Report of the Managers

Introduction

This Combined Account for the United Kingdom Atomic Energy Authority's (UKAEA) defined benefit Public Service Pensions Schemes (PSPS) for the year to 31 March 2018 covers the receipt of contributions from employers and employees, transfer values for members transferring benefits from other schemes, payment of pensions and other benefits to retired members or their dependants, transfer values for members transferring to other schemes and repayments of contributions under UKAEA's Pension Schemes.

The business, its objectives and strategy

UKAEA Pension Schemes are statutory schemes as defined under Section 26(1) of the Finance Act 1970 and are registered schemes under the Finance Act 2004. There are no trustees.

The Schemes were contracted out under the Pension Schemes Act 1993 and subsequent legislation. Under the terms of the Pensions Act 2014, the Schemes ceased to be contracted out from 31 March 2016.

UKAEA's Public Service Pension Schemes comprise: the Combined Pension Scheme (CPS), the Principal Non-Industrial Superannuation Scheme (PNISS) and the Protected Persons Superannuation Scheme (PPSS) (the Schemes). They relate to the employees of UKAEA, National Nuclear Laboratory Limited (NNL) and International Nuclear Services Limited (INSL) and the Civil Nuclear Police Authority (CNC). In addition, the Schemes relate to former employees of British Nuclear Fuels plc (BNFL), and the Health Protection Agency (HPA), which later became part of Public Health England (PHE) (in respect of members who prior to 1 April 2005 were employed by the National Radiological Protection Board), together with some employees of the Radiochemical Centre (later known as Amersham International), the Engineering and Physical Sciences Research Council (EPSRC), the Science and Technology Facilities Council (STFC), former employees of the Council for the Central Laboratory of the Research Councils (CCLRC), the Particle Physics and Astronomy Research Council (PPARC) and the Science and Engineering Research Council (SERC), the RCUK Shared Services Centre Limited and former UKAEA employees who transferred to the Ministry of Defence (Atomic Weapons Establishment). Until 31 October 2009, UKAEA Ltd, Dounreay Site Restoration Limited (DSRL) and Research Sites Restoration Limited (RSRL).

The funding of payments from UKAEA's Pension Schemes is based on the published Parliamentary Supply Estimate and is supplied to the Department for Business, Energy and Industrial Strategy (BEIS) from the Consolidated Fund managed by HM Treasury. It should be noted that any contributions made to the Schemes are used to meet the payment of Schemes' benefits, but any surplus of such contributions over payments is surrendered to the Consolidated Fund. Similarly, any deficit is met by the Parliamentary Supply Estimate with payment from the Consolidated Fund.

UKAEA is a body corporate by virtue of the Atomic Energy Authority Act 1954.

Management of the Schemes, managers, advisers and employers

The Schemes are managed by UKAEA. Until 31 March 2018, the administration of the Schemes was carried out by Aon plc under contract to UKAEA. From 1 April 2018 following a tender exercise carried out under the Office of the European Journal procedures Paymaster (1836) Ltd, a subsidiary of Equiniti Group plc was appointed as administrator of the UKAEA pension schemes.

The respective responsibilities of UKAEA and BEIS for the Schemes are set out in a Management Framework.

The Schemes are contributory and were established and became operational on 1 August 1954. The Schemes are constituted by Rules determined by UKAEA and amended from time to time as approved by Ministers.

Managers

UK Atomic Energy Authority Responsible Officer	Catherine Pridham, UK Atomic Energy Authority, Culham Science Centre, Abingdon, Oxfordshire OX14 3DB
UKAEA Head of Pensions	Richard Stoneham, UK Atomic Energy Authority, Culham Science Centre, Abingdon, Oxfordshire OX14 3DB
Address for correspondence	UKAEA Pensions PO Box 5130 Lancing BN99 9AP

Advisers

Schemes Actuary	The Government Actuary's Department, Finlaison House, 15-17 Furnival Street, London EC4A 1AB
Principal Bankers	Royal Bank of Scotland plc, Olrig Street, Thurso, Caithness, KW14 7BL
Legal advisers	UK Atomic Energy Authority, Legal Branch, K2, Culham Science Centre, Abingdon, Oxfordshire OX14 3DB
Auditor	The Comptroller and Auditor General, National Audit Office, 157-197 Buckingham Palace Road, London, SW1W 9SP

Employers

The following employers participate in the Schemes:

- UK Atomic Energy Authority (UKAEA)
- National Nuclear Laboratory Limited (NNL)
- International Nuclear Services Limited (INSL)
- Civil Nuclear Police Authority (CNC)
- Ministry of Defence (MoD)
- Engineering and Physical Science Research Council (EPSRC)
- Science and Technology Facilities Council (STFC)
- UK Shared Business Service (UK SBS) Limited

On 1 April 1994, EPSRC took over those employees previously employed by the Science and Engineering Research Council (SERC) who were members of the Principal Non-Industrial Superannuation Scheme. On 1 April 1995 the Central Laboratory of the Research Councils (CCLRC) was created out of EPSRC. On 1 April 2007 the Particle Physics and Astronomy Research Council (PPARC) and CCLRC merged to form the STFC with some employees joining the RCUK Shared Services Centre Limited in subsequent years which was renamed UK SBS in 2013. In these accounts, the acronym SERC is used to refer to the sub-scheme relating

to the Research Councils. From 1 April 2018 the activities of the Research Councils participating in the Schemes became the responsibility of United Kingdom Research and Innovation (UKRI).

The Civil Nuclear Police Authority was formed on 1 April 2005. Members of the Civil Nuclear Constabulary may continue in membership of the CPS in accordance with the terms of the Energy Act 2004.

Under the Health Protection Agency Act 2004, the National Radiological Protection Board became part of the Health Protection Agency with effect from 1 April 2005. With effect from 1 April 2013, Public Health England (PHE) subsumed the responsibilities of the Health Protection Agency. Members employed by PHE were no longer able to accrue benefits in UKAEA schemes from 1 October 2013.

Due to restructuring of the nuclear estate over recent years, BNFL no longer exists as an entity. Most of the BNFL estate has transferred out of the Schemes, with the exception of two areas which have become the NNL and INS. In these accounts, these two companies are referred to as 'ex-BNFL'.

Constitution of the Schemes

The three UKAEA Public Service Pension Schemes (the Combined Pension Scheme, the Principal Non-Industrial Superannuation Scheme and the Protected Persons Superannuation Scheme) are unusual in their constitution. The Government does not maintain a separate fund to provide for the Schemes' future liabilities and future benefits will be paid out of the Consolidated Fund to the extent that, at the time of payment, benefits exceed contributions and Parliament votes the necessary funds.

There is no fund of investments. Following the introduction of Superannuation Contributions Adjusted for Past Experience (SCAPE) on 1 April 2006, the participating employers pay contributions based on the expected cost of the members' benefits as they accrue. These contributions are set by the Schemes' Actuary at each regular valuation of the Schemes, based on the expected demographic and financial experience of the Schemes at the time of the valuation.

On the basis of the recommendations made by the Government Actuary Department (GAD), and having regard to whether each employer's participation in the Pension Schemes is open or closed to new members, the following employer contribution rates are applicable in respect of active membership from 1 April 2007:

UKAEA	16.2%
Civil Nuclear Constabulary	16.2%
Ex BNFL	15.0%
SERC	15.8%
Ministry of Defence	14.8%

During the year, the Scheme Actuary completed a revised valuation of the scheme as at 31 March 2012. New contribution rates were applicable from 1st April 2017 onwards:

UKAEA	19.5%
Civil Nuclear Constabulary	19.3%
Ex BNFL	18.9%
SERC	15.8%
Ministry of Defence	15.8%

Contributions

All contributions have been collected in accordance with the Pension Schemes' Rules.

