Travelling in Britain in the future

Tell us what you think

Answer Booklet

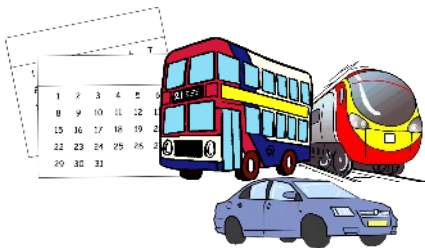

EasyRead version of:
Future of Mobility: Call for Evidence
Moving Britain Ahead

What is in this booklet

Part 1. Our plan for travel in cities

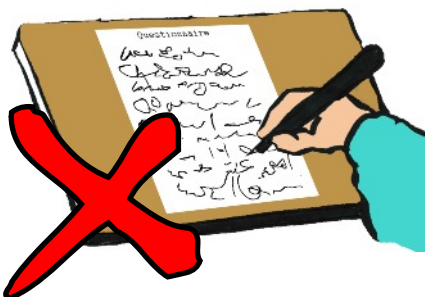

Part 2. Travel in the future – the Grand Challenge

There is a separate **Information Booklet** that tells you about our plans.

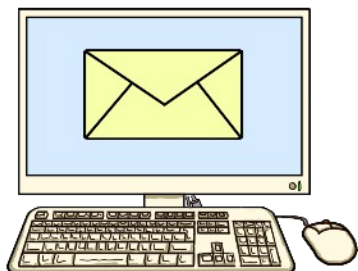

It also tells you how to send us your answers.

You do not need to answer all the questions, just the ones that are important to you.

Our questions about the changes

1. Are there any other types of **technology** that will affect travel in cities in the future?

2. What changes do we need to make to roads, streets and railways to help us use **technology**?

3. How do you think these changes will affect cities?

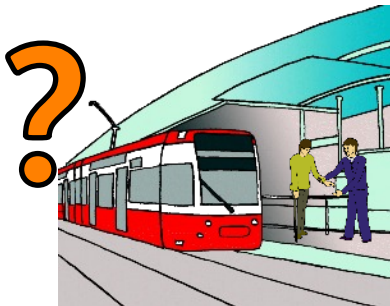

4. What problems might these changes cause that the government should watch out for?

Our questions about what we need to do

5. We want transport to work for everyone. What can the government do to make sure that happens?

6. How can the government make sure transport in cities supports people and communities?

7. How can the government help people understand new **technology** and transport services?

8. How do you think these changes will affect jobs? How can the government support people and businesses who are affected by the changes?

9. What else should the government do to help people, businesses and cities get ready for the changes?

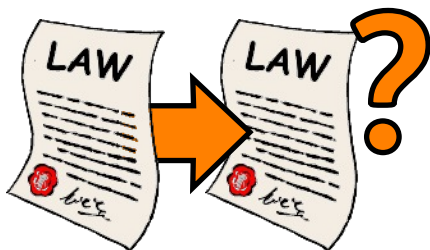

Our questions about 'missions'

10. Which of these 'missions' would help people come up with new ideas?

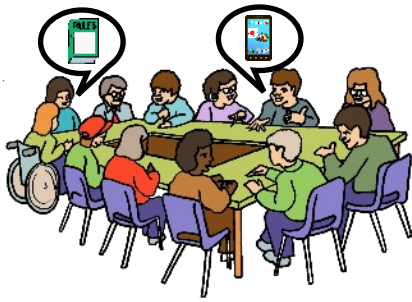

11. How should the government spend its money to help companies come up with new ideas for transport?

Our questions about laws

12. Which laws need to change to help us use new **technology** but also keep people safe?

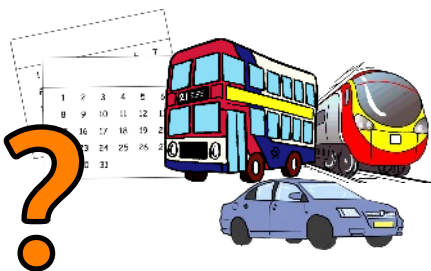

13. How can we make it easier for people with new ideas for transport to work with the people who make the rules?

Our questions about sharing information

14. What else can the government do to make it easier to share information safely?

Anything else?

15. Is there anything else you want to say about the future of transport?
