the programme and will change over time during the duration of the programme. Some roles may be combined or may not be fully dedicated to the programme at all times.

ROLE	HIGH LEVEL DESCRIPTION
Programme Manager	Responsible for the delivery of the programme on time and within budget, meeting quality standards
PMO	Responsible for ensuring the programme adheres to programme management standards and methods
Finance Controller	Responsible for managing the programme budget
HR Lead	Responsible for the delivery of an integrated solution that meets HR functional needs
Design	Responsible for the design, testing and deployment of processes and services to ensure they meet user needs
Data & Reporting	Responsible for identifying data to be converted and cleansed and identifying functional reporting requirements
SMEs	Provides subject matter expertise in one or more areas of the project (e.g. compensation, benefits, recruitment)
Change Lead	Responsible for defining the change management strategy and creating the associated change management plan
Change & Comms	Responsible for change management and communications delivery
User Adoptions	Responsible for the user adoption strategy and plan
Technical Lead	Responsible for the planning and delivery of all technical activity
Integrations	Responsible for managing all integrations activity for the programme
Security	Responsible for leading on design and build of the data security model, including the definition of a security strategy
Testing	Responsible for developing the test strategy, preparing the test plan and managing the testing process
Cutover/Service Design	Responsible for managing cutover and defining and preparing the post-implementation support model
SI Lead	Responsible for the successful deployment of the Cloud HR solution
SI Team	Responsible for delivering the technical configuration of the system – roles will be defined by the SI partner
Commercial Lead	Responsible for the commercial process, managing interventions with vendors and conducting negotiations.

PROJECT MANAGEMENT STATUS REPORT

What is a Status Report?

A status update report provides key information to key stakeholders (e.g. the steering group, project sponsor) on the progress of the project. It summarises project activities, risks, issues and decisions.

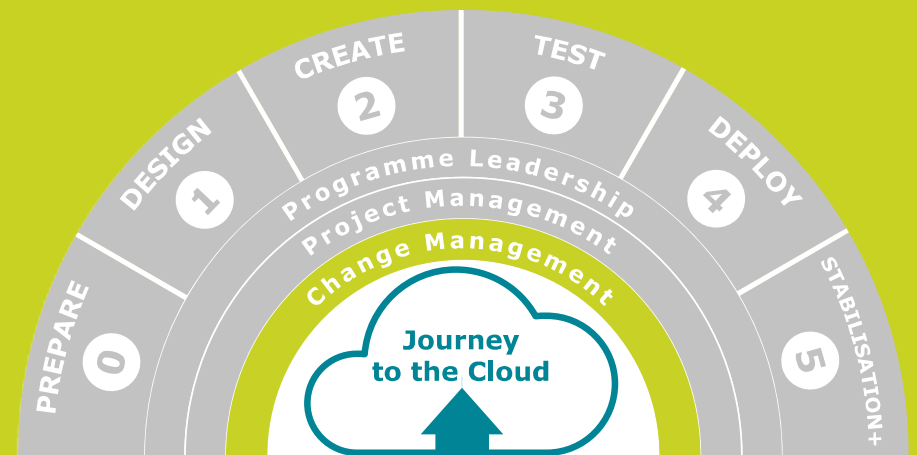

WORKSTREAM NAME		OVERALL STATUS	
PERIOD			
KEY ACCOUNTABILITIES FOR THE PAST WEEK	Enter item	WORKSTREAM	STATUS
	•	WORKSTREAM 1	YELLOW
	•	WORKSTREAM 2	GREEN
	•	WORKSTREAM 3	RED
	•	WORKSTREAM 4	GREEN
KEY OBJECTIVES AND ACTIVITIES FOR THE NEXT WEEK	Enter item	KEY ISSUES, RISKS OR DECISIONS	
	•	WORKSTREAM 1	Enter item
	•	WORKSTREAM 2	
	•	WORKSTREAM 3	
	•	WORKSTREAM 4	

STATUS KEY G ON TRACK Y CAUTION/NEEDS ATTENTION R NEEDS URGENT ACTION

Tools CHANGE MANAGEMENT

Note: Refer to your local Programme Management Office for any standard Change Management tools and templates that are in use in your organisation.