Future plans

UKAEA and its advisors have met with BEIS, HM Treasury, Cabinet Office and other scheme employers to discuss the future plans for UKAEA Schemes and the transfer to a career average scheme at a date to be agreed. These changes are required following the publication of the Public Service Pension Act 2013. UKAEA received approval from HM Treasury for members affected by the provisions of the Act to join the Civil Service and Others Pension Scheme (alpha) with effect from 1 April 2017 and preparations were made for this transfer. In March 2017 the Chief Secretary to the Treasury took the view, in light of an ongoing employment tribunal and appeals government should delay any impending transfer of scheme members staff to the main public service pension schemes that include Transitional Protection provisions, as was proposed in the UKAEA schemes. UKAEA has therefore paused the transfer to alpha, and awaits further information from HM Treasury. The changes will not affect pensioners or deferred members as a result of the pension reform required under the Public Service Pension Scheme Act 2013.

Membership Statistics

[1] The Research Council members are included in the Authority figures as they are part of the Authority sub-fund.

[2] Active Deferred – The Nuclear Decommissioning Authority (NDA), established with effect from 1 April 2005, set up a new scheme, the Combined Nuclear Pension Plan (CNPP). The CNPP is the vehicle for pension provision for eligible members in the nuclear industry who were active members of the CPS. As eligibility for membership to the CPS ceased, individuals were invited to join the CNPP and had the opportunity to preserve their accrued benefits in the CPS and were not transferred to the CNPP. The preserved CPS benefits for these members are calculated using the same pensionable final earnings as applies to the calculation of the CNPP benefits, hence the “active deferred” category of members.

Schemes records

Records are maintained in separate parts for UKAEA (including CNC and the Research Councils), Ex-BNFL (including INSL and NNL), and MOD to enable the Schemes Actuary to advise on the contributions to be made by the participating employers to the Schemes.

Defined contribution arrangements

In addition to allowing members to pay additional contributions to purchase added years of service within the Schemes, there exists facilities for additional contributions to be made to two defined contribution schemes (the Additional Voluntary Contribution (AVC) scheme and the Shift Pay Pension Savings Plan (the Plan)). These are fully insured schemes administered by the Prudential Assurance Company Limited to whom contributions are paid.

The AVC scheme is open to members of the Public Service Pension Schemes who have opted to pay additional voluntary contributions. No employer contributions are made to this scheme. The Plan is open to shift workers who are members of the Public Service Pension Schemes. Contributions to this scheme are directly linked to shift pay earnings with the employers contributing a percentage of pensionable shift pay salary equal to the percentage payable by them to the CPS.

The transactions relating to the AVC scheme and the Plan are presented in Note 6 in these Accounts. The transactions are not reflected in the financial statements as separate accounts are prepared for these defined contribution arrangements.

Rule amendments

The rules were amended to extend membership to employees of United Kingdom Research and Innovation (UKRI) who were employed by the Research Councils and were members of this pension scheme on 31 March 2018.

Pensions review

Under the Rules of the Schemes, benefits are increased in line with increases in the cost of living to the extent corresponding to and upon like terms and conditions as apply in relation to official pensions in accordance with the Pension Schemes Act 1995. The increase for 2017-18 was 3% (2016-17: 0%).

Transfer values paid

Individual transfer values paid have been calculated using either “a cash equivalent method”, in accordance with the Pension Schemes Act 1995 or, for eligible members, a “mixed transfer” method, in accordance with the Rules, where this was more favourable. Where there has been a compulsory transfer of employment, group transfer values paid have been calculated with HM Treasury agreement using a “past service reserve” method. Under these arrangements, which are generally more favourable than “cash equivalent” transfers, account is taken of potential salary increases to Normal Retirement Age rather than price increases over the same period.

Premature retirements

The Rules of the Schemes provide for certain benefits to be paid to members retiring early. These benefits may include a lump sum and annual payments until normal retirement age. The annual payments are not chargeable to the Schemes' Accounts and are fully funded by the appropriate participating employer. The extent of activity for the Schemes under the above arrangements, for all participating employers, is shown in the following table:

	2017-18	2016-17
	£000	£000
Amount due to/ (from) employers at 1 April	(95)	(164)
Adjustment to opening balance	-	81
Received from employers during year	18,910	13,403
Paid to members during year	(14,863)	(12,520)
Repaid to employers during year	(3,974)	(895)
Amount due (from)/ to employers at 31 March	(22)	(95)

Lump sum compensation payments and other benefit payments that are paid directly by participating employers to members retiring early are excluded from the above figures.

Financial review

The pension cost for the year was £79 million (2016-17: £48 million) representing an increase of £31 million. The overall pension expenditure for the year was £312 million (2016-17: £288 million) £24 million more than the prior year. This increase has arisen because the pensionable payroll in 2017-18 was higher than previously estimated, and the payroll estimate in turn is based on employer contributions and outturn for employer contributions has been higher than in the previous year.

The value of benefits paid increased by £1.6 million in 2017-18 to £245 million, which was mainly due to the annual increase in the value of benefits, and to changes in the profile of the pensioners. The number of pensioners and dependents increased during the year by 137 to 22,436 as at 31 March 2018.

The value of contributions receivable increased by £5.7 million to £35 million (2016-17: £29 million). There was a small increase in the number of contributing members, from 3,217 at 31 March 2017 to 3,270 as at 31 March 2018. The value of transfers in to the Schemes increased in 2017-18 by £1.7 million to £3.2 million (2016-17: £1.5m). The value of transfers out of the Schemes increased in 2017-18 to £1.1 million (2016-17: £0.2 million).

Overall, the net outgoings for the year were £274 million (2016-17: £258 million). The increase of £16m is driven by: an increase in the current service cost, resulted from the reduction in the discount rate and higher underlying payroll, i.e. more members; and publication of HM Treasury guidance on the indexation and equalisation of Guaranteed Minimum Pensions, which resulted in a higher amount provided for the past service cost (compared to no past service cost last year).

Offsetting factors which reduce the size of the increase are (a) an increase in the contributions provided by employees and employers, which offsets the two increases mentioned above because it is additional income. This results from higher underlying payroll and from an increase to the employer contribution rates; and (b) a reduction in the pension financing cost, which is driven by the reduction in the nominal discount rate (offset by an increase in the liability at the start of the year).

On the Net Cash Requirement, Outturn compared with the Estimate shows a £28 million saving. This is the result of the forecast including a conservative estimate of both the level of interest due on the liabilities of the Schemes and lump sum expenditure. In addition, the accrual of new pension benefits and the estimated interest cost were lower than allowed for in the Estimate.

The overall Schemes' liability as at 31 March 2018 was £8,031.7 million; a reduction by £255 million from 2016-17. The main factor underlying the decrease in the actuarial liability is the changes to the financial assumptions (which are largely prescribed by HM Treasury).

The financial statements and accompanying notes on pages 28 to 43 provide further details of the Schemes' income and expenditure, and assets and liabilities.

Actuarial position, actuary's valuation and statement

In order that the defined benefit obligations recognised in the financial statements do not differ materially from those that would be determined at the reporting date by a formal actuarial valuation, the Government Financial Reporting Manual (FReM) requires that "the period between formal actuarial valuations shall be four years, with approximate assessments in intervening years".

Employer contribution rates have been set based on actuarial valuation calculations using data as at 31 March 2012. However, the amounts recognised in these financial statements have been prepared using full membership data as at 31 March 2016, such as would have been provided for a formal actuarial valuation and updating this to 31 March 2018 to reflect known changes. Approximate actuarial assessments in intervening years between formal valuations using updated membership data are accepted as providing suitably robust figures for financial reporting purposes. In undertaking this valuation, the methodology prescribed in IAS19 'Employee Benefits', relevant FReM interpretations and the discount rate prescribed by HM Treasury have also been used.

The Government Actuary's Department's report on the 2017-18 Accounts, based on the position as at 31 March 2018, confirmed that the Schemes' liabilities were £8,031.7 million discounted at a real rate of 0.10% under the Rules at the date of the valuation. The actuarial report is reproduced on pages 11 to 16.

Auditors

These Financial Statements have been audited by the Comptroller and Auditor General (C&AG) whose opinion is expressed on pages 25 to 27. The notional cost of the audit for 2017-18 is £35,750. The audit fee is classified as an administration cost (rather than programme) and is borne on the BEIS Vote.

