Officer Cadet Survey - Cover Note 2017/18

Published 26 July 2018

The statistical release found separately provides results from the Officer Cadet Survey (OCS) 2017/18. The OCS is administered to four of the Armed Services initial officer training colleges to gauge officer cadets' background, perceptions of training, facilities and food, support, fairness of treatment, general perceptions of the course and hopes for the future. The data is used to inform colleges on their performance, and to compare results with required standards set by the MOD.

Methodology

All officer cadets who have completed at least two weeks training were invited to participate in the survey. Participants complete an anonymous and confidential online questionnaire.

The survey was carried out over a 12 month survey period (1 April 2017 to 31 March 2018). During this time there were 908 responses to the questionnaire. Overall, 448 RAF officer cadets, 223 Army officer cadets, 204 Navy officer cadets and 33 RM officer cadets completed the survey.

The overall response rate for all four colleges in 2017/18 was 57% compared with 78% in 2016/17.

There have been small changes in the respondent profile in terms of age and gender. The data is not weighted to take account of non-response.

Totals may not add up to 100% due to rounding.

A detailed explanation of the statistical reliability of this survey is found in Annex A of the main report, however it should be noted that due to non-response we cannot be certain that the figures obtained are exactly those we would have found, had everybody been interviewed (the 'true' values).

For any percentage given 'confidence intervals' within which the true values are likely to fall are estimated. For example; if 10% or 90% of our sample of 908 officer cadets strongly agreed that the training was what they expected, we can be 99% confident that the 'true' value would be between 12.6% or 7.4% (if 10% strongly agree) and between 92.6% or 87.4% (if 90% strongly agree) i.e. a margin of 2.6% on each side.

Table 1: Response rates

	2017/18 Total Responses	2017/18 response rate	2016/17 response rate	2015/16 response rate
Army	223	36	57	38
Navy	204	49	100	96
RAF	448	90	94	94
Royal Marines	33	67	58	86
Total	908	57	78	70