CHANGE MANAGEMENT

CASE FOR CHANGE

What is a Case for Change?

- The Case for Change clearly defines the compelling reasons for change at the beginning of a project.
- It is used to engage leaders and key stakeholders to gain alignment and early buy-in
- It is developed at the beginning of a change programme, and informs all change management activities, including the change strategy and plan, communications activities, and success measures.
- Given its critical importance and impact on future activities, the Case for Change should be reviewed and signed off by the executive sponsor or steering committee.

Components of a comprehensive Case for Change

1. Why are we changing?
2. What are we changing?
3. What gets better if we make this change?
4. What's the risk if we don't change?
5. What levers can we pull to help us make this change?
6. What are the barriers to change?
7. What's in it for me/us?
8. How will we measure the success of the change?

CHANGE MANAGEMENT

CHANGE IMPACT ASSESSMENT

What is a Change Impact Assessment?

- The Change Impact Assessment is used to identify and analyse the impacts that a project will have on an organisation.
- It identifies the areas within the organisation where change interventions may be required and supports the development of a change management strategy and plan.
- A high level Change Impact Assessment is completed early on in the project. More detailed Change Impact Assessments can be completed during the project to assess the impact within each business unit or area.

Example Change Impact Assessment Template

Business Area	Change Summary	Impacted Stakeholders	Description of the Change	Benefit of the Change	Types of Impact	Description of the Impact	Degree of Impact	Anticipated Risks
High level business unit.	Short description of the change	Roles/stakeholders to be impacted	Detailed description of change	Description of the anticipated benefit of the change	Categorise types of impacts e.g. technology, skills, process, etc.	Detailed description of impact to people	Rate the level of impact e.g. high, medium, low	Describe the risk of the impact