Disclosure of Audit Information

As far as I am aware, there is no relevant audit information of which the Schemes' auditors are unaware. I have taken all the steps that I ought to have taken to make myself aware of any relevant audit information and to establish that the Schemes' auditors are aware of that information.

I confirm that the Combined Annual Accounts as a whole are fair, balanced and understandable. I take personal responsibility for the Combined Annual Accounts and the judgments required for determining that they are fair, balanced and understandable.

Alex Chisholm
Principal Accounting Officer and Permanent Secretary

9 July 2018

Report of the Actuary

United Kingdom Atomic Energy Authority (“UKAEA”)

- Combined Pension Scheme
- Principal Non-Industrial Superannuation Scheme
- Protected Persons Superannuation Scheme

Accounts for the year ended 31 March 2018

Introduction

1. This statement has been prepared by the Government Actuary’s Department (GAD) at the request of UKAEA. It provides a summary of GAD’s assessment of the scheme liability in respect of the UKAEA Pension Schemes (UKAEA) as at 31 March 2018, and the movement in the scheme liability over the year 2017-18, prepared in accordance with the requirements of Chapter 9 of the 2017-18 version of the Financial Reporting Manual.
2. The UKAEA is a defined benefit scheme providing pension and lump sum benefits on retirement, death and resignation. The scheme is wholly unfunded. I am not aware of any informal practices operated within the scheme which lead to a constructive obligation.
3. The assessment has been carried out by calculating the liability as at 31 March 2016 based on the data provided as at 31 March 2016 and rolling forward that liability to 31 March 2018.

Membership data

4. Tables A to D summarise the principal membership data as at 31 March 2016 used to prepare this statement.

Table A – Active members

	31 March 2016 membership data	2017-18 accounts
Number	Total salaries (pa) (£ million) *	Estimated salaries implied by receipts (£ million)
3,081	120.3	126.8

*Full-time equivalent

Table B – Active deferred members

31 March 2016 membership data	
Number	Total salaries (pa) (£ million) *
8,201	374.9

*Full-time equivalent

Table C – Deferred members

31 March 2016 membership data	
Number	Total deferred pension* (pa) (£ million)
9,988	44.9

*Including pension increases up to and including the April 2016 award

Table D – Pensions in payment

31 March 2016 membership data	
Number	Total pension* (pa) (£ million)
22,122	208.1

*Including pension increases up to and including the April 2016 award

Methodology

5. The present value of the liabilities as at 31 March 2018 has been determined using the Projected Unit Credit Method (PUCM), with allowance for expected future pay increases in respect of active members, and the demographic and financial assumptions applying as at 31 March 2018. The current service cost (expressed as a percentage of pensionable pay) in respect of accruing costs in the year ended 31 March 2018 was determined using the PUCM and the demographic and financial assumptions applicable at the start of the year, that is, those adopted as at 31 March 2017 in the 2016-17 accounts.
6. This statement takes into account the benefits normally provided under the scheme, including age retirement benefits, ill-health retirement benefits and benefits applicable following the death of the member. It does not include the cost of injury benefits (in excess of ill-health benefits). It does not include premature retirement and redundancy benefits in respect of current active members, although the assessment of liabilities includes pensions already in payment in respect of such cases.

Financial assumptions

7. The principal financial assumptions adopted to prepare this statement are shown in Table E.

Table E – Principal financial assumptions

Assumption	31 March 2018	31 March 2017
	pa	pa
Nominal discount rate	2.55%	2.80%
Rate of pension increases	2.45%	2.55%
Rate of general pay increases	3.95%	4.55% from 2020-21
Rate of short-term general pay increase	n/a	1.0% pa to 2019-20 for some employers
Real discount rate in excess of:		
• Pension increases	0.10%	0.24%
• Long-term pay increases	(1.35%)	(1.67)%
Expected return on assets	n/a	n/a

8. The assessment of the liabilities allows for the known pension increases up to and including April 2018.

Demographic assumptions

9. The accounts as at 31 March 2017 were based on the demographic assumptions adopted for the 2012 valuation. For the accounts as at 31 March 2018, the mortality assumptions have been updated.
10. Table F summarises the mortality assumptions adopted to prepare this statement, which were derived from the specific experience of the scheme membership. The table refers to the standard mortality tables prepared by the Continuous Mortality Investigation (part of the Actuarial Profession) known as the 'S2 tables' with the percentage adjustments to those tables derived from scheme experience.

Table F – Post-retirement mortality assumptions

Baseline mortality	Standard table	Adjustment
Normal Health		
BNFL Males	S2NMA	101%
Non-BNFL Males	S2NMA	92%
Females	S2NFA	99%
Current ill health pensioners		
Males	S2IMA	100%
Females	S2IFA	100%
Future ill-health pensioners		
Males	S2IMA	100%
Females	S2IFA	100%
Spouses		
Males	S2NMA	100%
Females	S2DFA	110%

11. Mortality improvements are assumed to be in line with the latest 2016-based principal population projections for the United Kingdom published by the Office for National Statistics on 26 October 2017. Note that the accounts as at 31 March 2017 were based on the previous 2014-based projections.

Liabilities

12. Table G summarises the assessed value as at 31 March 2018 of benefits accrued under the scheme prior to this date based on the data, methodology and assumptions described in paragraphs 4 to 11. The corresponding figures for the previous year are shown for comparison.

Table G – Statement of Financial Position**£ million**

	31 March 2018	31 March 2017
Total market value of assets	nil	nil
Value of liabilities	8,031.7	8,287.1
Surplus/(Deficit)	(8,031.7)	(8,287.1)
of which recoverable by employers	n/a	n/a

Accruing costs

13. The cost of benefits accrued in the year ended 31 March 2018 (the current service cost) is assessed as 57.3% of pensionable pay.

14. For the avoidance of doubt, the actual rate of contributions payable by employers and employees is not the same as the current service cost assessed for the accounts. The actual employer contribution rate was determined as part of a funding valuation using different assumptions. Members contributed 8.2% or 10.7% of pay. Table H shows the employer and employee contributions during the year 2017-18 as a percentage of pensionable pay, and compares the total contributions with the current service cost assessed for the 2017-18 accounts.

Table H – Contribution rate

	2017-18 % of pay	2016-17 % of pay
Employer contributions (excluding expenses)	19.2%	15.8%
Employee contributions (average)	8.2%	8.2%
Total contributions	27.4%	24.0%
Current service cost (expressed as a % of pay)	57.3%	39.5%

15. The key difference between the assumptions used for funding valuations and accounts is the discount rate, although price inflation and salary increases are also determined differently. The discount rate for accounts is set each year by HM Treasury to reflect the requirements of the accounting standard IAS 19.
16. The pensionable payroll for the financial year 2017-18 was £126.6 million (derived from contributions payable by employers over the year). Based on this information, the accruing cost of pensions in 2017-18 (at 57.3% of pay) is assessed to be £72.6 million.
17. Past service costs arise when an employer undertakes to provide a different level of benefits than previously promised. The Government published a response to the consultation on indexation and equalisation of GMP in public service pension schemes in January 2018¹. This resulted in a past service cost in respect of these members of £6.0 million. I am not aware of any other events that have led to a material past service cost over 2017-18.
18. I am not aware of any events that have led to a material settlement or curtailment gain or loss over 2017-18.

Sensitivity analysis

19. The results of any actuarial calculation are inherently uncertain because of the assumptions which must be made. In recognition of this uncertainty I have been asked to indicate the approximate effects on the actuarial liability as at 31 March 2018 of changes to the most significant actuarial assumptions.
20. The most significant financial assumptions are the discount rate, general earnings increases and pension increases (currently based on CPI). A key demographic assumption is pensioner mortality.

¹ <https://www.gov.uk/government/consultations/indexation-and-equalisation-of-gmp-in-public-service-pension-schemes>

21. Table I shows the indicative effects on the total liability as at 31 March 2018 of changes to these assumptions (rounded to the nearest ½%).

