

Air Quality and Dust Monitoring Monthly Report – June 2018

London Borough of Hillingdon

SKANSKA

Department for Transport

High Speed Two (HS2) Limited has been tasked by the Department for Transport (DfT) with managing the delivery of a new national high speed rail network. It is a non-departmental public body wholly owned by the DfT.

High Speed Two (HS2) Limited,
Two Snowhill

Monthly Summary

- 1.1.1 This Summary Report is published in fulfilment of commitments detailed in the High Speed Rail (London-West Midlands) Environmental Minimum Requirements, Annex 1: Code of Construction Practice, for the nominated undertaker to present the results of air quality and dust monitoring undertaken in the London Borough of Hillingdon (LBH) during May and June 2018 respectively.
- 1.1.2 Figure 1 to Figure 4 in Appendix A indicate the current work sites, together with air quality and dust monitoring locations.
- 1.1.3 This summary should be read in conjunction with the overview monitoring report available from www.gov.uk/government/collections/monitoring-the-environmental-effects-of-hs2, which highlights: the applicable standards and guidance, as well as the air quality and dust monitoring methodologies to be implemented by nominated undertakers throughout construction.
- 1.1.4 The current phase of works commenced within the LBH during May 2018 and are expected to be completed by February 2019. The current worksites, as presented in Appendix A, Figure 1, include:
- 19' gas pipeline diversion, advanced planting and habitat creation, worksite ref. S002-WS05;
 - Merck Sharpe Dhome, site establishment and new access road construction and utility diversion at Breakspear Road South; work site ref. S002-WS03; and
 - Utility diversions at Copthall North, worksite ref. S002-WS06 and South, worksite ref. S002-WS04.
- 1.1.5 One (1) dust monitor was installed around worksite S002-WS03, where site establishment works are underway. This site returned a high dust risk rating.
- 1.1.6 Dust monitoring locations and results are presented in Appendix B, Table 1, together with line charts of monthly data from each dust monitor.
- 1.1.7 Four (4) exceedances of the dust trigger level were recorded during the monitoring period. However, following investigations it was noted that none of these exceedances were related to HS2 enabling works site activities. Roadworks were underway by 3rd party contractors on the MSD complex in close proximity to the dust monitor during the monitoring period. Exceedances are presented in Appendix B, Table 2. All other results were in line with the expected ranges.
- 1.1.8 Diffusion tube monitoring of Nitrogen Dioxide (NO₂) was undertaken at eleven (11) locations in May 2018, around highways within the LBH as part of the management of air quality where significant effects may occur as a result of the scheme.

- 1.1.9 Diffusion tube monitoring results were provided from the laboratory analysis, and therefore still require various analysis and adjustments to be undertaken. Final corrected results will be presented and described in the annual report. However, based on the results to date, no unexpected values were recorded during the monitoring period.
- 1.1.10 NO₂ monitoring locations and results are presented in Appendix C, Table 3, together with the 2018 running mean.
- 1.1.11 There were no complaints received, relating to dust or air quality, during this monitoring period.

HS2-000020BPK	Lamp post in crescent off Swakeleys Road (installed at end of January)	506542, 186037	No data	42	39	34	35								37
HS2-000020BPL	Warren Road sign post on corner of Swakeleys Road and Warren Road (installed at end of January)	506240, 185660	No data	48	46	43	39								44

¹ Note: to aid interpretation and conform with best practice, the monthly measurements in this table are reported rounded to the nearest whole number. The annual mean presented here is calculated based on laboratory data to 4 significant figures, rounded to a whole number, and therefore may differ slightly to a mean derived from averaging the rounded monthly measurements in the table.

Monitoring Site ID	Location description	Coordinates (X, Y)	Jan	Feb	Mar	Apr	May	June	Jul	Aug	Sep	Oct	Nov	Dec	Mean ¹
