

UK Official Development Assistance (ODA)

An overview of official UK spend on international development and the UK target to spend 0.7% of gross national income per calendar year.

1. Results:

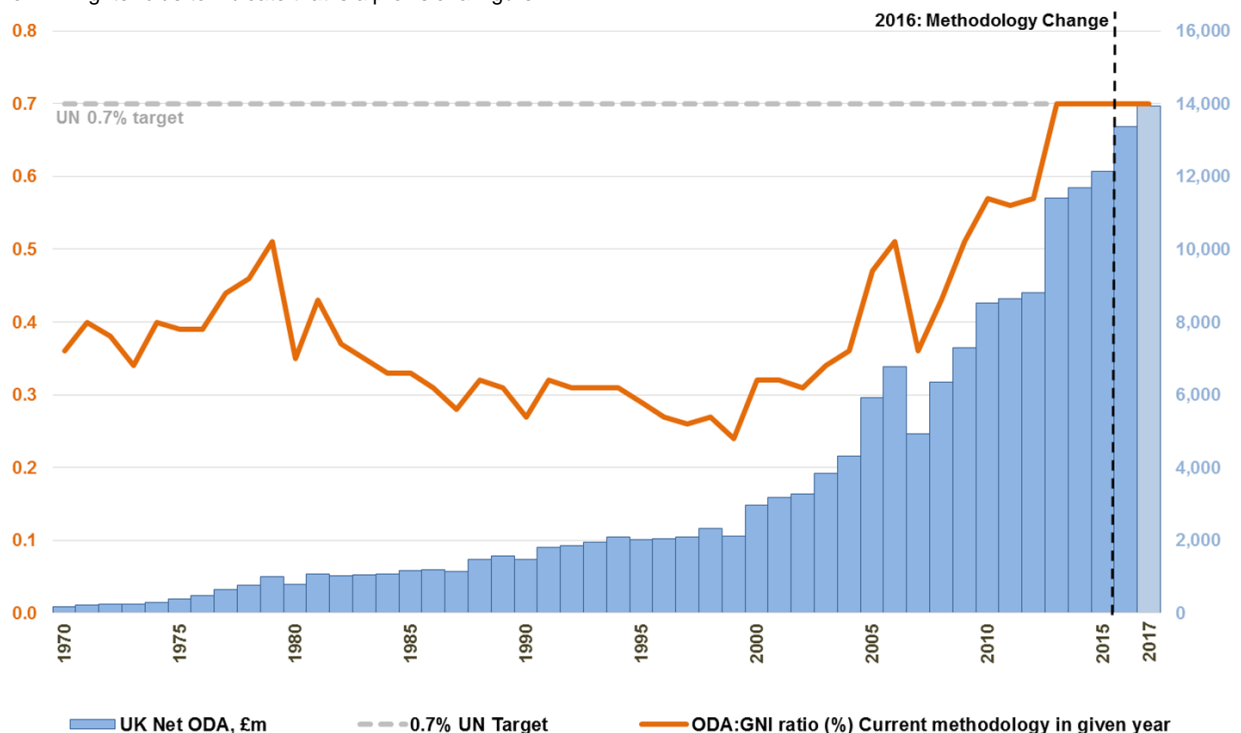

In 2017 provisional ODA represented **0.70 per cent** of UK Gross National Income (GNI). The total amount of ODA provided by the UK Government increased by 4.2 per cent to £13,933 million in 2017 compared with 2016. This was a rise of £555 million, from £13,377 million in 2016.

Figure 1 shows the trend in UK ODA since 1970. Overall there has been a steady increase in the level of UK ODA since 1970, with a peak in 2005 and 2006 which was driven by high levels of debt relief, and a steep increase in 2013 when the UK Government first met the 0.7 per cent ODA:GNI target.

The jump in the level of ODA in 2016 reflects the switch to the European System of Accounts (ESA) 2010 methodology for measuring GNI and the consequent need to increase UK ODA to meet the 0.7 per cent ODA target.

Figure 1: UK ODA Level between 1970 and 2017

2017 is shown in lighter blue to indicate that is a provisional figure

2. Context

The United Nations General Assembly agreed on an international target of 0.7 per cent for the ODA:GNI ratio in 1970. The UK government first delivered on the commitment to spend 0.7 per cent of GNI on ODA from 2013, and in 2015 this commitment was enshrined in UK law.

3. Methodology summary

Official Development Assistance (ODA) is produced according to standardised definitions and methodologies controlled by the Organisation for Economic Cooperation and Development (OECD). ODA is defined as resource flows to developing countries and multilateral organisations, which are provided by official agencies (e.g. the UK Government) or their executive agencies, and each transaction meets the following tests:

- A) It is administered with the promotion of the economic development and welfare of developing countries as its main objective; and
- B) It is concessional in character and conveys a grant element of at least 25 per cent.

The ODA:GNI ratio presents the level of UK Official Development Assistance (ODA) against Gross National Income (GNI).

4. Data sources

Data for this publication comes from the following sources:

- DFID's 'ARIES' database that records financial transactions relating to DFID payments and receipts. It also includes information on the dates of transactions, where the transactions took place and in which sector. This information is primarily inputted by spending teams in DFID country offices and central departments, with some quality assurance carried out at input and centrally to ensure that spend is in line with OECD definitions of ODA. DFID spending made up 72.5 per cent of total ODA in 2017.
- Similar databases for other departments. For non-DFID departments there is an assessment of whether the spending is in line with the OECD definitions of ODA. Non-DFID sources accounted for around 27.5 per cent of ODA.

5. Data quality notes

The Office for Statistics Regulation (part of the United Kingdom Statistics Authority) has designated these statistics as National Statistics, in accordance with the Statistics and Registration Service Act 2007 and signifying compliance with the Code of Practice for Official Statistics. Designation means the statistics carry the National Statistics label and conform to the standards of National Statistics.

The statistics shown here are provisional, and may be subject to change between now and the final release of these statistics in autumn 2018.

The OECD DAC sets the definitions and classifications for reporting on ODA internationally. These are laid out in the DAC Statistical Reporting Directives. The statistics shown here are reported in line with these directives and are subjected to a quality assurance process as described in Annex 4 of Statistics on International Development [here](#).