Table I - Sensitivity to significant assumptions

Change in assumption		Approximate effect on total liability	
Financial assumptions			
(i) discount rate*:	+ ½% a year	- 10%	- £803.1 million
(ii) (long-term) earnings increase*:	+ ½% a year	+ 2%	+ £160.6 million
(iii) pension increases*:	+ ½% a year	+ 7%	+ £562.2 million
Demographic assumptions			
(iv) additional 1 year increase in life expectancy at retirement		+ 3%	+ £240.9 million

* Opposite changes in the assumptions will produce approximately equal and opposite changes in the liability.

Ian Sharpe FIA

Actuary

Government Actuary's Department

20 June 2018

Statement of Accounting Officer's Responsibilities

Under the Government Resources and Accounts Act 2000, HM Treasury has directed the Department for Business, Energy and Industrial Strategy (BEIS) to prepare for each financial year a statement of accounts for the United Kingdom Atomic Energy Authority Pension Schemes in the form and on the basis set out in the Accounts Direction.

With the exception of certain transactions (which are accounted for on a cash basis, the use of which has no material effect on the net outgoings for the year nor on the combined net liabilities at the financial year end), the combined financial statements are prepared on an accruals basis and must give a true and fair view of the financial transactions and affairs of the United Kingdom Atomic Energy Authority Pension Schemes and of its net resource outturn, application of resources, changes in taxpayers' equity and cash flows for the financial year.

In preparing the financial statements, the Accounting Officer is required to comply with the requirements of the *Government Financial Reporting Manual (FReM)* and in particular to:

- Observe the Accounts Direction issued by HM Treasury including the relevant accounting and disclosure requirements, and apply suitable accounting policies on a consistent basis;
- Make judgements and estimates on a reasonable basis;
- State whether applicable accounting standards, as set out in the *Government Financial Reporting Manual* have been followed, and disclose and explain any material departures in the financial statements; and
- Prepare the financial statements on a going concern basis.

HM Treasury has appointed the Permanent Secretary of BEIS as Accounting Officer for the United Kingdom Atomic Energy Authority Pension Schemes. The responsibilities of an Accounting Officer, including responsibility for the propriety and regularity of the public finances for which the Accounting Officer is answerable, for keeping proper records and for safeguarding the assets of the Pension Schemes are set out in *Managing Public Money* published by HM Treasury.

Governance Statement for the United Kingdom Atomic Energy Authority Pension Schemes 2017-18

Scope of responsibility

As Accounting Officer for the United Kingdom Atomic Energy Authority (“UKAEA”, “the Authority”) Pension Schemes (“the Schemes”) I have responsibility for maintaining a sound system of governance, risk management and internal control that supports the achievement of the Schemes’ policies, aims, and objectives and for safeguarding the public funds and departmental assets for which, as the Accounting Officer and Permanent Secretary for Department for Business, Energy and Industrial Strategy (“the Department”, “BEIS”), I am personally responsible, in accordance with the responsibilities assigned to me in *Managing Public Money*.

The Chief Executive and Accounting Officer of UKAEA (a partner organisation of the Department) is responsible for the management and administration of the Schemes on my behalf under the terms of a Management Framework between UKAEA and the Department, and for the maintenance and operation of the Governance Framework in that body.

The administration of the Schemes has been carried out by Aon plc under contract to UKAEA until 31 March 2018. From 1 April 2018 following a tender exercise carried out under the Office of the European Journal procedures Paymaster (1836) Ltd, a subsidiary of Equiniti Group plc was appointed as the new administrator of the Schemes. All employees and Schemes members have been informed of the change.

UKAEA disburses pensions and other payments and collects pension contributions and other income with the approval of the Department, which in turn ensures that funds are provided to meet the net cash outflow on pensions. The Department prepares this Resource Account which consolidates the financial information for the three separate Authority Schemes. Thus the governance framework over the Schemes in operation in UKAEA and the Department is relevant to this account.

The Governance Framework

UKAEA

The UKAEA Board and Audit Committee maintain oversight of the three UKAEA Schemes and provide me with assurance on the quality of the Accounts, governance, risk management and internal control arrangements as they affect the Schemes.

More details on UKAEA’s governance framework can be found in UKAEA’s Annual Report and Accounts.

The Department

The Departmental Board provides collective strategic leadership of the Department with responsibility for performance, risk and delivery including appropriate oversight of partner organisations, including UKAEA.

More details on the Department’s governance framework can be found in the Department’s Annual Report.

The Schemes

A Management Framework between the Department and UKAEA sets out the responsibilities that each have in respect of the funding, management and administration of the Schemes and incorporates a framework for the management of risks and maintaining a sound system of internal control. The Management Framework was reviewed during the course of 2017-18. It sets out Governance responsibilities.

In addition to the oversight function described above, UKAEA is responsible for managing and administering the Schemes properly and efficiently within the terms of the Schemes’ Rules and relevant legislation, handling

Schemes' finances with propriety, consistent with the requirements of Government Accounting, accounting to BEIS each month for the application of cash used and operating an effective system of internal controls and risk management in respect of these responsibilities. These include regular internal audit reviews.

In addition to the strategic responsibility described above, BEIS is responsible for reporting to Parliament on the resource and cash requirements for the Pension Schemes, preparing the annual Resource Account for the Schemes, and arranging for external audit of the Combined Resource Account, ensuring that the resource and cash requirement for each year is consistent with the relevant Estimate, operating an effective system of internal controls and risk management in respect of these responsibilities.

The Department / UKAEA Pension Schemes "Finance Meeting" meets on a quarterly basis. The objectives of these meetings are:

- To ensure that those representatives responsible for the management and reporting of financial data for UKAEA Pension Schemes have a good understanding of all the financial aspects of the Schemes;
- To ensure that future changes to the Pension Schemes are identified and the implications understood and communicated to each of the representative areas;
- To ensure that changes in personnel are managed in such a way that there is no loss of understanding and that there is continuity of financial management; and
- To manage the risks to the effective financial control of UKAEA Pension Schemes.

Participants at the "Finance Meeting" include representatives from the Department's Group Finance / Sponsor Team, Corporate Finance (Financial Reporting Team), Budgeting and Estimates team, Internal Audit, the Government Actuary Department (GAD) and UKAEA. The NAO attends as observers.

The Department / Authority Pension Schemes "Finance Meeting" met on the following dates: 25 September 2017, 4 December 2017 and 19 March 2018. During the year, the "Finance Meeting" considered the following issues:

- Valuation of the Schemes;
- Review of the process maps and responsibilities of the various parties to the Schemes;
- Pension Scheme Reform arising from the Public Services Pensions Act 2013.

A formal record of the minutes of each Finance Meeting is maintained, summarising the work of, and reflecting discussions held between the members. These minutes are shared with all the members and require their approval, which is sought in the following Finance Meeting. This approach is functioning well as it provides a continuous update on the agreed actions, and significantly improving the understanding across all the parties involved.

Risk Management

The risk management process for the Schemes operates through the initial identification of risks against the Schemes' objectives. These risks are then evaluated in terms of impact and probability to determine the key risks inherent to the Schemes. Consideration is then given to the controls in place to manage each risk and how effective they are in mitigating the risk. This establishes the level of residual risk and enables management to determine what further action is required to manage the risk. Ownership for each risk is then assigned to named individuals who will report on progress in managing the risk when the risk register is reviewed. Assurance is obtained through regular management reviews and periodic Internal Audits of the Schemes. There were no significant lapses of data security during this financial year to report in this statement.

A risk register for the Schemes operated throughout the year and contains both the key strategic and operational risks. Each of the teams involved in operating the Schemes also maintain their own local risk register. Key strategic risks relate to:

- Engaging effectively with HM Treasury over the unique issues around the Schemes in helping to develop optimum arrangements for the future;
- Implementing appropriate governance arrangements for existing schemes that reflect best practice;

- Ensuring bulk transfers of members have sufficient funding provision, authorised through Parliamentary Estimates, before being finalised;
- Next valuation of the Schemes and its potential impact on contribution rate for employers;
- Ensuring employers recognise their ownership of existing liabilities where no active members remain in their organisation; and
- Entry to the Civil Service and Others Pension Scheme (alpha) is delivered in accordance with Ministerial approval. There is uncertainty of the date of entry as the process has been paused under instruction from HM Treasury.