CHANGE MANAGEMENT STAKEHOLDER MAP

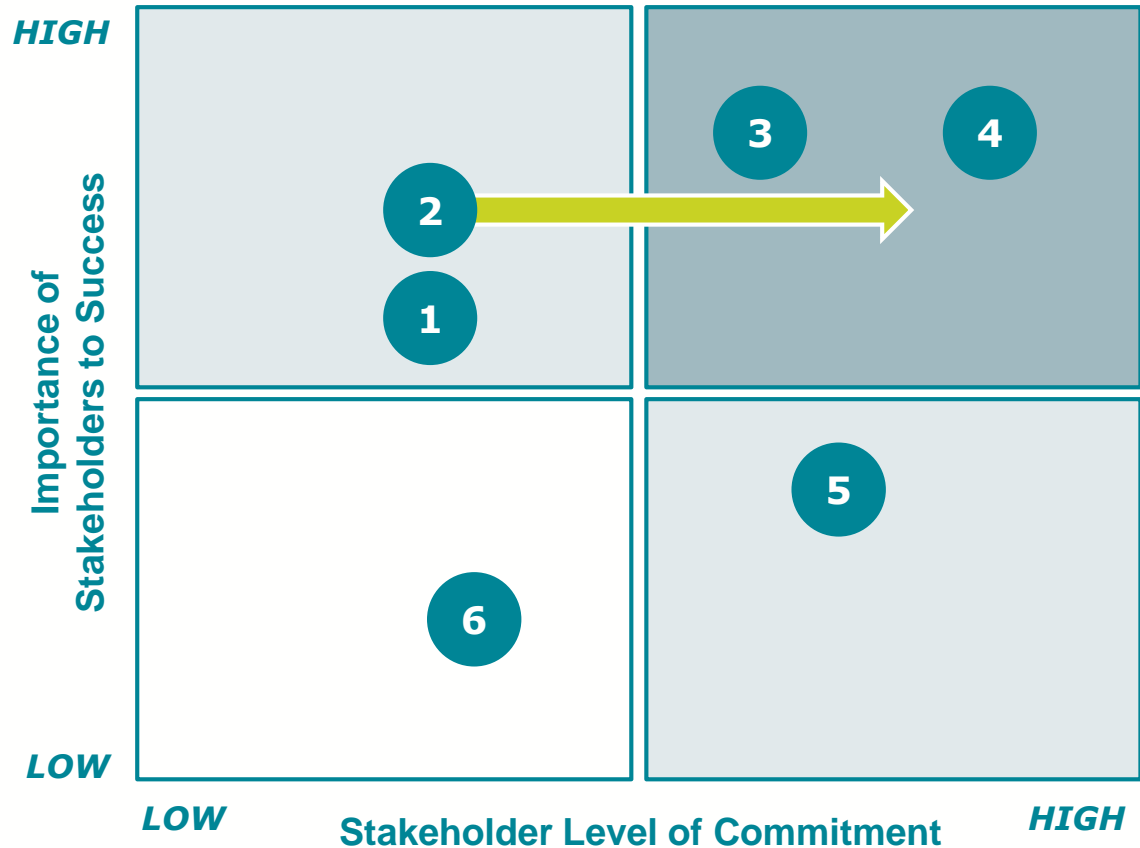

What is a Stakeholder Map?

- The Stakeholder Map describes who the stakeholders are, evaluates their current level of commitment and their influence on the success of the programme.
- The Stakeholder Map is used to inform the Change Strategy and Plan, the Stakeholder Engagement Plan and the Communication Plan.

Instructions

- Map the stakeholders to the grid
- Stakeholders can be groups. i.e. HRBPs or individuals SIRO
- Pay particular attention to the top left quadrant since they will be critical to the success of the programme
- Monitor the map to ensure that there is a trend in movement towards the top right quadrant
- The stakeholders in the bottom half require less focus since their impact is less

CHANGE MANAGEMENT

STAKEHOLDER ANALYSIS

What is Stakeholder Analysis?

The Stakeholder Analysis builds on the Stakeholder Map. It captures the detail behind the mapping, the anticipated concerns of each stakeholder and the action plan to engage the stakeholders to achieve the required level of commitment.

Example Stakeholder Analysis Template

STAKEHOLDER	DESCRIPTION – WHAT IS CHANGING FOR THEM?	ISSUES/CONCERNS	INFLUENCE STRATEGY/ ACTION	OWNER
e.g. SIRO	They will need to understand the system to carry out any required audit/risk reviews. This should be part of their information security role.	<ul style="list-style-type: none"> How the system will ensure information is secure 	Need monthly progress reports Involvement in decisions	Programme Director
e.g. HR Administrators	HR Administrators are the most impacted within HR as the system will affect how they carry out their work on a day-to-day basis. Changes to processes, data entry to a new system and direct access for employees and Managers will all impact on HR Administrator roles	<ul style="list-style-type: none"> What the implementation of the system will mean for them and their role They may be concerned with being fully confident in using the system as there may be lots of questions from Employees and Managers 	Monthly meetings – to build their understanding of the overall change and to address specific issues	HR Director

CHANGE MANAGEMENT

STAKEHOLDER ENGAGEMENT PLAN

What is a Stakeholder Engagement Plan?

- The Stakeholder Engagement Plan describes the key messages, main audiences and channels of communication by month for each stakeholder group:
- The purpose is to ensure stakeholders are managed collectively and to prevent overuse of certain stakeholder groups
- It should capture planned programme-related activity. Ad hoc activity or activities associated with business as usual does not need to be recorded.

Stakeholder Engagement Plan Template

PROGRAMME MILESTONE	KEY MONTHLY MILESTONES TO BE SHARED		
Stakeholder	JANUARY	FEBRUARY	MARCH
1.	<i>Date and nature of stakeholder activity, e.g. event, email, interview, etc. and key messages.</i>		
2.			
3.			
4.			
5.			

