### **Summary**

The guidance provides information and advice on the Group Work “JOBS II” provision. This provision is aiming to test the Group Work “JOBS II” Programme in the UK labour market and is part of a wider DWP research exercise aimed at claimants who struggle with their job search or work related activity.

Group Work “JOBS II” is a week-long, facilitated employment Programme that uses active learning techniques. Participants attend five, four-hour sessions designed to develop their job search skills, confidence, and ability to cope with set-backs.

The Programme was designed to be a preventative intervention for those at risk of depression as a result of job loss and additional research indicates a restorative effect for those with Mental Health Issues.