A number of mitigating actions have been put in place to manage the above risks and progress on these will be monitored during the course of 2018-19.

UKAEA and BEIS are holding discussions with HM Treasury regarding the legacy liabilities for the Schemes. This is a key issue regarding where and how potential deficits must be provided for by the appropriate employer or sponsor Department.

Reporting of Personal Data Related Incidents

UKAEA reported no incidents of the loss of any “Protected Personal Data” to the Information Commissioners Office in 2017-18 (or prior years). There were no reportable “Other Protected Personal Data” incidents in 2017-18 (or prior years) such as the loss of inadequately protected or insecure disposal of electronic equipment, devices or paper documents from secured Government premises, or any other unauthorised disclosure.

UKAEA will continue to monitor and assess its information risks, in order to identify and address any weaknesses and ensure continuous improvement of its systems.

Review of effectiveness

As Accounting Officer, I have responsibility for reviewing the effectiveness of the system of governance, risk management and internal control. My review of the effectiveness is informed by the work of the internal auditors and the executive managers within the Department and UKAEA who have responsibility for the development and maintenance of the risk management and internal control framework for the Schemes; and comments made by the external auditors in their management letter and other reports. I have been advised on the implications of the result of my review of the effectiveness of the system of internal control by the UKAEA Audit Committee and mechanisms are in place to ensure continuous improvement of the system is in place. The effectiveness of the governance frameworks in operation more generally in UKAEA and the Department are reflected in the respective Governance Statements of these organisations.

My review has provided me with assurance that the system of governance risk management and internal control in operation for the Schemes has operated satisfactorily during 2017-18.

Alex Chisholm
Principal Accounting Officer and Permanent Secretary

9 July 2018

Statement of Parliamentary Supply *(this section is subject to audit)*

In addition to the primary statements prepared under IFRS, the Government Financial Reporting Manual (FRM) requires the Pension Schemes' to prepare a Statement of Parliamentary Supply (SoPS) and supporting notes to show resource outturn against the Supply Estimate presented to Parliament, in respect of each budgetary control limit.

Summary of Resource Outturn 2017-18

								2017-18 £000	2016-17 £000
		Estimate			Outturn			Voted outturn compared with Estimate: saving/ (excess)	Outturn
SoPS Note	Voted	Non-Voted	Total	Voted	Non-Voted	Total	Total		
Annually Managed Expenditure									
- Resource	295,056	-	295,056	273,708	-	273,708	21,348	257,509	
Total Budget	295,056	-	295,056	273,708	-	273,708	21,348	257,509	
Non-Budget									
Total	295,056	-	295,056	273,708	-	273,708	21,348	257,509	

Net Cash Requirement 2017-18

				2017-18 £000	2016-17 £000
		£000	£000	£000	£000
SoPS Note	Estimate	Outturn	Outturn compared with Estimate: saving/ (excess)	Outturn	Outturn
	237,005	209,040	27,965	213,199	

(i) Figures in the areas outlined in bold are voted totals or other totals subject to Parliamentary control.

(ii) All resources are classified as Annually Managed Expenditure (AME), they are all classified as Programme costs and there is no Administration Costs limit.

(iii) Explanations of variance between Estimate and Outturn in the Net Cash Requirement is given in the Financial Review

Notes to the Statement of Parliamentary Supply *(this section is subject to audit)*

SOPS1. Net outturn

	2017-18 £000										2016-17 £000
	Outturn							Estimate			Outturn
	Administration			Programme			Total	Net Total	Net total compared to Estimate	Net total compared to Estimate, adjusted for virements	Total
	Gross	Income	Net	Gross	Income	Net					
Annually Managed Expenditure											
Voted											
Pensions, transfer values, repayment of contributions	-	-	-	312,021	(38,313)	273,708	273,708	295,056	21,348	-	257,509
Total	-	-	-	312,021	(38,313)	273,708	273,708	295,056	21,348	-	257,509

All figures within the outturn section are taken directly from the Statement of Comprehensive Net Expenditure on page 28 of these accounts and therefore no separate reconciliation is required.

The Schemes do not have a Departmental Expenditure Limit (DEL), Capital, Non-voted Annually Managed Expenditure (AME) or an administration budget in the SoPS.

SOPS2. Reconciliation of Net Resource Outturn to Net Cash Requirement

	Note	Estimate	Outturn	Net total outturn compared with Estimate: saving/ (excess)
		£000	£000	£000
Resource Outturn		295,056	273,708	21,348
Accruals to cash adjustments:				
Adjustments to remove non-cash items:				
New Provisions and adjustments to previous provisions	SoCNE	(333,517)	(312,021)	(21,496)
Adjustments to reflect movements in working balances		10,000	502	9,498
Use of provision	10.4	265,466	246,851	18,615
Net cash requirement		237,005	209,040	27,965

Parliamentary Accountability Disclosures *(this section is subject to audit)*

Losses and special payments

There are no losses or special payments, individually or in aggregate in excess of £300,000 which would require separate disclosure during the year to 31 March 2018 (2016-17: nil), or that have been recognised since that date.

The Certificate and Report of the Comptroller and Auditor General to the House of Commons

Opinion on financial statements

I certify that I have audited the financial statements of the United Kingdom Atomic Energy Authority Pension Schemes Combined Annual Accounts for the year ended 31 March 2018 under the Government Resources and Accounts Act 2000. The financial statements comprise: the Combined Statements of Comprehensive Net Expenditure, Financial Position, Cash Flows, Changes in Taxpayers' Equity; and the related notes, including the significant accounting policies. These financial statements have been prepared under the accounting policies set out within them. I have also audited the Statement of Parliamentary Supply and the related notes, and the information in the Parliamentary Accountability Disclosures that is described in those reports and disclosures as having been audited.

In my opinion:

- the financial statements give a true and fair view of the state of the Schemes' affairs as at 31 March 2018 and of their net expenditure for the year then ended; and
- the financial statements have been properly prepared in accordance with the Government Resources and Accounts Act 2000 and HM Treasury directions issued thereunder.

Opinion on regularity

In my opinion, in all material respects:

- the Statement of Parliamentary Supply properly presents the outturn against voted Parliamentary control totals for the year ended 31 March 2018 and shows that those totals have not been exceeded; and
- the expenditure and income recorded in the financial statements have been applied to the purposes intended by Parliament and the financial transactions recorded in the financial statements conform to the authorities which govern them.

Basis of opinions

I conducted my audit in accordance with International Standards on Auditing (ISAs) (UK). My responsibilities under those standards are further described in the Auditor's responsibilities for the audit of the financial statements section of my certificate. Those standards require me and my staff to comply with the Financial Reporting Council's Revised Ethical Standard 2016. I am independent of the United Kingdom Atomic Energy Authority Pension Schemes in accordance with the ethical requirements that are relevant to my audit and the financial statements in the UK. My staff and I have fulfilled our other ethical responsibilities in accordance with these requirements. I believe that the audit evidence I have obtained is sufficient and appropriate to provide a basis for my opinion.

Responsibilities of the Accounting Officer for the financial statements

As explained more fully in the Statement of Accounting Officer's Responsibilities, the Accounting Officer is responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view.

Auditor's responsibilities for the audit of the financial statements

My responsibility is to audit, certify and report on the financial statements in accordance with the Government Resources and Accounts Act 2000.

An audit involves obtaining evidence about the amounts and disclosures in the financial statements sufficient to give reasonable assurance that the financial statements are free from material misstatement, whether caused by fraud or error. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from

fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs (UK), I exercise professional judgment and maintain professional scepticism throughout the audit. I also:

- identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for my opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the United Kingdom Atomic Energy Authority Pension Schemes' internal control.
- evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the United Kingdom Atomic Energy Authority Pension Schemes' ability to continue as a going concern. If I conclude that a material uncertainty exists, I am required to draw attention in my auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify my opinion. My conclusions are based on the audit evidence obtained up to the date of my auditor's report. However, future events or conditions may cause the entity to cease to continue as a going concern.
- evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

I communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that I identify during my audit.