CHANGE MANAGEMENT

CHANGE AND COMMUNICATIONS STRATEGY

Focus Areas for a Change Management Strategy

LEADERSHIP

ENGAGEMENT

COMMUNICATIONS

ORGANISATION ENVIRONMENT

MEASUREMENT

Components of a Change Management Strategy

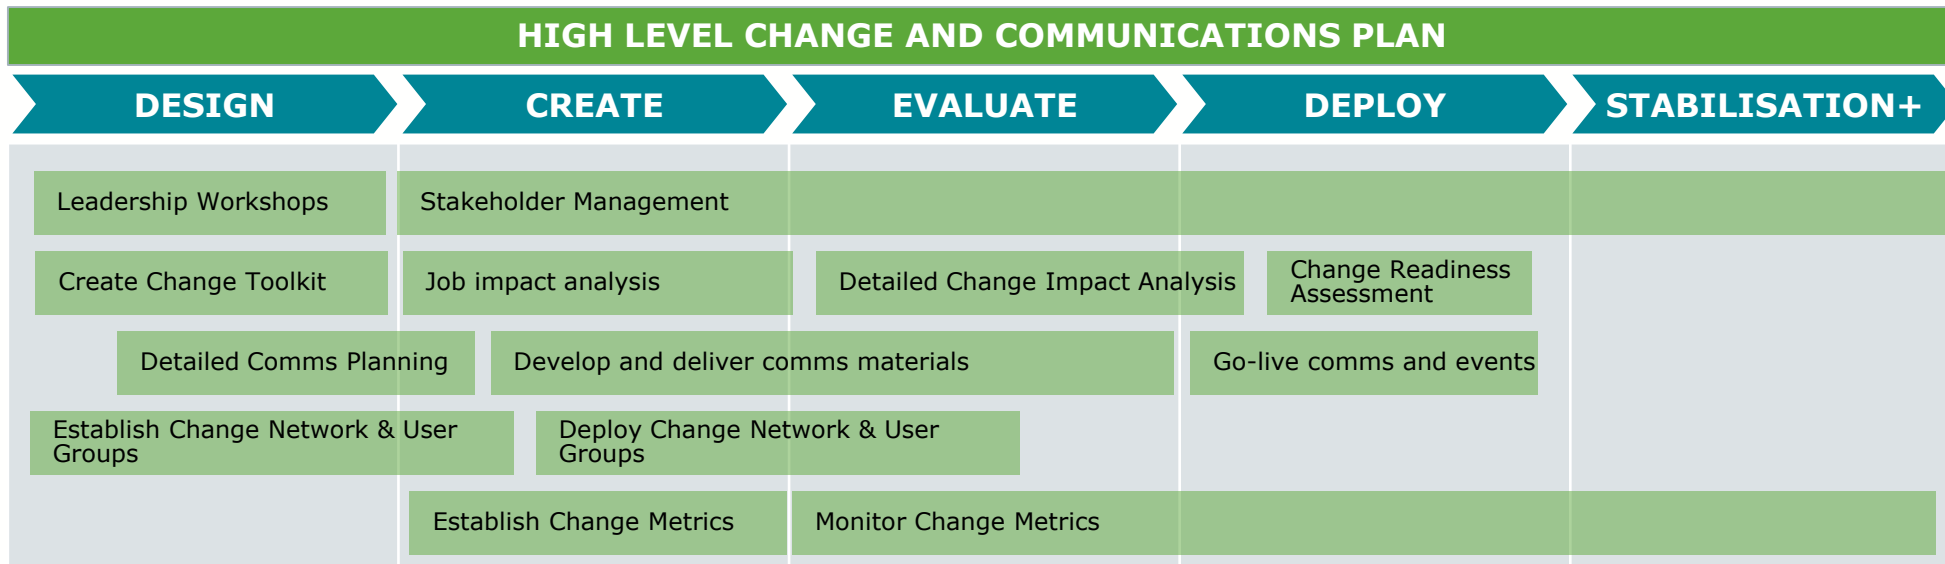

- Change Management Objectives
- Key Messages
- Change Management Barriers and Challenges
- Summary of Change Impact Assessment
- Summary of Initial Change Readiness Assessment
- Any regional/function/business area differences on change issues and priorities
- Overview of Change Management and Communications approach
- Change Management roles including the role of leaders in bringing about change
- Stakeholder Engagement Plan
- Measuring Change Effectiveness

CHANGE MANAGEMENT

CHANGE AND COMMUNICATIONS PLAN

Change and Communications Plan Template

Change and Communications Plan Detail

Activity	Type	Description	Audience	Timing	Key Messages	Key Actions	Owner

CHANGE MANAGEMENT TRAINING PLAN

What is a Training Plan?

