

## Annex 4: Site Inspection

Departments should be present/represented whilst the operator undertakes the site survey to determine suitability.

An inspection will:

- a) Determine and Agree the cable/fibre entry point and cabling routes
- b) Nature of installation/ equipment:
  - a. Descriptions
  - b. Specifications
  - c. Location
  - d. Any structural works
  - e. H&S requirements moving forward
  - f. Determine whether permits for work are required

During the inspection a department should begin to construct an appropriate method statement for when the operator needs to access the site at any time, e.g for maintenance or improvements to the site.