I am required to obtain evidence sufficient to give reasonable assurance that the Statement of Parliamentary Supply properly presents the outturn against Parliamentary control totals and that those totals have not been exceeded. The voted Parliamentary control totals are Departmental Expenditure Limits (Resource and Capital), Annually Managed Expenditure (Resource and capital), Non-Budget (Resource) and Net Cash Requirement. I am also required to obtain evidence sufficient to give reasonable assurance that the expenditure and income recorded in the financial statements have been applied to the purposes intended by Parliament and the financial transactions recorded in the financial statements conform to the authorities which govern them.

Other Information

The Accounting Officer is responsible for the other information. The other information comprises information included in the Annual Report, other than the parts of the Parliamentary Accountability Disclosures described in that report as having been audited, the financial statements and my auditor's report thereon. My opinion on the financial statements does not cover the other information and I do not express any form of assurance conclusion thereon. In connection with my audit of the financial statements, my responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or my knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work I have performed, I conclude that there is a material misstatement of this other information, I am required to report that fact. I have nothing to report in this regard.

Opinion on other matters

In my opinion:

- the Parliamentary Accountability Disclosures to be audited have been properly prepared in accordance with HM Treasury directions made under the Government Resources and Accounts Act 2000;
- in the light of the knowledge and understanding of the United Kingdom Atomic Energy Pension Schemes and their environment obtained in the course of the audit, I have not identified any material misstatements in the Annual Report; and
- the information given in the Report of the Managers and the Report of the Actuary for the financial year for which the financial statements are prepared is consistent with the financial statements.

Matters on which I report by exception

I have nothing to report in respect of the following matters which I report to you if, in my opinion:

- adequate accounting records have not been kept or returns adequate for my audit have not been received from branches not visited by my staff; or
- the financial statements and the parts of the Parliamentary Accountability Disclosures to be audited are not in agreement with the accounting records and returns; or
- I have not received all of the information and explanations I require for my audit; or
- the Governance Statement does not reflect compliance with HM Treasury's guidance.

Report

I have no observations to make on these financial statements.

Sir Amyas C E Morse
Comptroller and Auditor General

Cash and cash equivalents at the end of the period	8	10,840	8,580

Notes 1 to 14 form part of these Accounts.

Note 1 Notes to the Schemes Statements

1. Statement of accounting policies

The accounting policies contained in the *Government Financial Reporting Manual (FReM)* issued by HM Treasury follow International Financial Reporting Standards (IFRS) to the extent that they are meaningful and appropriate in the public sector context.

Where the *FReM* permits a choice of accounting policy, the accounting policy which has been judged to be most appropriate to the particular circumstances of the Schemes for the purpose of giving a true and fair view has been selected. The accounting policies adopted have been applied consistently in dealing with items considered material in relation to the accounts.

1.1 Basis of preparation of the Schemes financial statements

The financial statements of the Combined Schemes have been prepared in accordance with the relevant provisions of the *FReM*. The accounting policies contained in the *FReM* apply International Financial Reporting Standards as adapted or interpreted for the public sector. IAS 19 *Employee Benefits* and IAS 26 *Accounting and Reporting by Retirement Benefit Plans* are of particular relevance to these statements.

In addition to the primary statements prepared under International Financial Reporting Standards, the *FReM* also requires the Schemes to prepare an additional statement – a *Statement of Parliamentary Supply*. This statement, and its supporting notes, show outturn against Estimate in terms of the net resource requirement and the net cash requirement. The Statement of Parliamentary Supply and its supporting notes are shown on pages 21-23.

1.2 UKAEA Pension Schemes

The UKAEA Pension Schemes are an unfunded, defined benefit pay-as-you-go occupational pension scheme operated by the United Kingdom Atomic Energy Authority Pension Schemes on behalf of the members that satisfy the membership criteria.

Contributions to the Schemes by employers and employees are set at rates determined by the Schemes' Actuary and approved by the governing body. The contributions partially fund payments made by the Schemes, the balance of funding being provided by Parliament through the annual Supply Estimates process.

The financial statements of the Schemes show the financial position of the UKAEA Pension Schemes at the year end and the income and expenditure during the year. The Statement of Financial Position shows the unfunded net liabilities of the Schemes; the Statement of Comprehensive Net Expenditure shows, amongst other things, factors contributing to the change in the net liability analysed between the pension cost, enhancements and transfers in, and the interest on the Schemes' liability. Further information about the actuarial position of the Schemes is dealt with in the Report of the Actuary, and the Schemes financial statements should be read in conjunction with that Report.

1.3 Pension contributions receivable

1.3.1 Employers' normal pension contributions are accounted for on an accruals basis.

1.3.2 Employers' special pension contributions are accounted for in accordance with the agreement under which they are paid.

1.3.3 Employees' pension contributions are accounted for on an accruals basis.

1.3.4 Employees' contributions include amounts paid in respect of the purchase of added years but exclude contributions to the Additional Voluntary Contribution scheme (AVC) and the Shift Pay Pension Plan scheme (SPPP). The transactions relating to the AVC scheme and the SPPP are not reflected in these Combined Accounts as separate accounts are prepared for these defined contribution arrangements.

1.4 Transfers in and out

1.4.1 Transfers in are normally accounted for as income and expenditure (representing the associated increase in the Schemes' liability) on a cash basis, although group transfers in may be accounted for on an accruals basis

where the Schemes have formally accepted or transferred a liability. Transfers out are normally accounted for as use of provision.

1.5 Income received in respect of enhancements

- 1.5.1 Amounts receivable in respect of bringing forward the payment of accrued pension lump sums, and in respect of the capitalised costs of pension enhancement either at departure or at retirement, are accounted for as income and expenditure (representing the associated increase in the Schemes' liability) on a cash basis.

1.6 Gain or loss on settlements or curtailments

- 1.6.1 A gain or loss on settlement or curtailment is recognised when there has been a significant reduction in the number of Schemes' members or when there is an amendment to the terms of the Schemes so that a significant element of future service by members will no longer qualify for benefits or will only qualify for reduced benefits. Gains or losses are recognised when they occur.

1.7 Other income

- 1.7.1 Other income, including refunds of gratuities, and overpayments recovered other than by deduction from future benefits, are accounted for on an accruals basis. To the extent that this income also represents an increase in the Schemes' liability, it is also reflected in expenditure.

1.8 Current service cost

- 1.8.1 The current service cost is the increase in the present value of the Schemes' liabilities arising from current member's service in the current period and is recognised in the Combined Statement of Comprehensive Net Expenditure. The cost is based on a discount rate at the start of the year of 0.24% real (i.e. 2.80% including CPI inflation).

1.9 Past service costs

- 1.9.1 Past service costs are increases in the present value of the Schemes' liabilities related to employee service in prior periods arising in the current period as a result of the introduction of, or improvement to, retirement benefits.
- 1.9.2 Past service costs are recognised in the Combined Statement of Comprehensive Net Expenditure on a straight line basis over the period in which increase in benefits vest.

1.10 Interest on Schemes' liabilities

- 1.10.1 The interest cost is the increase during the period in the present value of the Schemes' liabilities because the benefits are one period closer to settlement and is recognised in the Combined Statement of Comprehensive Net Expenditure. The interest cost is based on a discount rate (including inflation) at start of the year, i.e. 2.80%.

1.11 Other payments

- 1.11.1 Other payments are accounted for on an accruals basis.

1.12 Schemes' liability

- 1.12.1 Provision is made for liabilities to pay pensions and other benefits in the future. The Schemes' liability is measured on an actuarial basis using the projected unit method and is discounted at 0.10% real, i.e. 2.55% including inflation (2016-17: 0.24% real, i.e. 2.80% including inflation).

1.12.2 Actuarial valuations by a professionally qualified actuary are usually obtained for accounting purposes at intervals not exceeding four years. The effective date of the IAS 19 accounting calculation underlying these accounts is 31 March 2016. These calculations have been updated to 31 March 2018 to reflect known changes.