The Training Plan builds on the Adoption Strategy and outlines the key training deliverables and timings required for the system implementation.

Training Plan Template

OBJECTIVE	PRIMARY TRAINING INTERVENTIONS	
Build training tools/resources and learning opportunities for HR, Manager and Employees to ensure they are equipped for the change	Face to Face System Training	All HR will undergo face-to-face training on the system.
	HR Work Instructions	HR work instructions will ensure HR have detailed procedures on how to complete the new processes designed
	Online e-learning videos	Managers and Employees will have ongoing access to e-learning sessions and videos which outline how to use major system functions
	Manager and Employee Direct Access Guides	Managers and Employees will have access to user-guides that will support them on how to use the system on an ongoing basis
	Manager Change Training Program	Further face-to-face training will be deployed to upskill their Managers on the required behavioral, cultural and system changes

HIGH LEVEL TRAINING PLAN				
DESIGN	CREATE	EVALUATE	DEPLOY	STABILISATION+
Finalize training plan share with change leads		Create work instructions and training materials for face to face, e-learning and direct access		
Identify and complete Vendor delivered training				
	Create Manager Change Training Program		Deliver Manager Change Training Program	
			Hold face to face training with HR and super-users	

CHANGE MANAGEMENT

CHANGE READINESS ASSESSMENT

What is a Change Readiness Assessment?

- The Change Readiness Assessment provides a framework for assessing how ready an organisation is for implementing a change. It enables leaders to assess the risks they are taking in proceeding with implementation by showing the areas where the business is not prepared for the change
- It is used during the course of a the programme and most importantly during the Evaluate Phase to help make the decision to move to Deploy.

Change Readiness data is gathered via online surveys or face-to-face interviews.

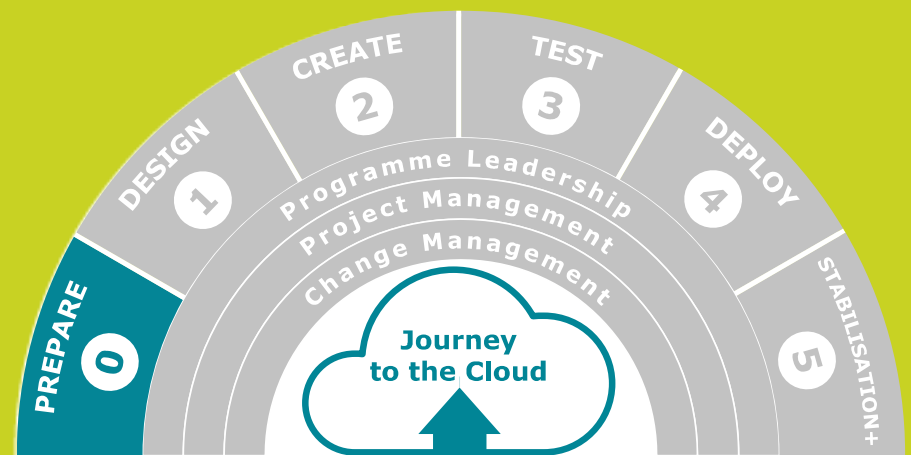

CHANGE CATEGORY	EXAMPLE QUESTIONS
Vision and Case for Change	<ul style="list-style-type: none"> • Is there a convincing reason for us to change and do people understand the benefits? • Does the programme have a clear vision for success?
Programme Plan and resources	<ul style="list-style-type: none"> • Does the programme have an understandable and sensible plan? • Do we have the right resources in place on the programme and in the business?
Leadership and communication	<ul style="list-style-type: none"> • Are leaders demonstrating support for the programme? • Does the programme communicate with the business effectively?
Organisation and people	<ul style="list-style-type: none"> • Are we capable of successfully implementing this programme? • Do we understand how this will affect people's roles? • Have people been given the necessary skills to perform their roles in the new working environment?
Commitment and motivation	<ul style="list-style-type: none"> • Does the business have the motivation and will to change? • Are people committed to ensuring the programme is a success?