1.13 Pension benefits payable

1.13.1 Pension benefits payable are accounted for as a decrease in the Schemes' liability on an accruals basis.

1.14 Pension payments to those retiring at their normal retirement age

1.14.1 Where a retiring member of the Schemes has no choice over the allocation of benefits receivable between the value of the lump sum and the annual pension, the transaction is accounted for as a decrease in the Schemes' liability on an accruals basis.

1.14.2 Where retiring members of the Schemes have a choice over the allocation of benefits receivable between the value of the lump sum and the annual pension, the transaction is accounted for as a decrease in the Schemes' liability on a cash basis.

1.15 Pension payments to and on account of leavers before their normal retirement age

1.15.1 Where members of the Schemes are entitled only to a refund of contributions, the transaction is accounted for as a decrease in the Schemes' liability on an accruals basis.

1.15.2 Where members of the Schemes have the option of receiving a refund of contributions or a deferred pension, the transaction is accounted for as a decrease in the Schemes' liability on a cash basis.

1.16 Lump sums payable on death in service

1.16.1 Lump sum payments payable on death in service are accounted for on an accruals basis. They are a direct charge to the Schemes as they are not funded through the normal pension contributions.

1.17 Actuarial gains / losses

1.17.1 Actuarial gains and losses arising from any new valuation and from updating the latest actuarial valuation to reflect conditions at the Statement of Financial Position date are recognised in the Combined Statement of Other Comprehensive Net Expenditure.

1.18 Additional Voluntary Contributions

1.18.1 Additional Voluntary Contributions ('AVCs') are deducted from employees' salaries and are paid over directly by the employer to the approved AVC providers.

1.19 Significant estimates and judgements

1.19.1 The key estimates and judgements relate to the valuation of the pensions liability and these have been documented in full in the report of the Actuary and Note 10.

1.20 Administration costs

1.20.1 The administration costs are paid by the UKAEA and recovered from the participating employers in proportion to their scheme membership.

1.21 Accounting standards issued but not yet effective:

The following standards have been issued but not yet effective: IFRS 9 *Financial Instruments*, IFRS 15 *Revenue from Contracts with Customers* and IFRS 16 *Leases*.

IFRS 9 and IFRS 15 will be effective for annual periods beginning on or after 1 Jan 2018. IFRS 16 applies to annual reporting periods beginning on or after 1 January 2019.

IFRS 9 *Financial Instruments* has been introduced to replace IAS39 *Financial Instruments: Recognition and Measurement*. IFRS 9 simplifies the classification and measurement of financial assets and amends when and how impairments are calculated and reported, moving from an incurred loss to an expected loss model.

IFRS 15 *Revenue from Contracts with Customers* replaces IAS18 *Revenue* and IAS11 *Construction Contracts*, unifying the concepts in these two standards into a single model to recognise revenue once performance obligations under a contract are satisfied.

IFRS 16 *Leases* will replace IAS17 *Leases*. IFRS 16 amends the accounting for lessees, removing the distinction between operating leases and finance leases. IFRS 16 requires all leases, with terms over 12 months, to be recognised as finance leases. This will result in the recognition of a right-to-use asset, measured at the present value of future lease payments, and a matching liability in the Statement of Financial Position.

No material balances within the Schemes' accounts will be affected by the introduction of IFRS 15 and 16. Additionally, the effect of applying IFRS 9 on the financial statements is not expected to be material.

Note 2 Pension contributions receivable

	2017-18	2016-17
	£'000	£'000
Employers:		
Normal	(24,313)	(19,077)
Employees:		
Normal	(10,425)	(9,944)
Purchase of added years	(387)	(384)
	(35,125)	(29,405)

Note 3 Gain on settlements or curtailments

There is no gain on settlements or curtailments both in 2016-17 and 2017-18.

Note 4 Service Cost (see Note 10.4)

	2017-18	2016-17
	£'000	£'000
Current service cost	72,600	47,693
Past service cost - GMP indexation	6,000	-
	78,600	47,693

Note 5 Transfers in (See Note 10.4)

	2017-18	2016-17
	£'000	£'000
Group transfers in from other schemes	-	-
Individual transfers in from other schemes	3,188	1,480
	3,188	1,480

Amount receivable in respect of inward transfers increase the pension liability to the same extent. This increase is reflected in the Combined Statement of Comprehensive Net Expenditure as expenditure as part of the movements in the provision during the year.

Note 6 Additional Voluntary Contributions

Note 6.1

UKAEA's pension schemes provide for employees to make Additional Voluntary Contributions (AVCs) to increase their pension entitlements or to increase life assurance cover. Employees may arrange to have agreed sums deducted from their salaries for onward payment to one of the approved providers or may choose to make their own arrangements by making periodic payments to an insurance company or scheme institution. The Managers of the Combined Pension Scheme, the Principal Non-Industrial Superannuation Scheme and the Protected Persons Superannuation Scheme are responsible for payments made to the Schemes' approved provider. These AVCs are not brought to account in this Combined Resource account. Members participating in this arrangement receive an annual statement from the approved provider confirming the amounts held on their account and the movements in the year. The transactions relating to the AVCs are presented below.

Note 6.2 The aggregate amounts of AVC investments are included as follows below:

	2017-18	2016-17
	£'000	£'000
Movements in the year		
Balance at 1 April	48,691	51,854
Adjustment to balances as at 1 April	-	1
New investments	248	214
Sales of investments to provide pension benefits	(8,785)	(7,225)
Changes in market value of investments	3,968	3,847
Balance at 31 March	44,122	48,691

In the unlikely event of a default by the approved AVC provider, BEIS has no liability to guarantee pension payments. Under the United Kingdom Atomic Energy Authority arrangement with Prudential Assurance Company Ltd, the Schemes are classified as "insured" for the proposed of the Policyholders Protection Act 1975, which requires 90% of the value of the policy to be payable to the policy holders as determined by the Insurance Companies (Winding-Up) Rules 1985.

Note 7 Receivables - contributions due in respect of pensions

	2017-18	2016-17
	£'000	£'000
Amounts falling due within one year		
Pension contributions due from employers	2,018	1,604
Employees' normal contributions	857	857
Interest receivable	96	160
Other receivables	191	71
Balance at 31 March	3,162	2,692

Note 8 Cash and cash equivalents

	2017-18	2016-17
	£'000	£'000
Balance at 1 April	8,580	8,079
Net change in cash balances	2,260	501
Balance at 31 March	10,840	8,580

The balances at 31 March were held at:

Government Banking Service (GBS)	5,500	5,714
Commercial banks and cash in hand	5,340	2,866
Balance at 31 March	10,840	8,580

Note 9 Payables - in respect of pensions

	2017-18	2016-17
	£'000	£'000
Amounts falling due within one year		
Pensions	(657)	(698)
Lump sums	(822)	(756)
Refund of contribution	(44)	(36)
Individual transfers out to other schemes	-	-
HMRC and voluntary contributions	(2,811)	(2,804)
Overpaid contributions: employers	(22)	(94)
Other payables	-	-
Amounts issued from the Consolidated Fund for supply but not spent at year end	(10,840)	(8,580)
Balance at 31 March	(15,196)	(12,968)

Note 10 Pension liabilities

Note 10.1 Provision for pension liability

The United Kingdom Atomic Energy Authority Pension Schemes are a combination of three unfunded defined benefit public service pension schemes. Employer contribution rates have been set from 1 April 2017 onwards based on actuarial valuation calculations using data as at 31 March 2012. The amounts recognised in these financial statements have been prepared using full membership data as at 31 March 2016, such as would have been provided for a formal (funding) valuation and updating this to 31 March 2018 to reflect known changes. The Report of the Actuary on pages 11 to 16 sets out the scope, methodology and results of the work the actuary has carried out.

The Schemes' managers together with the actuary and the auditor have signed a Memorandum of Understanding that identifies, as far as practicable, the range of information that the Schemes' managers should make available to the actuary in order to meet the expected requirements of the Schemes' auditor. This information includes, but is not limited to, details of:

- Schemes' membership, including age and gender profiles, active membership, deferred pensioners and pensioners;
- Benefit structure, including details of any discretionary benefits and any proposals to amend the Schemes;
- Income and expenditure, including details of expected bulk transfers into or out of the Schemes; and
- Following consultation with the actuary, the key assumptions that should be used to value the Schemes' liabilities, ensuring that the assumptions are mutually compatible and reflect a best estimate of future experience.

The major assumptions used by the actuary were:

	At 31 March 2018	At 31 March 2017	At 31 March 2016	At 31 March 2015	At 31 March 2014
	%	%	%	%	%
Rate of increase in salaries	4.0	4.6	4.2	4.2	4.5
Rate of increase in pensions in payment and deferred pensions	2.5	2.6	2.2	2.2	2.5
Discount rate net of price inflation ²	0.1	0.2	1.4	1.3	1.8
Nominal Discount rate	2.6	2.8	3.6	3.6	4.4

These key assumptions are inherently uncertain, since it is impossible to predict with any accuracy future changes in the rate of salary increases, inflation, longevity or the return on corporate bonds. The actuary uses professional expertise in arriving at a view of the most appropriate rates to use in the annual valuation of the Schemes' liabilities. However, the Schemes' managers acknowledge that the valuation reported in these accounts is not certain, since a change in any one of these assumptions will either increase or reduce the liability. For example, on its own, even a small rise in the assumed rate of inflation will result in an increase in the pension liability.

The assumption that has the biggest impact on the amount of the reported liability is the discount rate net of price inflation. As set out in the FReM, and as required by IAS 19, the discount rate net of price inflation is based on yields on high quality corporate bonds. HM Treasury advise the relevant rate each year, based on the advice of the Government Actuary's Department. The inflation assumption reflects the long-term assumption for the CPI used in

² Most pension benefits under the Schemes are increased in line with inflation. The Government continues to set pension increases based on the Consumer Price Index (CPI) measure of inflation. In accordance with the *Government Financial Reporting Manual*, the liability at 31 March 2018 has been discounted at a real rate of 0.1%. The assumption data in the table are disclosed for comparative purposes and are rounded to one decimal place.

HM Treasury forecasting. The rates are set out in the above table. Any decrease in the discount rate net of inflation leads to a significant increase in the reported liability.

In accordance with IAS 19 the Scheme Managers are required to undertake a sensitivity analysis for each significant actuarial assumption as of the end of the reporting period, showing how the defined benefit obligation would have been affected by changes in the relevant actuarial assumption that were reasonably possible at that date. This analysis, including details of the methods and assumptions used in preparing the sensitivity analyses, the limitations of these methods, and the reasons for any changes in methods and assumptions used in preparing the sensitivity analyses, are included in the analysis of the pension liability below:

10.2 Analysis of pension liability

Assumption	31 March 2018	31 March 2017
Rate of return (discount rate)	2.55%	2.80%
Rate of earnings increases*	3.95%	4.55%
Rate of future pension increases	2.45%	2.55%
Rate of return in excess of:		
Pension increases (CPI)	0.10%	0.24%
Earnings increases	(1.35%)	(1.67)%
Expected return on assets:	n/a	n/a

* Short-term adjustments have been made to this assumption for the period to 2020

The Pension Schemes' liabilities accrue over employee's periods of service and are discharged over the period of retirement and, where applicable, the period for which a spouse or eligible partner survives the pensioner. In valuing the Schemes' liability, the Actuary must estimate the impact of several inherently uncertain variables into the future. The variables include not only the key financial assumptions noted in the table above, but also assumptions about the changes that will occur in the future in the mortality rate, the age of retirement and the age from which a pension becomes payable.

The value of the liability on the statement of financial position may be significantly affected by even small changes in assumptions. For example, if at a subsequent valuation, it is considered appropriate to increase or decrease the assumed rates of inflation or increases in salaries, the value of the pension liability will increase or decrease. The managers of the Scheme accept that, as a consequence, the valuation provided by the Actuary is inherently uncertain. The increase or decrease in future liability charged or credited for the year resulting from changes in assumptions is disclosed in note 10.7. The note also discloses "experience" gains or losses for the year, showing the amount charged or credited for the year because events have not coincided with assumptions made for the last valuation.

10.3 Sensitivity analysis

A sensitivity analysis for each significant actuarial assumption as of the end of the reporting period is shown in the Report of the Actuary on pages 11-16.

The liability is very sensitive to the assumed discount rate but this is primarily because changing the discount rate in isolation also changes the rate net of pension increases and earnings. If pension increases and earnings assumption were increased at the same time, then the impact on the liability would be small.

Higher pension increases have a substantial effect because this has an impact on all categories of members.

Pensioner mortality is also significant: if longevity at retirement were assumed to be 1 year longer, then this would increase the total actuarial liability by about 3.0%.

Changing the assumed timing of retirement has different effects on members in different circumstances. Members retiring later will result in reduced costs to the scheme, whereas members retiring earlier may result in additional costs.

The sensitivities show the change in assumption in isolation. In practice such assumptions rarely change in isolation and given the interdependencies between the assumptions the impacts may offset to some extent.

Note 10.4 Analysis of movements in the Schemes' liability

		2017-18	2016-17
	Note	£'000	£'000
Schemes' liability at 1 April		(8,287,116)	(6,730,906)
Service cost	4	(78,600)	(47,693)
Pension financing cost		(229,749)	(238,837)
Enhancements		(387)	(384)
Pension transfers in	5	(3,188)	(1,480)
Benefits payable	10.5	245,218	243,634
Pension payments to and on account of leavers	10.6	1,536	753
Actuarial gain/(loss)	10.7	320,597	(1,512,203)
Schemes' liability at 31 March		(8,031,689)	(8,287,116)

Note 10.5 Analysis of benefits paid

	2017-18	2016-17
	£'000	£'000
Pensions or annuities to retired employees and dependants (net of recoveries or overpayments)	205,568	203,220
Commutations and lump sum benefits on retirement	39,060	39,679
Death in service benefits	590	735
Per Statement of Cash Flows	245,218	243,634

Note 10.6 Analysis of payments to and on account of leavers

	2017-18	2016-17
	£'000	£'000
Refunds to members leaving service	446	534
Group transfers to other schemes	454	33
Individual transfers to other schemes	636	186
Per Statement of Cash Flows	1,536	753

Note 10.7 Analysis of actuarial gain/(loss)

	2017-18	2016-17
	£'000	£'000
Experience gains / (losses) arising on the Schemes' liabilities	(22,100)	(23,579)
Changes in assumptions underlying the present value of Schemes' liabilities	342,697	(1,488,624)
Per Statement of Changes in Taxpayers Equity	320,597	(1,512,203)

Note 10.8 History of Experience gains/(losses)

	2017-18	2016-17	2015-16	2014-15	2013-14
Experience gains / (losses) on Schemes' liabilities:					
Amount (£000)	(22,100)	(23,579)	144,479	52,365	28,166
Percentage of the present value of the Schemes' liabilities	0.28%	0.28%	2.10%	0.80%	0.50%
Total amount recognised in statement of Changes in Taxpayers Equity:					
Amount (£000)	320,597	(1,512,203)	123,351	(557,226)	(360,139)
Percentage of the present value of the Schemes' liabilities	-3.99%	18.25%	1.80%	-8%	-6%

Note 11 Financial Instruments

As the cash requirements of the Schemes are met through the Estimates process, financial instruments play a more limited role in creating and managing risk than would apply to a non-public sector scheme of a similar size. The majority of Schemes' financial instruments relate to contracts for non-financial items in line with the expected purchase and usage requirements and the Schemes are therefore exposed to little credit, liquidity or market risk.

Note 12 Contingent liabilities disclosed under IAS 37

There were no contingent liabilities at 31 March 2018 (31 March 2017: nil).

Note 13 Related-party transactions

UKAEA Pension Schemes fall within the ambit of the BEIS, which is regarded as a related party with which UKAEA has had various material transactions during the year.

In addition, the Schemes had material transactions with other central government bodies whose employees are members of the Schemes.

None of the Managers of the Schemes, key managerial staff or other related parties have undertaken any material transactions with the Schemes during the year.

Note 14 Events after the reporting period

The Accounting Officer of the Department has authorised the Combined Accounts to be issued on the date that the Comptroller and Auditor General certified the Accounts.