This data is then analysed and transferred into a Change Readiness Action Tracker

Stakeholder	Concern	Category	Risk Impact	Action	Owner
	Description of feedback or area of concern	E.g. people, technology, process, leadership, roles	How does this risk impact on the successful outcome of the programme?	Mitigating action	Owner of action

Tools PREPARE

PREPARE

QUANTITATIVE DATA FOR ANALYSIS

What is a Quantitative Data Analysis?

- Quantitative data is information that can be measured numerically.
- A quantitative data bank typically reflects the size, shape and cost of a function or organisation as a baseline towards the business case and measures of success.
- The following is a checklist of information that is useful to gather when assessing the current state.

DATA FOR ANALYSIS

Strategy

- Organisation strategy, including external positioning, HR Strategy and any other supporting guidance

Financial Reports – statutory and management

- Operational expenditure
- Capital expenditure
- Cost/Spend breakdown
- Planning and performance cycles

Key Performance Measures

- Whatever measures the business currently uses to assess performance, make decisions, link actions to strategy

Organisation Overview

- HR Organisation charts by function and business area etc.

Headcount Information

- By organisation, HR function

Project Inventory

- All projects recently completed or in flight, including actual/expected costs and measurable benefits

Management Forums

- A list and descriptions of the various forums, meetings, committees and other bodies that make key decisions in the organisation

Technology

- An overview of the key systems used in the organisation

PREPARE

CURRENT STATE ASSESSMENT REPORT TEMPLATE

What is the Current State Assessment Report?

This template provides structure and headings and example content for a Current State Assessment Report. It can be used to document the “As-Is” state to inform the vision, strategy and design.

SECTION	CONTENT
HR Function overview	Vision & Strategy, Headcount, costs, structures, how does the HR function currently operate? (Taking account of the Global HR Design Library)
External HR Landscape	What are we learning from external best practice? How do we compare to the market? How do we compare to other Government Organisations? (Taking account of the Global HR Design Library).
Customer Insights	Who are the main HR Customers? What are their demands? What are we doing today to meet these demands?
HR Current State performance	What does HR do well/less well? Use quantitative and qualitative data to summarise.
Opportunities and Threats	What are the opportunities we should prepare for? What worries you? What are the main challenges in getting there? What are the key risks?
	What are the things you know you must do? What do you know the HR customer will demand from you in the future?
Success Criteria	What will success look like? How will you know when you have got there? What are the things people are saying and doing differently?
Next Steps/Actions	Identify next steps with owners and time frames

PREPARE

EXAMPLE VISION WORKSHOP EXERCISE 1

This exercise aims to help the team to think through the vision for the project, imagine the end state and what success will look like.

INSTRUCTIONS:

It's now year XXXX, it's been another outstanding year for your organisation. Everyone agrees that the Cloud HR Programme has played a pivotal role in supporting organisation success and HR has been recognised for particular praise.

The phone rings and it's the press office asking for an article for the Financial Times ...what will you tell them about:

- How the Cloud HR Programme has helped manage strategic objectives?
- What the 2-3 biggest areas of impact were?
- What the major challenges and obstacles that were overcome were?
- Why the Cloud HR Programme has been so successful?

**FINANCIAL
TIMES**

PREPARE

EXAMPLE VISION WORKSHOP EXERCISE 2

“Magic and Baggage” exercise is a good way to allow the group to discuss the themes that have emerged from current state analysis.

INSTRUCTIONS:

- Produce an A0 wall poster as per this page
- Using post its ask individuals to reflect on Magic ‘the things they want to keep’ from existing systems that work well and Baggage, ‘the things they want to dump’ e.g. what has not worked well with existing technology.
- Use the discussion to think about what has worked well and not so well in other technology programmes that can be learned from.
- Ask individuals to put post its on the wall chart
- Group similar themes
- Discuss the implications

OUR MAGIC:
The things we
do well

OUR BAGGAGE:
Things we need to
get right to perform
well

FUNCTIONAL FIT DISCUSSION GUIDE

What is a Functional Fit Discussion Guide?

This discussion guide can be used during interviews to gather HR systems requirements from HR process owners and other stakeholders. You can use the sample questions below as a starting point for interviews; you should add additional questions in line with the scope of the project.

HR Functional Fit Discussion Guide

Purpose of the interview: We are conducting a series of interviews to understand your requirements for the new HR System. Your input will help us identify the detailed requirements for the system and will enable us to test the technology vendors to ensure their functionality is a good fit with our requirements. The requirements will be translated into scripts that will be used for the system vendor demos.

HR Processes

- What are the key HR processes/activities that your area is responsible for?
- What works well with the current HR system that you would like to see continue?
- What would you like to see improve or change about the HR system in the future?
- Are any of your processes automated currently?
- Where are the biggest opportunities to automate HR processes in your area?
- Which other HR systems are used in your area? Which of these systems does the new HR system need to interface with?
- What are the key reports or metrics that you use within your area?
- What additional data or reporting requirements do you have?
- Do you have or foresee any issues with HR data capture or data conversation for processes in your area?

Regional Requirements (if relevant)

- Are there any country-, region-, or location-specific requirements that we need to capture due to legislation or contractual terms in your locations?

Self Service

- What are the biggest areas of complaint around HR processes from managers and employees?
- Is there anything you think line managers should take more responsibility for?
- Is there anything you think employees should take more responsibility for?

Close

- What challenges do you see for the implementation of a new HR system?
- Is there anything we missed that you would like to comment on?

PREPARE

REQUIREMENTS CAPTURE TEMPLATE

What is a Requirements Capture Template?
 This template can be used to capture the functional requirements and organise and prioritise them by process area.

HR Requirements Capture Template								
Requirement ID	Proposed By	Requirement Description	Process (Level 2)	Process (Level 3)	Process (Level 4)	Priority M - MUST have S - SHOULD have if possible C - COULD have if it does not effect anything else W - WON'T have now but would like in the future	Test Script	Comments

ROLE MAPPING TEMPLATE

What is a Role Mapping Template?

- This template is used to map the existing HR roles to the HR System roles that are defined by the vendor. This is important to ensure that each role in the HR Operating Model is given the correct access rights within the new system.
- For more information on how roles have been defined please refer to ***CSHR Global Design – Process Splits (RACI), and the impact on the HR Operating Model document***
- You should ensure that every role within the HR team and all other roles that will need to access the system are captured. Some examples are given below to get you started but you should complete the list.

HR FUNCTION ROLE	HR SYSTEM ROLE	DESCRIPTION	EXAMPLE ACTIVITIES
HR Director	e.g. HR Executive	e.g. Most Senior HR Leader	View access to all data and analytics.
HRBP	e.g. HR Partner	e.g. Business-facing strategic HR professional	View access to all data and analytics. . Approves transactions that are outside of defined guidelines or carry a high risk.
COE - Head of Reward			
COE – Reward Specialist			
HR Operations - Tier 2			
HR Operations - Tier 1			
HR Systems Lead			
Line Manager			
Employee			
Business Leader			

DESIGN

PROCESS VALIDATION TEMPLATE

What is a Process Validation Template?

This template is used as preparation and during Design Workshops to identify and capture the changes that need to be made to the Vendor's pre-configured business processes.

PROCESS NAME: E.G. JOINING WORK – ONBOARDING – MANAGE NEW HIRE

Questions to consider:	Notes:
What do users say about their experience of this process today?	
What works well in this process (that we must not lose)?	
What do we need to change about the pre-configured business process to meet our needs?	
How is success measured for this process?	
Are there any variations that exist relating to this process (e.g. for different employee types or locations?)	
What are the change impacts of moving to the new process? (e.g. impact on current HR roles, impact on Managers/Employees, issues or risks)	

NOTE: Lessons from experience are always useful. Using examples completed by other government departments or Pathfinders will inform and may accelerate this process.
